15. ADJOURNMENT

Public comment on any public matter that is not on the agenda of this meeting can be presented under Request of Citizens, provided it is within the jurisdiction of the City to address. Public comment will be entered into the minutes of this meeting. The City Council cannot take any action on a matter unless notice of the matter has been made on an agenda and an opportunity for public comment has been allowed on the matter. Public matter does not include contested cases and other adjudicative proceedings

Minutes

REGULAR COUNCIL MEETING April 27, 2021 6:00 p.m.

CALL TO ORDER

The Regular Council meeting was held Tuesday, April 27, 2021, in the City Hall Conference Room at City Hall, 17 S. 8th Street, Miles City, Montana. Mayor John Hollowell called the meeting to order. Council Members present were Brant Kassner, Dwayne Andrews, Ken Gardner, Elizabeth Patten, Rick Huber, Kathy Wilcox and Stacey Broell.

Also present were City Attorney Dan Rice, Public Works Director Scott Gray, Police Chief Doug Colombik, Fire Chief Branden Stevens, Planner In Training Ally Capps, Flood Plain Administrator/Auto Cad/Assistant PWPV Samantha Malenovsky, Public Utilities Director Tom Speelmon, Human Resources Officer Linda Wilkins, RSVP Director Betty Vail, Police Captain Dan Baker, and City Clerk/Minute Recorder Mary Rowe.

PLEDGE OF ALLEGIANCE

Mayor Hollowell led the Council in the Pledge of Allegiance.

ELECT CHAIRPERSON

Councilperson Patten nominated Councilperson Kassner and seconded by Councilperson Broell. There being no other nominations, nominations were closed.

****** *Councilperson Patten moved to elect Councilperson Kassner as Council President and seconded by Councilperson Broell. The motion passed unanimously, 7-0.*

APPROVAL OF COUNCIL & COMMITTEE MINUTES

City Council Minutes: 4/13/2021

****** *Councilperson Gardner moved to approve the minutes of the Regular Council Meeting of April 13, 2021, subject to any changes, and seconded by Councilperson Huber. The motion passed by unanimous consent, 7-0.*

Human Resources Committee Minutes: 3/25/2021

****** *Councilperson Andrews moved to approve the minutes of the Human Resources Committee Meeting of March 25, 2021, subject to any changes, and seconded by Councilperson Kassner. The motion passed by unanimous consent, 7-0.*

Human Resources Committee Minutes: 4/8/2021

** Councilperson Broell moved to approve the minutes of the Human Resources Committee Meeting of April 8, 2021, subject to any changes, and seconded by Councilperson Andrews. The motion **passed** by unanimous consent, 7-0.

Human Resources Committee Minutes: 4/15/2021

** Councilperson Andrews moved to approve the minutes of the Human Resources Committee Meeting of April 15, 2021, subject to any changes, and seconded by Councilperson Gardner. The motion **passed** by unanimous consent, 7-0.

Finance Committee Minutes: 4/16/2021

** Councilperson Patten moved to approve the minutes of the Finance Committee Meeting of April 16, 2021, subject to any changes, and seconded by Councilperson Kassner. The motion **passed** by unanimous consent, 7-0.

SCHEDULE MEETINGS

The following meetings will be held in the City Hall Conference Room:

Human Resources Committee Meeting	5/6/2021	@4:00pm
Finance Committee Meeting	5/6/2021	@6:00pm

REQUEST OF CITIZENS & PUBLIC COMMENT

Brian Nansel of Miles City Football presented plans to have a new scoreboard installed at Bender Park. The plans outlined price, technicalities, and three different placement options. He also stated that he had been in contact with other teams that would be utilizing the scoreboard and they are in agreement. Ingraham Environmental volunteered to install the scoreboards and Red Rock Sporting Goods donated an application that will allow remote scoreboard management.

Attorney Rice stated that in the donations policy if the total donated cost is less than \$10,000 then it is considered a minor donation and can be approved by the Public Works Directly. Anything over that threshold is considered a major donation and will need to be sent through Council to accept the donation.

Mike Etchemendy of Outlaw Baseball Club requested that two scoreboards be installed at Tedesco and Stanley Fields. He gave an overview of the attachments presented in the Council Packet. These are more baseball oriented and the total cost for each is \$9000. It will be two separate projects.

Mark Ahner, 13 South Stacy, requested that the City of Miles City assist with five areas for the 4th of July festivities. He stated that the City has been very supportive with these same requests for several years. The 4th of July parade and park

events are a community event that are family oriented and alcohol free. There will be food, bounce house, and several other activities. The five requests follow:

- Main Street closure from 9-11am on July 4th for the parade.
- City Signage for the closed street.
- A park permit with Ryno included.
- City paid event insurance coverage.
- Police Escort for the parade.

Mayor Hollowell verified with Chief Colombik that the escort was feasible for that morning.

****** *Councilperson Andrews moved to approve the five requests, seconded by Councilperson Gardner and **passed** unanimously, 7-0.*

Lorretta Rebsom Stein with Keep Miles City Beautiful presented an upcoming clean up challenge taking place April 27th, 2021 through May 10th, 2021. Keep Miles City Beautiful will provide garbage bags, gloves, and picker-uppers to help those involved with the clean-up. She gave an overview of the past beautification, litter control, and recycling achievements. She asked that City Council support their cause, get involved, and help spread the word.

Council as a whole gave approval and encouragement, then thanked them for everything they do and have done.

APPOINTMENTS

Custer County Conservation District
Urban Supervisor - David Ritter

****** *Councilperson Andrews moved to approve the appointment and seconded by Councilperson Huber. The motion **passed** unanimously, 7-0.*

Solid Waste Board
Council Member

Councilperson Wilcox requested that this appointment be postponed. It was unanimously agreed upon to postpone.

Custer County Miles City Flood Control Committee
Council Member

****** *Councilperson Kassner moved to nominate Councilperson Patten for the Committee and seconded by Councilperson Patten. The motion **passed** unanimously, 7-0.*

Mayor Hollowell, with Council consent, appointed Councilperson Patten as the Council Member on the Custer County Miles City Flood Control Committee.

PROCLAMATIONS

None

STAFF REPORTS

Planner-in-Training Capps informed Council that she had handed out information about the subdivision now to give the Council ample time to review prior to the May 11th, 2021 Council Meeting.

Chief Stevens reported that the Fire Department/Ambulance is back at full staff!

Chief Colombik announced that Prairie County is coming on board with 911 and Southeastern Montana Dispatch. Supervisor Anderson also notified Council that there will be additional duties that come with this.

Captain Baker gave an update on the Police Department (PD) temporary move details. He said that the plan to move into the Woolhouse temporarily is now a “no go”. The additional cost was estimated at 60-70 thousand dollars, but there is not enough time to get it done. He met with the Sherriff’s Department and they are willing to temporarily give the PD their conference room and another room with a desk to work out of during the remodel. It was discussed at the PD that current technology would allow officers to do most of their work out of their vehicles.

Architect Janshen explained that if the temporary housing in the Woolhouse were to be a go, the price is increasing quickly. The game plan is to find the PD a temporary spot until the end of June, but utilize the upstairs and the Woolhouse with a chain link divider to secure and store evidence. He said an occupancy permit may be required and there are about fifteen days left to wait on the flood permit. Once approved, Hardy Construction has an itemized demo list start immediately. He reiterated that there will be cost savings now doing the full demo instead of temporary housing.

Custer County Commissioner Krauz said that they have made an Emergency Operating Center (EOC) room and an old day room at the EOC available. They also have an Economic Development office vacant in the Court House to give officers a place to come in and sit down.

CITY COUNCIL COMMENTS

Councilperson Patten received a phone call from David Pratt with the Soup Kitchen saying they also had to move out of the VA building and are currently in a church basement. They asked about possible grants for non-profit entities. Planner-in-

Training Capps stated that there are upcoming non-profit grants and that she would keep everyone posted.

Councilperson Patten explained that the City, County, and State are working on a truck route to cut out Main Street, more specifically the underpass. It will be re-routed around the town.

MAYOR COMMENTS

None

COMMITTEE RECOMMENDATIONS

None

BID OPENINGS

None

BID AWARDS

None

PUBLIC HEARINGS

- A. **ORDINANCE NO. 1346 - AN ORDINANCE REVISING CITY CODE SECTIONS 7-57 THROUGH 7-62 PERTAINING TO THE CITY OF MILES CITY URBAN RENEWAL DISTRICT BOARD OF COMMISSIONERS AND PROVIDING FOR AN EFFECTIVE DATE THEREOF**

Mayor Hollowell called for comments from proponents three times, then opponents three times and, hearing none, the hearing was closed.

UNFINISHED BUSINESS

- A. **ORDINANCE NO. 1346 (*Second Reading*) - AN ORDINANCE REVISING CITY CODE SECTIONS 7-57 THROUGH 7-62 PERTAINING TO THE CITY OF MILES CITY URBAN RENEWAL DISTRICT BOARD OF COMMISSIONERS AND PROVIDING FOR AN EFFECTIVE DATE THEREOF**

** *Councilperson Andrews moved to approve the Ordinance, read by title only and seconded by Councilperson Patten. On roll call vote, the motion passed by unanimous consent, 7-0. Ordinance No. 1346 passed.*

NEW BUSINESS

- A. **ORDINANCE NO. 1347 (*First Reading*) – AN ORDINANCE ADOPTING REVISED ENERGY CODES IN ACCORDANCE WITH**

**STATE OF MONTANA BUILDING CODES PROGRAM
REQUIREMENTS.**

****** *Councilperson Gardner moved to approve the Ordinance, read by title only and seconded by Councilperson Andrews. On roll call vote, the motion passed by unanimous consent, 7-0. **Ordinance No. 1347 passed first reading.***

B. RESOLUTION NO. 4399 - A RESOLUTION ESTABLISHING CITY OF MILES CITY PERSONNEL POLICIES REGARDING NON-UNION WAGE SCALE MATRIX

****** *Councilperson Broell moved to approve the Resolution, read by title only and seconded by Councilperson Wilcox.*

Councilperson Kassner asked if anyone had looked over the cost to the City.

Councilperson Wilcox explained that this motion is just to approve the policy, not the wage scale matrix attached. The wage scale matrix is going to the Finance Committee to approve and recommend to Council.

Councilperson Patten suggested changing the verbiage to include “City of Miles City will grant step increases as budget allows”, and instead of “as described” to “as proposed”, and finally to add “proposed” to the wage matrix example.

****** *Councilperson Kassner moved to postpone and seconded by Councilperson Patten. On a roll call vote the motion **failed 3-4** with Councilpersons Broell, Huber, Wilcox, and Andrews voting nay.*

Mayor Hollowell clarified with Council that passing this Resolution is only passing the policy and not the wage scale matrix attached to the Resolution; Councilperson Wilcox stated that the matrix is an example.

****** *On roll call vote, the main motion passed by unanimous consent, 7-0. **Resolution No. 4399 passed.***

C. RESOLUTION NO. 4400 - A RESOLUTION ESTABLISHING CITY OF MILES CITY PERSONNEL POLICIES REGARDING WAGE INCREASE REQUESTS

****** *Councilperson Wilcox moved to approve the Resolution, read by title only and seconded by Councilperson Andrews*

Councilperson Wilcox explained that this updates the language to indicate an increase is now related to COLA and step increases. She also stated that this policy

will be rarely used after the matrix is imposed.

****** *On roll call vote, the motion passed by unanimous consent, 7-0.*
Resolution No. 4400 passed.

D. RESOLUTION NO. 4401 - A RESOLUTION APPROVING A CITY OF MILES CITY RSVP CRIMINAL HISTORY CHECK POLICY

****** *Councilperson Andrews moved to approve the Resolution, read by title only and seconded by Councilperson Huber.*

Director Vail explained that RSVP, doing business as Americorp, runs on federal grants. She stated that she will be retiring soon and wanted to ensure that the City is in line with Americorp Policy.

****** *On roll call vote, the motion passed by unanimous consent, 7-0.*
Resolution No. 4401 passed.

ADJOURNMENT

****** *Councilperson Huber moved to adjourn the meeting, seconded by Councilperson Gardner and passed unanimously.*

The meeting was adjourned at 7:27 p.m.

John Hollowell, Mayor

Mary Rowe, City Clerk

Flood Control Committee
April 15, 2021

The Flood Control Committee met Thursday, April 15, 2021, at 6:00 p.m. in the City Hall Conference Room and zoom.us. Those present were Chairperson Ken Gardner, Committee Members Elizabeth Patten and Brant Kassner.

Also present were: Floodplain Administrator Samantha Malenovsky, Public Works Director Scott Gray, and City Clerk/Minute Recorder Mary Rowe.

1. Request of Citizens/Public Comment:

-None-

2. Committee Members Comments:

-None-

3. Discussion on Flood Control Project and Funding Options

Administrator Malenovsky gave the committee a copy of the Custer County Miles City (CCMC) Flood Control Meeting and minutes and explained that June through October there will be meetings on fine tuning the alternatives. Then public meetings will be held October through December to select alignments to the levee. Internal drainage is figured into the master stormwater plan for the slough. The City is trying to get the culverts on 7th street done prior to Montana Department of Transportation project. The total cost of the levee project is estimated at \$44,212,977, which include the remaining Section 205 study commitment, acquisition costs, Section 205 construction commitment, Yellowstone levee and storm water/internal drainage improvements. The City is anticipating an allocation 1.1 million dollars in American Rescue Plan Act (ARPA) funding from the federal government and approximately 3 billion is available through additional ARPA funding referred to as "The Beast", with approximately \$150 million going towards infrastructure projects. She also noted that as of today it is anticipated that there will be a one to one or twenty five percent match for "the beast" funding. It is in House Bill 632, which has not passed yet, so everything is subject to change. She stated that 30 million dollars is being requested by Ken Holmlund for this project; applications are due July 1st.

4. Adjournment

** *Committee Member Gardner moved to adjourn the meeting, seconded by Committee Member Patten and passed unanimously, 3-0.*

There being no further business, the Committee adjourned at 6:51 p.m.

Respectfully Submitted,

Ken Gardner, Chairperson

Mary Rowe, Recorder

Finance Committee Meeting

May 06, 2021

The Finance Committee met Thursday, May 06, 2021 at 6:00 p.m. in the City Hall Conference room and online via zoom.us. Present were Committee Chair Stacy Broell and Committee Members Brant Kassner and Elizabeth Patten.

Also present were Public Works Director Scott Gray, Police Chief Doug Colombik, Police Captain Dan Baker, Planner-in Training Ally Capps, Public Utilities Director Tom Speelmon, Dispatch Supervisor Lyne Anderson, and City Clerk/Recorder Mary Rowe.

Chairperson Broell called the meeting to order.

1. Requests of Citizens and Public Comment

None

2. Set a Fiscal Year 2021-2021 Budget Meeting Schedule

Committee Member Kassner suggested that the meeting be held June 15th, 16th, and 17th, 2021 at 6:00pm. All Committee Members agreed to the schedule.

3. Discussion and Recommendation Rent for Probation and Parole in Woolhouse Building

Chief Colombik said that Probation and Parole are needing a minimal amount of space. Charging \$1500-\$2000 per month seems reasonable. They are paying between \$12-\$14 per square foot now. This space will be built to suit them and give them room to expand if needed. He will discuss a long-term lease with them.

Chairperson Broell visited with Monty Lesh about commercial rental rates and they are currently about \$12-\$16 per square foot on Haynes Ave and \$6-\$11 per square foot downtown. She questioned whether Probation and Parole would be willing to enter into a twenty-year lease after the extent we are going to build to suit.

It was unanimously decided to postpone discussion and recommendation until more information is provided.

4. Discussion and Recommendation to approve purchase of man lift Public Works

Director Gray stated that there is a bucket truck at Bobcat that reaches sixty feet, the one they currently have reaches only thirty-five feet. There are tons of trees that need maintenance or cut down. Currently we are renting and/or hiring contractors, at approximately \$700 per day, to do the work outside of our limits. This purchase will save the City money in the long run. He also explained that an asphalt truck was budgeted, but they found one at a quarter of the cost so there

is budgeted funds available. He and Director Speelmon explained that per policy, only Finance approval is needed to make the purchase because it is under \$80,000.

** *Committee Member Patten moved to approve the purchase of the man lift from Bobcat and seconded by Committee Member Kassner. On a roll call vote the motion passed, 3-0.*

5. Discussion and Recommendation to approve purchase of semi-tractor Public Works

Directors Gray and Speelmon explained that they share equipment between their departments and brought Dan Decker to go over his recommendations for equipment with the Committee. Dan Decker talked about how there is an old tractor that is cobbled together. If there were a more trustworthy truck, it would eliminate thousands of dollars in freight charges and the City would be able to transport equipment across town. He does not believe a new one is in order, just a nice used one. Directors Gray and Speelmon explained that there are semi-tractors available online at live auctions. They both have budgeted \$50,000 in each department, but need Finance approval to purchase equipment at auction up to \$50,000, per policy.

Committee Member Kassner asked if Attorney Rice has reviewed this, to which Director Speelmon replied no, it is City policy, and long term they are looking at purchasing a side dump truck as well.

** *Committee Member Kassner moved to approve purchase of semi-tractor at auction up to \$50,000, seconded by Committee Member Patten. On a roll call vote the motion passed, 3-0.*

6. Review and update lease for Stevenson/Big Sky Cremation

Planner-in-Training Capps stated that Stevenson's have a crematory at the VA and need to vacate. They currently have a pet crematory lease with us. The update to their lease allows the City to get them up to current policy rates. They currently pay \$466.75 annually, with the updated lease they will pay \$1100 annually. She explained that the rate is set in Resolution 4123 for the industrial site. They are wanting to add a 30x50 building on the leased property.

Committee Member Patten stated that the industrial site lease rates should be revisited for future leases.

** *Committee Member Patten moved to approve the updated lease for Stevenson/Big Sky Cremation and seconded by Committee Member Kassner. On a roll call vote the motion passed, 3-0.*

7. Discussion of power to Splash Pad

Director Gray explained that originally when MCI² proposed donating the Splash Pad they had donated the electrical. They are on phase 1 of 3, which the pumps won't handle

phase 1 electrical. It will cost about \$16,000 total to add the remaining electrical. They are requesting that the City pay half the cost to install it. It will be needed for the frog pool and the Wibaux fountain too. The budget would need to be amended to include this cost or budgeted for next fiscal year. They are planning to open the Splash Pad in September.

Committee Chair Broell requested this be added to the Council Agenda as a discussion item.

8. Discussion and Recommendation to Write-off Ambulance Charges in the amount of \$112.94

****** *Committee Member Patten moved to recommend approval to write-off Ambulance charges in the amount of \$112.94, seconded by Committee Member Kassner. The motion passed unanimously, 3-0.*

9. Adjournment

****** *Committee Member Kassner moved to adjourn the meeting, seconded by Committee Member Patten and passed unanimously, 3-0.*

The meeting was adjourned at 7:03 p.m.

Austin Lott, Committee Chairperson

Mary Rowe, Recorder

Human Resources Committee
May 6, 2021

The **Human Resources Committee** met Thursday, May 6, 2021 at 4:00 p.m. in the City Hall Conference Room. Present were Committee Members Kathy Wilcox, Stacy Broell, and Dwayne Andrews. Committee Member Rick Huber was excused. Also present were: Police Chief Doug Colombik, Dispatch Supervisor Lyne Anderson, Fire Chief Branden Stevens, City Planner-in-Training Ally Capps, and Human Resources Officer/Recorder Linda Wilkins.

Chairperson Wilcox called the meeting to order.

1. Request of Citizens

Supervisor Anderson announced that Prairie County is joining Southeastern Montana Dispatch. She has spoken with the state of Montana regarding the addition of Prairie County and the State will be awarding \$16,000 to facilitate the additional costs associated with adding Prairie County to the telecommunication system.

2. Committee Member Comments

None

3. Review, approve Position Description: 911 Telecommunicator

The position description will be formatted into the current position description template. The following changes were made to the position description:

Summary of Work: add "..., County of Prairie, ...move "City of Miles City" to beginning of list. Add language "Receives complaints and calls for service from the public and disseminates accurate information in a professional and efficient manner to Law Enforcement, Fire & EMS first responders. Dispatches the calls and updates responders with incident information, maintains logs, records and paperwork. Assists the public with a variety of information and direction." **Personal Contacts:** add "...City of Miles City Police..." **Nature of Work:** strike "May be required to act as a matron in the absence of a female." **Essential Functions:** strike "...and not interrupting at inappropriate times" Bullet - Judgement and Decision Making add "Considering multiple actions to an incident to determine the appropriate action for response." Bullet - Coordination add "...assist the public." Bullet - Deductive Reasoning add "The ability to apply general operating guidelines to specific incidents to produce a desired and safe response." **General Duties:** Eleventh bullet strike "Receive payment for impound fees, parking tickets, dog fines and fees, catering fees, photo copy fees, and others may be necessary. Also...Collect..." Add after twelfth bullet "Due to the security of the work environment, light cleaning may be required." **Education:** add Certification in "King County Emergency Medical Dispatch"... **Special Requirements:** add "...investigations and be of good moral and ethical character."

***Committee Member Andrews moved to approve the 911 Telecommunicator Position Description as revised, seconded by Committee Member Broell. On roll call vote, the motion passed unanimously 4-0.*

4. Review, Revise, Approve COLA and Step Increase Recommendation Form

Chairperson Wilcox developed this form to track the COLA and Step Increase process. The form was reviewed and the following change was made:

Item II ...\$_____ ; includes for... Add - "See attached for fund breakdown."
Item III Strike Elizabeth Patten

***Committee Member Broell moved to approve the COLA and Step Increase Recommendation Form as revised, seconded by Committee Member Andrews. The motion passed unanimously 4-0.*

5. Discuss, Recommend to Finance Committee: COLA for FY 2021-2022

After a review of COLA information from a spreadsheet from the state of Montana as of December 2020 of 1.2% and the Department of Labor Bureau of Labor Statistics New Release from December 2020 of 1.5%, it was decided to use the 1.2% from the state of Montana.

***Committee Member Broell moved to recommend to the Finance Committee a COLA increase of 1.2% for FY 2021-2022, seconded by Committee Member Andrews. On roll call vote, the motion passed unanimously 4-0.*

6. Discuss, Recommend to Finance Committee: Step Increase for FY 2021-2022

***Committee Member Andrews moved to recommend to the Finance Committee a step increase for FY 2021-2022, seconded by Committee Member Huber. On roll call vote, the motion passed unanimously 4-0.*

7. Next Meeting: June 3, 2021; 4:15 p.m.

8. Adjournment

***Committee Member Huber moved to adjourn, seconded by Committee Member Broell. The motion passed unanimously 4-0.*

The meeting was adjourned at 4:45 p.m.

Respectfully submitted,

Chairperson Kathy Wilcox

Recorder Linda Wilkins

RESOLUTION NO. 4410

A RESOLUTION APPROVING A STANDARD ABBREVIATED FORM OF AGREEMENT BETWEEN OWNER AND ARCHITECT FOR PROFESSIONAL SERVICES WITH JGA ARCHITECTS ENGINEERS PLANNERS, PC., FOR THE PROVISION OF ARCHITECTURAL SERVICES TO THE CITY OF MILES CITY FOR A 5-YEAR PERIOD.

WHEREAS, the City of Miles City has the power to contract for architectural services without soliciting competitive bids, pursuant to MCA §7-5-4301;

AND WHEREAS, the City of Miles City wishes to contract with JGA Architects Engineers Planners, PC. for the provision of general architectural services to the City, as may be requested by the City from time to time, for a five (5) year period;

AND WHEREAS, JGA Architects Engineers Planners, PC. has agreed to be available to the City of Miles City to provide general architectural services upon request of the City during said five (5) year period;

NOW THEREFORE, IT IS RESOLVED BY THE CITY COUNCIL OF THE CITY OF MILES CITY, MONTANA AS FOLLOWS:

1. The "Standard Abbreviated Form of Agreement Between Owner and Architect for Professional Services," attached hereto as Exhibit "A," and made a part hereof, is hereby approved and adopted by this council.
2. The Mayor of the City of Miles City is hereby empowered and authorized to execute said agreement on behalf of the City of Miles City, and bind the City of Miles City thereto.
3. The Mayor of the City of Miles City is hereby empowered and authorized to execute such further documents as may become necessary to carry out the terms of said agreement.

SAID RESOLUTION FINALLY PASSED AND ADOPTED BY A DULY CONSTITUTED QUORUM OF THE CITY COUNCIL OF THE CITY OF MILES CITY, MONTANA, THIS 25TH DAY OF MAY, 2021.

John Hollowell, Mayor

ATTEST:

Mary Rowe, City Clerk

 **AIA**® Document B104™ – 2017

Standard Abbreviated Form of Agreement Between Owner and Architect

AGREEMENT made as of the Tenth day of May in the year 2021
(In words, indicate day, month and year.)

BETWEEN the Architect's client identified as the Owner:
(Name, legal status, address and other information)

City of Miles City Montana
17 S. 8th, PO Box 910
Miles City, Montana
59301-0910

and the Architect:
(Name, legal status, address and other information)

JGA Architects, PC
3333 2nd Avenue North, Suite 160
Billings, Montana
59101

for the following Project:
(Name, location and detailed description)

Miles City Open End Services Agreement
Miles City Montana

ADDITIONS AND DELETIONS:

The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added necessary information and where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

The Owner and Architect agree as follows.

TABLE OF ARTICLES

- 1 INITIAL INFORMATION
- 2 ARCHITECT'S RESPONSIBILITIES
- 3 SCOPE OF ARCHITECT'S BASIC SERVICES
- 4 SUPPLEMENTAL AND ADDITIONAL SERVICES
- 5 OWNER'S RESPONSIBILITIES
- 6 COST OF THE WORK
- 7 COPYRIGHTS AND LICENSES
- 8 CLAIMS AND DISPUTES
- 9 TERMINATION OR SUSPENSION
- 10 MISCELLANEOUS PROVISIONS
- 11 COMPENSATION
- 12 SPECIAL TERMS AND CONDITIONS
- 13 SCOPE OF THE AGREEMENT

ARTICLE 1 INITIAL INFORMATION

§ 1.1 This Agreement is based on the Initial Information set forth below:

(State below details of the Project's site and program, Owner's contractors and consultants, Architect's consultants, Owner's budget for the Cost of the Work, and other information relevant to the Project.)

Provide General Architectural Services as directed by the City of Miles City Mayor and City Council for a five (5) year period, with the City of Miles City having the option to extend said period for an additional five (5) year period upon City Council Approval. JGA Architects will provide general architectural and related services necessary for the design, construction and renovation of City buildings and facilities. Payment terms will be based on a work order basis and a negotiated fixed fee per scope of work.

§ 1.2 The Owner and Architect may rely on the Initial Information. Both parties, however, recognize that such information may materially change, and, in that event, the Owner and the Architect shall appropriately adjust the schedule, the Architect's services and the Architect's compensation. The Owner shall adjust the Owner's budget for the Cost of the Work and the Owner's anticipated design and construction milestones, as necessary, to accommodate material changes in the Initial Information.

§ 1.3 The parties shall agree upon protocols governing the transmission and use of Instruments of Service or any other information or documentation in digital form.

(Paragraph deleted)

ARTICLE 2 ARCHITECT'S RESPONSIBILITIES

§ 2.1 The Architect shall provide the professional services set forth in this Agreement consistent with the professional skill and care ordinarily provided by architects practicing in the same or similar locality under the same or similar circumstances. The Architect shall perform its services as expeditiously as is consistent with such professional skill and care and the orderly progress of the Project.

§ 2.2 The Architect shall maintain the following insurance until termination of this Agreement. If any of the requirements set forth below are in addition to the types and limits the Architect normally maintains, the Owner shall pay the Architect as set forth in Section 11.8:

(Identify types and limits of insurance coverage, and other insurance requirements applicable to the Agreement, if any.)

- .1 General Liability
\$1,000,000/\$2,000,000
- .2 Automobile Liability
\$1,000,000
- .3 Workers' Compensation
\$500,000
- .4 Professional Liability
\$1,000,000/\$2,000,000

ARTICLE 3 SCOPE OF ARCHITECT'S BASIC SERVICES

§ 3.1 The Architect's Basic Services consist of those described in this Article 3 and include usual and customary structural, mechanical, and electrical engineering services. Services not set forth in this Article 3 are Supplemental or Additional Services.

§ 3.1.1 The Architect shall coordinate its services with those services provided by the Owner and the Owner's consultants. The Architect shall be entitled to rely on (1) the accuracy and completeness of the services and information furnished by the Owner and (2) the Owner's approvals. The Architect shall provide prompt written notice to the Owner if the Architect becomes aware of any error, omission, or inconsistency in such services or information.

§ 3.1.2 As soon as practicable after the date of this Agreement, the Architect shall submit for the Owner's approval a schedule for the performance of the Architect's services. Once approved by the Owner, time limits established by the schedule shall not, except for reasonable cause, be exceeded by the Architect or Owner. With the Owner's approval, the Architect shall adjust the schedule, if necessary, as the Project proceeds until the commencement of construction.

§ 3.1.3 The Architect shall assist the Owner in connection with the Owner's responsibility for filing documents required for the approval of governmental authorities having jurisdiction over the Project.

§ 3.2 Design Phase Services

§ 3.2.1 The Architect shall review the program and other information furnished by the Owner, and shall review laws, codes, and regulations applicable to the Architect's services.

§ 3.2.2 The Architect shall discuss with the Owner the Owner's program, schedule, budget for the Cost of the Work, Project site, and alternative approaches to design and construction of the Project. The Architect shall reach an understanding with the Owner regarding the Project requirements.

§ 3.2.3 The Architect shall consider the relative value of alternative materials, building systems and equipment, together with other considerations based on program, aesthetics, and any sustainable objectives, in developing a design for the Project that is consistent with the Owner's schedule and budget for the Cost of the Work.

§ 3.2.4 Based on the Project requirements, the Architect shall prepare Design Documents for the Owner's approval consisting of drawings and other documents appropriate for the Project and the Architect shall prepare and submit to the Owner an estimate of the Cost of the Work prepared in accordance with Section 6.3.

§ 3.2.5 The Architect shall submit the Design Documents to the Owner and request the Owner's approval.

§ 3.3 Construction Documents Phase Services

§ 3.3.1 Based on the Owner's approval of the Design Documents, the Architect shall prepare for the Owner's approval Construction Documents consisting of Drawings and Specifications setting forth in detail the requirements for the construction of the Work. The Owner and Architect acknowledge that in order to construct the Work the Contractor will provide additional information, including Shop Drawings, Product Data, Samples and other similar submittals, which the Architect shall review in accordance with Section 3.4.4.

§ 3.3.2 The Architect shall incorporate the design requirements of governmental authorities having jurisdiction over the Project into the Construction Documents.

§ 3.3.3 The Architect shall submit the Construction Documents to the Owner, update the estimate for the Cost of the Work and advise the Owner of any adjustments to the estimate of the Cost of the Work, take any action required under Section 6.5, and request the Owner's approval.

§ 3.3.4 The Architect, following the Owner's approval of the Construction Documents and of the latest estimate of the Cost of the Work, shall assist the Owner in obtaining bids or proposals and awarding and preparing contracts for construction.

§ 3.4 Construction Phase Services

§ 3.4.1 General

§ 3.4.1.1 The Architect shall provide administration of the Contract between the Owner and the Contractor as set forth below and in AIA Document A104™-2017, Standard Abbreviated Form of Agreement Between Owner and Contractor. If the Owner and Contractor modify AIA Document A104-2017, those modifications shall not affect the Architect's services under this Agreement unless the Owner and the Architect amend this Agreement.

§ 3.4.1.2 The Architect shall advise and consult with the Owner during the Construction Phase Services. The Architect shall have authority to act on behalf of the Owner only to the extent provided in this Agreement. The Architect shall not have control over, charge of, or responsibility for the construction means, methods, techniques, sequences or procedures, or for safety precautions and programs in connection with the Work, nor shall the Architect be responsible for the Contractor's failure to perform the Work in accordance with the requirements of the Contract Documents. The Architect shall be responsible for the Architect's negligent acts or omissions but shall not have control over or charge of and shall not be responsible for, acts or omissions of the Contractor or of any other persons or entities performing portions of the Work.

§ 3.4.1.3 Subject to Section 4.2, the Architect's responsibility to provide Construction Phase Services commences with the award of the Contract for Construction and terminates on the date the Architect issues the final Certificate for Payment.

§ 3.4.2 Evaluations of the Work

§ 3.4.2.1 The Architect shall visit the site at intervals appropriate to the stage of construction, or as otherwise required in Section 4.2.2, to become generally familiar with the progress and quality of the portion of the Work completed, and to determine, in general, if the Work observed is being performed in a manner indicating that the Work, when fully completed, will be in accordance with the Contract Documents. However, the Architect shall not be required to make exhaustive or continuous on-site inspections to check the quality or quantity of the Work. On the basis of the site visits, the Architect shall keep the Owner reasonably informed about the progress and quality of the portion of the Work completed, and promptly report to the Owner (1) known deviations from the Contract Documents, (2) known deviations from the most recent construction schedule submitted by the Contractor, and (3) defects and deficiencies observed in the Work.

§ 3.4.2.2 The Architect has the authority to reject Work that does not conform to the Contract Documents and has the authority to require inspection or testing of the Work.

§ 3.4.2.3 The Architect shall interpret and decide matters concerning performance under, and requirements of, the Contract Documents on written request of either the Owner or Contractor. The Architect's response to such requests shall be made in writing within any time limits agreed upon or otherwise with reasonable promptness.

§ 3.4.2.4 When making such interpretations and decisions, the Architect shall endeavor to secure faithful performance by both Owner and Contractor, shall not show partiality to either, and shall not be liable for results of interpretations or decisions rendered in good faith.

§ 3.4.2.5 The Architect shall render initial decisions on Claims between the Owner and Contractor as provided in the Contract Documents.

§ 3.4.3 Certificates for Payment to Contractor

§ 3.4.3.1 The Architect shall review and certify the amounts due the Contractor and shall issue certificates in such amounts. The Architect's certification for payment shall constitute a representation to the Owner, based on the Architect's evaluation of the Work as provided in Section 3.4.2 and on the data comprising the Contractor's Application for Payment, that, to the best of the Architect's knowledge, information and belief, the Work has progressed to the point indicated, the quality of the Work is in accordance with the Contract Documents, and that the Contractor is entitled to payment in the amount certified.

§ 3.4.3.2 The issuance of a Certificate for Payment shall not be a representation that the Architect has (1) made exhaustive or continuous on-site inspections to check the quality or quantity of the Work, (2) reviewed construction means, methods, techniques, sequences or procedures, (3) reviewed copies of requisitions received from Subcontractors and suppliers and other data requested by the Owner to substantiate the Contractor's right to payment, or (4) ascertained how or for what purpose the Contractor has used money previously paid on account of the Contract Sum.

§ 3.4.4 Submittals

§ 3.4.4.1 The Architect shall review and approve, or take other appropriate action, upon the Contractor's submittals such as Shop Drawings, Product Data and Samples, but only for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents. Review of such submittals is not for the purpose of determining the accuracy and completeness of other information such as dimensions, quantities, and installation or performance of equipment or systems, which are the Contractor's responsibility. The Architect's review shall not constitute approval of safety precautions or any construction means, methods, techniques, sequences or procedures.

§ 3.4.4.2 If the Contract Documents specifically require the Contractor to provide professional design services or certifications by a design professional related to systems, materials or equipment, the Architect shall specify the appropriate performance and design criteria that such services must satisfy. The Architect shall review and take appropriate action on Shop Drawings and other submittals related to the Work designed or certified by the Contractor's design professional, provided the submittals bear such professional's seal and signature when submitted to the Architect. The review shall be for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents. The Architect shall be entitled to rely upon, and shall not be responsible for, the adequacy and accuracy of the services, certifications, and approvals performed or provided by such design professionals.

§ 3.4.4.3 The Architect shall review and respond to written requests for information about the Contract Documents. The Architect's response to such requests shall be made in writing within any time limits agreed upon, or otherwise with reasonable promptness.

§ 3.4.5 Changes in the Work

The Architect may order minor changes in the Work that are consistent with the intent of the Contract Documents and do not involve an adjustment in the Contract Sum or an extension of the Contract Time. Subject to Section 4.2.3, the

Architect shall prepare Change Orders and Construction Change Directives for the Owner's approval and execution in accordance with the Contract Documents.

§ 3.4.6 Project Completion

The Architect shall conduct inspections to determine the date or dates of Substantial Completion and the date of final completion; issue Certificates of Substantial Completion; forward to the Owner, for the Owner's review and records, written warranties and related documents required by the Contract Documents and received from the Contractor; and issue a final Certificate for Payment based upon a final inspection indicating that, to the best of the Architect's knowledge, information, and belief, the Work complies with the requirements of the Contract Documents.

ARTICLE 4 SUPPLEMENTAL AND ADDITIONAL SERVICES

§ 4.1 Supplemental Services are not included in Basic Services but may be required for the Project. The Architect shall provide the Supplemental Services indicated below, and the Owner shall compensate the Architect as provided in Section 11.2. Supplemental Services may include programming, site evaluation and planning, environmental studies, civil engineering, landscape design, telecommunications/data, security, measured drawings of existing conditions, coordination of separate contractors or independent consultants, detailed cost estimates, on-site project representation beyond requirements of Section 4.2.2, value analysis, interior architectural design, tenant related services, preparation of record drawings, commissioning, sustainable project services, and any other services not otherwise included in this Agreement. *(Identify below the Supplemental Services that the Architect is required to provide and insert a description of each Supplemental Service, if not further described in an exhibit attached to this document.)*

§ 4.2 The Architect may provide Additional Services after execution of this Agreement without invalidating the Agreement. Upon recognizing the need to perform Additional Services, the Architect shall notify the Owner. The Architect shall not provide the Additional Services until the Architect receives the Owner's written authorization. Except for services required due to the fault of the Architect, any Additional Services provided in accordance with this Section 4.2 shall entitle the Architect to compensation pursuant to Section 11.3.

§ 4.2.1 The Architect shall provide services necessitated by a change in the Initial Information, changes in previous instructions or approvals given by the Owner, or a material change in the Project including size; quality; complexity; the Owner's schedule or budget for Cost of the Work; or procurement or delivery method as an Additional Service.

§ 4.2.2 The Architect has included in Basic Services To Be Determined (TBD) visits to the site by the Architect during construction. The Architect shall conduct site visits in excess of that amount as an Additional Service.

§ 4.2.3 The Architect shall, as an Additional Service, provide services made necessary by a Contractor's proposed change in the Work. The Architect shall prepare revisions to the Architect's Instruments of Service necessitated by Change Orders and Construction Change Directives as an Additional Service.

§ 4.2.4 If the services covered by this Agreement have not been completed within sixty (60) months of the date of this Agreement, through no fault of the Architect, extension of the Architect's services beyond that time shall be compensated as Additional Services.

ARTICLE 5 OWNER'S RESPONSIBILITIES

§ 5.1 Unless otherwise provided for under this Agreement, the Owner shall provide information in a timely manner regarding requirements for and limitations on the Project, including a written program which shall set forth the Owner's objectives, schedule, constraints and criteria, including space requirements and relationships, flexibility, expandability, special equipment, systems and site requirements.

§ 5.2 The Owner shall establish the Owner's budget for the Project, including (1) the budget for the Cost of the Work as defined in Section 6.1; (2) the Owner's other costs; and, (3) reasonable contingencies related to all these costs. The Owner shall update the Owner's budget for the Project as necessary throughout the duration of the Project until final completion. If the Owner significantly increases or decreases the Owner's budget for the Cost of the Work, the Owner shall notify the Architect. The Owner and the Architect shall thereafter agree to a corresponding change in the Project's scope and quality.

§ 5.3 The Owner shall furnish surveys to describe physical characteristics, legal limitations and utility locations for the site of the Project; a written legal description of the site; and services of geotechnical engineers or other consultants, when the Architect requests such services and demonstrates that they are reasonably required by the scope of the Project.

§ 5.4 The Owner shall coordinate the services of its own consultants with those services provided by the Architect. Upon the Architect's request, the Owner shall furnish copies of the scope of services in the contracts between the Owner and the Owner's consultants. The Owner shall require that its consultants and contractors maintain insurance, including professional liability insurance, as appropriate to the services or work provided.

§ 5.5 The Owner shall furnish tests, inspections and reports required by law or the Contract Documents, such as structural, mechanical, and chemical tests; tests for air and water pollution; and tests for hazardous materials.

§ 5.6 The Owner shall furnish all legal, insurance and accounting services, including auditing services, that may be reasonably necessary at any time for the Project to meet the Owner's needs and interests.

§ 5.7 The Owner shall provide prompt written notice to the Architect if the Owner becomes aware of any fault or defect in the Project, including errors, omissions or inconsistencies in the Architect's Instruments of Service.

§ 5.8 The Owner shall endeavor to communicate with the Contractor through the Architect about matters arising out of or relating to the Contract Documents.

§ 5.9 The Owner shall provide the Architect access to the Project site prior to commencement of the Work and shall obligate the Contractor to provide the Architect access to the Work wherever it is in preparation or progress.

§ 5.10 Within 15 days after receipt of a written request from the Architect, the Owner shall furnish the requested information as necessary and relevant for the Architect to evaluate, give notice of, or enforce lien rights.

ARTICLE 6 COST OF THE WORK

§ 6.1 For purposes of this Agreement, the Cost of the Work shall be the total cost to the Owner to construct all elements of the Project designed or specified by the Architect and shall include contractors' general conditions costs, overhead and profit. The Cost of the Work also includes the reasonable value of labor, materials, and equipment, donated to, or otherwise furnished by, the Owner. The Cost of the Work does not include the compensation of the Architect; the costs of the land, rights-of-way, financing, or contingencies for changes in the Work; or other costs that are the responsibility of the Owner.

§ 6.2 The Owner's budget for the Cost of the Work is provided in Initial Information and shall be adjusted throughout the Project as required under Sections 5.2, 6.4 and 6.5. Evaluations of the Owner's budget for the Cost of the Work, and the preliminary estimate of the Cost of the Work and updated estimates of the Cost of the Work prepared by the Architect, represent the Architect's judgment as a design professional. It is recognized, however, that neither the Architect nor the Owner has control over the cost of labor, materials or equipment; the Contractor's methods of determining bid prices; or competitive bidding, market or negotiating conditions. Accordingly, the Architect cannot and does not warrant or represent that bids or negotiated prices will not vary from the Owner's budget for the Cost of the Work, or from any estimate of the Cost of the Work, or evaluation, prepared or agreed to by the Architect.

§ 6.3 In preparing estimates of the Cost of Work, the Architect shall be permitted to include contingencies for design, bidding and price escalation; to determine what materials, equipment, component systems and types of construction are to be included in the Contract Documents; to recommend reasonable adjustments in the program and scope of the Project; and to include design alternates as may be necessary to adjust the estimated Cost of the Work to meet the Owner's budget. The Architect's estimate of the Cost of the Work shall be based on current area, volume or similar conceptual estimating techniques. If the Owner requires a detailed estimate of the Cost of the Work, the Architect shall provide such an estimate, if identified as the Architect's responsibility in Section 4.1, as a Supplemental Service.

Init.

§ 6.4 If, through no fault of the Architect, construction procurement activities have not commenced within 90 days after the Architect submits the Construction Documents to the Owner the Owner's budget for the Cost of the Work shall be adjusted to reflect changes in the general level of prices in the applicable construction market.

§ 6.5 If at any time the Architect's estimate of the Cost of the Work exceeds the Owner's budget for the Cost of the Work, the Architect shall make appropriate recommendations to the Owner to adjust the Project's size, quality or budget for the Cost of the Work, and the Owner shall cooperate with the Architect in making such adjustments.

§ 6.6 If the Owner's current budget for the Cost of the Work at the conclusion of the Construction Documents Phase Services is exceeded by the lowest bona fide bid or negotiated proposal, the Owner shall

- .1 give written approval of an increase in the budget for the Cost of the Work;
- .2 authorize rebidding or renegotiating of the Project within a reasonable time;
- .3 terminate in accordance with Section 9.5;
- .4 in consultation with the Architect, revise the Project program, scope, or quality as required to reduce the Cost of the Work; or
- .5 implement any other mutually acceptable alternative.

§ 6.7 If the Owner chooses to proceed under Section 6.6.4, the Architect shall modify the Construction Documents as necessary to comply with the Owner's budget for the Cost of the Work at the conclusion of the Construction Documents Phase Services, or the budget as adjusted under Section 6.6.1. If the Owner requires the Architect to modify the Construction Documents because the lowest bona fide bid or negotiated proposal exceeds the Owner's budget for the Cost of the Work due to market conditions the Architect could not reasonably anticipate, the Owner shall compensate the Architect for the modifications as an Additional Service pursuant to Section 11.3; otherwise the Architect's services shall be without additional compensation. In any event, the Architect's modification of the Construction Documents shall be the limit of the Architect's responsibility under this Article 6.

ARTICLE 7 COPYRIGHTS AND LICENSES

§ 7.1 The Architect and the Owner warrant that in transmitting Instruments of Service, or any other information, the transmitting party is the copyright owner of such information or has permission from the copyright owner to transmit such information for its use on the Project.

§ 7.2 The Architect and the Architect's consultants shall be deemed the authors and owners of their respective Instruments of Service, including the Drawings and Specifications, and shall retain all common law, statutory and other reserved rights, including copyrights. Submission or distribution of Instruments of Service to meet official regulatory requirements or for similar purposes in connection with the Project is not to be construed as publication in derogation of the reserved rights of the Architect and the Architect's consultants.

§ 7.3 The Architect grants to the Owner a nonexclusive license to use the Architect's Instruments of Service solely and exclusively for purposes of constructing, using, maintaining, altering and adding to the Project, provided that the Owner substantially performs its obligations under this Agreement, including prompt payment of all sums when due pursuant to Article 9 and Article 11. The Architect shall obtain similar nonexclusive licenses from the Architect's consultants consistent with this Agreement. The license granted under this section permits the Owner to authorize the Contractor, Subcontractors, Sub-subcontractors, and suppliers, as well as the Owner's consultants and separate contractors, to reproduce applicable portions of the Instruments of Service, subject to any protocols established pursuant to Section 1.3, solely and exclusively for use in performing services or construction for the Project. If the Architect rightfully terminates this Agreement for cause as provided in Section 9.4, the license granted in this Section 7.3 shall terminate.

§ 7.3.1 In the event the Owner uses the Instruments of Service without retaining the authors of the Instruments of Service, the Owner releases the Architect and Architect's consultant(s) from all claims and causes of action arising from such uses. The Owner, to the extent permitted by law, further agrees to indemnify and hold harmless the Architect and its consultants from all costs and expenses, including the cost of defense, related to claims and causes of action asserted by any third person or entity to the extent such costs and expenses arise from the Owner's use of the Instruments of Service under this Section 7.3.1. The terms of this Section 7.3.1 shall not apply if the Owner rightfully terminates this Agreement for cause under Section 9.4.

Init.

§ 7.4 Except for the licenses granted in this Article 7, no other license or right shall be deemed granted or implied under this Agreement. The Owner shall not assign, delegate, sublicense, pledge or otherwise transfer any license granted herein to another party without the prior written agreement of the Architect. Any unauthorized use of the Instruments of Service shall be at the Owner's sole risk and without liability to the Architect and the Architect's consultants.

§ 7.5 Except as otherwise stated in Section 7.3, the provisions of this Article 7 shall survive the termination of this Agreement.

ARTICLE 8 CLAIMS AND DISPUTES

§ 8.1 General

§ 8.1.1 The Owner and Architect shall commence all claims and causes of action against the other and arising out of or related to this Agreement, whether in contract, tort, or otherwise, in accordance with the requirements of the binding dispute resolution method selected in this Agreement and within the period specified by applicable law, but in any case not more than 10 years after the date of Substantial Completion of the Work. The Owner and Architect waive all claims and causes of action not commenced in accordance with this Section 8.1.1.

§ 8.1.2 To the extent damages are covered by property insurance, the Owner and Architect waive all rights against each other and against the contractors, consultants, agents, and employees of the other, for damages, except such rights as they may have to the proceeds of such insurance as set forth in AIA Document A104-2017, Standard Abbreviated Form of Agreement Between Owner and Contractor. The Owner or the Architect, as appropriate, shall require of the contractors, consultants, agents, and employees of any of them, similar waivers in favor of the other parties enumerated herein.

§ 8.1.3 The Architect and Owner waive consequential damages for claims, disputes or other matters in question, arising out of or relating to this Agreement. This mutual waiver is applicable, without limitation, to all consequential damages due to either party's termination of this Agreement, except as specifically provided in Section 9.6.

§ 8.2 Mediation

§ 8.2.1 Any claim, dispute or other matter in question arising out of or related to this Agreement shall be subject to mediation as a condition precedent to binding dispute resolution. If such matter relates to or is the subject of a lien arising out of the Architect's services, the Architect may proceed in accordance with applicable law to comply with the lien notice or filing deadlines prior to resolution of the matter by mediation or by binding dispute resolution.

§ 8.2.2 Mediation, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Mediation Procedures in effect on the date of this Agreement. The parties shall share the mediator's fee and any filing fees equally. The mediation shall be held in the place where the Project is located, unless another location is mutually agreed upon. Agreements reached in mediation shall be enforceable as settlement agreements in any court having jurisdiction thereof.

§ 8.2.3 If the parties do not resolve a dispute through mediation pursuant to this Section 8.2, the method of binding dispute resolution shall be the following:

(Check the appropriate box.)

- Arbitration pursuant to Section 8.3 of this Agreement
- Litigation in a court of competent jurisdiction
- Other: *(Specify)*

If the Owner and Architect do not select a method of binding dispute resolution, or do not subsequently agree in writing to a binding dispute resolution method other than litigation, the dispute will be resolved in a court of competent jurisdiction.

§ 8.3 Arbitration

§ 8.3.1 If the parties have selected arbitration as the method for binding dispute resolution in this Agreement, any claim, dispute or other matter in question arising out of or related to this Agreement subject to, but not resolved by, mediation shall be subject to arbitration which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Arbitration Rules in effect on the date of the Agreement.

§ 8.3.1.1 A demand for arbitration shall be made no earlier than concurrently with the filing of a request for mediation, but in no event shall it be made after the date when the institution of legal or equitable proceedings based on the claim, dispute or other matter in question would be barred by the applicable statute of limitations. For statute of limitations purposes, receipt of a written demand for arbitration by the person or entity administering the arbitration shall constitute the institution of legal or equitable proceedings based on the claim, dispute or other matter in question.

§ 8.3.2 The foregoing agreement to arbitrate, and other agreements to arbitrate with an additional person or entity duly consented to by parties to this Agreement, shall be specifically enforceable in accordance with applicable law in any court having jurisdiction thereof.

§ 8.3.3 The award rendered by the arbitrator(s) shall be final, and judgment may be entered upon it in accordance with applicable law in any court having jurisdiction thereof.

§ 8.3.4 Consolidation or Joinder

§ 8.3.4.1 Either party, at its sole discretion, may consolidate an arbitration conducted under this Agreement with any other arbitration to which it is a party provided that (1) the arbitration agreement governing the other arbitration permits consolidation; (2) the arbitrations to be consolidated substantially involve common questions of law or fact; and (3) the arbitrations employ materially similar procedural rules and methods for selecting arbitrator(s).

§ 8.3.4.2 Either party, at its sole discretion, may include by joinder persons or entities substantially involved in a common question of law or fact whose presence is required if complete relief is to be accorded in arbitration, provided that the party sought to be joined consents in writing to such joinder. Consent to arbitration involving an additional person or entity shall not constitute consent to arbitration of any claim, dispute or other matter in question not described in the written consent.

§ 8.3.4.3 The Owner and Architect grant to any person or entity made a party to an arbitration conducted under this Section 8.3, whether by joinder or consolidation, the same rights of joinder and consolidation as the Owner and Architect under this Agreement.

§ 8.4 The provisions of this Article 8 shall survive the termination of this Agreement.

ARTICLE 9 TERMINATION OR SUSPENSION

§ 9.1 If the Owner fails to make payments to the Architect in accordance with this Agreement, such failure shall be considered substantial nonperformance and cause for termination or, at the Architect's option, cause for suspension of performance of services under this Agreement. If the Architect elects to suspend services, the Architect shall give seven days' written notice to the Owner before suspending services. In the event of a suspension of services, the Architect shall have no liability to the Owner for delay or damage caused the Owner because of such suspension of services. Before resuming services, the Owner shall pay the Architect all sums due prior to suspension and any expenses incurred in the interruption and resumption of the Architect's services. The Architect's fees for the remaining services and the time schedules shall be equitably adjusted.

§ 9.2 If the Owner suspends the Project, the Architect shall be compensated for services performed prior to notice of such suspension. When the Project is resumed, the Architect shall be compensated for expenses incurred in the interruption and resumption of the Architect's services. The Architect's fees for the remaining services and the time schedules shall be equitably adjusted.

§ 9.3 If the Owner suspends the Project for more than 90 cumulative days for reasons other than the fault of the Architect, the Architect may terminate this Agreement by giving not less than seven days' written notice.

§ 9.4 Either party may terminate this Agreement upon not less than seven days' written notice should the other party fail substantially to perform in accordance with the terms of this Agreement through no fault of the party initiating the termination.

§ 9.5 The Owner may terminate this Agreement upon not less than seven days' written notice to the Architect for the Owner's convenience and without cause.

§ 9.6 In the event of termination not the fault of the Architect, the Architect shall be compensated for services performed prior to termination, Reimbursable Expenses incurred, and all costs attributable to termination, including the costs attributable to the Architect's termination of consultant agreements.

§ 9.7 In addition to any amounts paid under Section 9.6, if the Owner terminates this Agreement for its convenience pursuant to Section 9.5, or the Architect terminates this Agreement pursuant to Section 9.3, the Owner shall pay to the Architect the following fees:

(Set forth below the amount of any termination or licensing fee, or the method for determining any termination or licensing fee.)

.1 Termination Fee:

Work completed to date plus 10%

.2 Licensing Fee if the Owner intends to continue using the Architect's Instruments of Service:

Not Applicable

§ 9.8 Except as otherwise expressly provided herein, this Agreement shall terminate one year from the date of Substantial Completion.

ARTICLE 10 MISCELLANEOUS PROVISIONS

§ 10.1 This Agreement shall be governed by the law of the place where the Project is located excluding that jurisdiction's choice of law rules. If the parties have selected arbitration as the method of binding dispute resolution, the Federal Arbitration Act shall govern Section 8.3.

§ 10.2 Terms in this Agreement shall have the same meaning as those in AIA Document A104-2017, Standard Abbreviated Form of Agreement Between Owner and Contractor.

§ 10.3 The Owner and Architect, respectively, bind themselves, their agents, successors, assigns and legal representatives to this Agreement. Neither the Owner nor the Architect shall assign this Agreement without the written consent of the other, except that the Owner may assign this Agreement to a lender providing financing for the Project if the lender agrees to assume the Owner's rights and obligations under this Agreement, including any payments due to the Architect by the Owner prior to the assignment.

§ 10.4 If the Owner requests the Architect to execute certificates or consents, the proposed language of such certificates or consents shall be submitted to the Architect for review at least 14 days prior to the requested dates of execution. The Architect shall not be required to execute certificates or consents that would require knowledge, services or responsibilities beyond the scope of this Agreement.

§ 10.5 Nothing contained in this Agreement shall create a contractual relationship with, or a cause of action in favor of, a third party against either the Owner or Architect.

§ 10.6 The Architect shall have no responsibility for the discovery, presence, handling, removal or disposal of, or exposure of persons to, hazardous materials or toxic substances in any form at the Project site.

§ 10.7 The Architect shall have the right to include photographic or artistic representations of the design of the Project among the Architect's promotional and professional materials. However, the Architect's materials shall not include information the Owner has identified in writing as confidential or proprietary. The Owner shall provide professional

credit for the Architect in the Owner's promotional materials for the Project. This Section 10.7 shall survive the termination of this Agreement unless the Owner terminates this Agreement for cause pursuant to Section 9.4.

§ 10.8 The invalidity of any provision of the Agreement shall not invalidate the Agreement or its remaining provisions. If it is determined that any provision of the Agreement violates any law, or is otherwise invalid or unenforceable, then that provision shall be revised to the extent necessary to make that provision legal and enforceable. In such case the Agreement shall be construed, to the fullest extent permitted by law, to give effect to the parties' intentions and purposes in executing the Agreement.

ARTICLE 11 COMPENSATION

§ 11.1 For the Architect's Basic Services described under Article 3, the Owner shall compensate the Architect as follows:

- .1 Stipulated Sum
(Insert amount)

To Be Determined and Negotiated on a Work Order basis
- .2 Percentage Basis
(Insert percentage value)

NA (NA) % of the Owner's budget for the Cost of the Work, as calculated in accordance with Section 11.6.
- .3 Other
(Describe the method of compensation)

§ 11.2 For Supplemental Services identified in Section 4.1, the Owner shall compensate the Architect as follows:
(Insert amount of, or basis for, compensation. If necessary, list specific services to which particular methods of compensation apply.)

Actual Cost plus 10%

§ 11.3 For Additional Services that may arise during the course of the Project, including those under Section 4.2, the Owner shall compensate the Architect as follows:
(Insert amount of, or basis for, compensation.)

Actual Cost plus 10%

§ 11.4 Compensation for Supplemental and Additional Services of the Architect's consultants when not included in Section 11.2 or 11.3, shall be the amount invoiced to the Architect plus Fifteen percent (15%), or as follows:

§ 11.5 Where compensation for Basic Services is based on a stipulated sum or percentage of the Cost of the Work, the compensation for each phase of services shall be as follows:

Design Phase	TBD	percent ()
Construction Documents Phase	TBD	percent ()
Construction Phase	TBD	percent ()
<hr/>				
Total Basic Compensation	one hundred	percent (100	%)

§ 11.6 When compensation identified in Section 11.1 is on a percentage basis, progress payments for each phase of Basic Services shall be calculated by multiplying the percentages identified in this Article by the Owner's most recent budget for the Cost of the Work. Compensation paid in previous progress payments shall not be adjusted based on subsequent updates to the Owner's budget for the Cost of the Work.

§ 11.6.1 When compensation is on a percentage basis and any portions of the Project are deleted or otherwise not constructed, compensation for those portions of the Project shall be payable to the extent services are performed on those portions. The Architect shall be entitled to compensation in accordance with this Agreement for all services performed whether or not the Construction Phase is commenced.

§ 11.7 The hourly billing rates for services of the Architect and the Architect's consultants, if any, are set forth below. The rates shall be adjusted in accordance with the Architect's and Architect's consultants' normal review practices. *(If applicable, attach an exhibit of hourly billing rates or insert them below.)*

See Attached Rate Sheet

Employee or Category	Rate
----------------------	------

§ 11.8 Compensation for Reimbursable Expenses

§ 11.8.1 Reimbursable Expenses are in addition to compensation for Basic, Supplemental, and Additional Services and include expenses incurred by the Architect and the Architect's consultants directly related to the Project, as follows:

- .1 Transportation and authorized out-of-town travel and subsistence;
- .2 Long distance services, dedicated data and communication services, teleconferences, Project web sites, and extranets;
- .3 Permitting and other fees required by authorities having jurisdiction over the Project;
- .4 Printing, reproductions, plots, and standard form documents;
- .5 Postage, handling, and delivery;
- .6 Expense of overtime work requiring higher than regular rates if authorized in advance by the Owner;
- .7 Renderings, physical models, mock-ups, professional photography, and presentation materials requested by the Owner or required for the Project;
- .8 Expense of professional liability insurance dedicated exclusively to this Project or the expense of additional insurance coverage or limits requested by the Owner in excess of that normally maintained by the Architect and the Architect's consultants;
- .9 All taxes levied on professional services and on reimbursable expenses;
- .10 Site office expenses; and
- .11 Other similar Project-related expenditures.

§ 11.8.2 For Reimbursable Expenses the compensation shall be the expenses incurred by the Architect and the Architect's consultants plus Ten percent (10 %) of the expenses incurred.

§ 11.9 Payments to the Architect

§ 11.9.1 Initial Payment

An initial payment of Zero (\$ 0.00) shall be made upon execution of this Agreement and is the minimum payment under this Agreement. It shall be credited to the Owner's account in the final invoice.

§ 11.9.2 Progress Payments

§ 11.9.2.1 Unless otherwise agreed, payments for services shall be made monthly in proportion to services performed. Payments are due and payable upon presentation of the Architect's invoice. Amounts unpaid Ninety (90) days after the invoice date shall bear interest at the rate entered below, or in the absence thereof at the legal rate prevailing from time to time at the principal place of business of the Architect.

(Insert rate of monthly or annual interest agreed upon.)

%

Init.

§ 11.9.2.2 The Owner shall not withhold amounts from the Architect's compensation to impose a penalty or liquidated damages on the Architect, or to offset sums requested by or paid to contractors for the cost of changes in the Work unless the Architect agrees or has been found liable for the amounts in a binding dispute resolution proceeding.

§ 11.9.2.3 Records of Reimbursable Expenses, expenses pertaining to Additional Services, and services performed on the basis of hourly rates shall be available to the Owner at mutually convenient times.

ARTICLE 12 SPECIAL TERMS AND CONDITIONS

Special terms and conditions that modify this Agreement are as follows:
(Include other terms and conditions applicable to this Agreement.)

NA

ARTICLE 13 SCOPE OF THE AGREEMENT

§ 13.1 This Agreement represents the entire and integrated agreement between the Owner and the Architect and supersedes all prior negotiations, representations or agreements, either written or oral. This Agreement may be amended only by written instrument signed by both the Owner and Architect.

§ 13.2 This Agreement is comprised of the following documents identified below:

.1 AIA Document B104™-2017, Standard Abbreviated Form of Agreement Between Owner and Architect

.2

(Paragraph deleted)

.3 Exhibits:

(Clearly identify any other exhibits incorporated into this Agreement, including any exhibits identified in Section 4.1.)

Architects Hourly Billing Rates

.4 Other documents:

(List other documents, if any, including additional scopes of service forming part of the Agreement.)

Insurance Certificates

This Agreement entered into as of the day and year first written above.

OWNER (Signature)

John Hollowell Mayor, City of Miles City
(Printed name and title)

ARCHITECT (Signature)

Terral D. Sukut, AIA President, JGA Architects, PC
(Printed name, title, and license number, if required)

RESOLUTION NO. 4411

RESOLUTION ACCEPTING THE DETERMINATION THAT THE ENVIRONMENTAL ASSESSMENTS IN THE MILES CITY WATER SYSTEM PRELIMINARY ENGINEERING REPORT AND THE MILES CITY WATER AND WASTEWATER IMPROVEMENTS PRELIMINARY ENGINEERING REPORT ARE APPROPRIATE FOR THE INTAKE STRUCTURE, MAIN STREET WATER, NORTH MONTANA AVENUE SEWER, INDUSTRIAL PARK WATER AND SEWER, AND FAIRGROUNDS LIFT STATION AND FORCE MAIN PROJECTS

WHEREAS, the City of Miles City has completed assessments to identify potential environmental impacts to the City;

WHEREAS, the draft Environmental Assessments were made available for public comment and the findings were presented and reviewed at a public meeting;

WHEREAS, no substantive public comment was received;

WHEREAS, The City of Miles City has determined that the above projects will not significantly affect the quality of the human environment and accordingly the City of Miles City has determined an EIS is not necessary;

NOW, THEREFORE, BE IT RESOLVED by the Council as follows;

1. That the City of Miles City adopts the final Environmental Assessments, attached hereto as Exhibit "A" and Exhibit "B," for the referenced projects.

SAID RESOLUTION FINALLY PASSED AND ADOPTED BY A DULY CONSTITUTED QUORUM OF THE CITY COUNCIL OF THE CITY OF MILES CITY, MONTANA, AT A DULY CALLED MEETING THIS 25TH DAY OF MAY, 2021.

John Hollowell, Mayor

Preliminary Engineering Report - Agency Information Request
S20-00-048

To whom it may concern:

The attached are maps showing the potential areas involved in the above referenced project. Please reference the letter from our office dated May 7, 2020 and also note that the project also entails a boring of a new 6-inch force main across the Tongue River.

Thank you for any input that may help us in our design and NEPA/MEPA compliance. Please see our address in the footer below. A copy of the original letter sent May 7 is included for ease of reference.

Sincerely,
INTERSTATE ENGINEERING, INC.

A handwritten signature in cursive script, appearing to read 'Patrick Murtagh', with a stylized flourish at the end.

RE: City of Miles City: Phase I – Industrial Park, and Phase I – Replacements
Preliminary Engineering Report - Agency Information Request
S20-00-048

To whom it may concern:

The City of Miles City is currently preparing a Preliminary Engineering Report (PER). The purpose of the PER is to evaluate the existing water and sewer systems, concentrating on known and documented capacity issues, as well as evaluating expansion of services to an existing industrial park that is currently limited in growth due to lack of City services. We are seeking your comments and input regarding any environmental impacts, or other considerations, or requirements you may be aware of. The information provided by your agency will be included in the PER and help in the evaluation of the PER alternatives.

Miles City is located in Eastern Montana at the confluence of the Tongue River and Yellowstone River, along Interstate 94, approximately 140 miles from Billings. Miles City is in Custer County, Montana Range: 47E and Townships: 7N and 8N, or coordinates 46°24'30"N, 105°50'24"W. **The project would include only previously disturbed areas, and is limited to water and sewer line replacements and a new lift station.**

Preliminary alternatives being explored include:

1. Open-trench construction of water and sewer mains
2. Combination of open-trench technology for sewers, such as cured-in-place-pipe (CIPP).
3. Rehabilitation vs replacement of manholes
4. Replacement of the Fairgrounds Lift Station
5. Rehabilitation of the Fairgrounds Lift Station

The locations of potential improvement sites are included on the attached maps, Watermain improvements would include construction in the historical downtown district. Thank you for any input that may help us in our design and NEPA/MEPA compliance. Please see our address in the footer below.

Sincerely,
INTERSTATE ENGINEERING, INC.

RE: City of Miles City: Phase I – Industrial Park, and Phase I – Replacements
Preliminary Engineering Report - Agency Information Request
S20-00-048

To whom it may concern:

The City of Miles City is currently preparing a Preliminary Engineering Report (PER). The purpose of the PER is to evaluate the existing water and sewer systems, concentrating on known and documented capacity issues, as well as evaluating expansion of services to an existing industrial park that is currently limited in growth due to lack of City services. We are seeking your comments and input regarding any environmental impacts, or other considerations, or requirements you may be aware of. The information provided by your agency will be included in the PER and help in the evaluation of the PER alternatives.

Miles City is located in Eastern Montana at the confluence of the Tongue River and Yellowstone River, along Interstate 94, approximately 140 miles from Billings. Miles City is in Custer County, Montana Range: 47E and Townships: 7N and 8N, or coordinates 46°24'30"N, 105°50'24"W. **The project would include only previously disturbed areas, and is limited to water and sewer line replacements and a new lift station.**

Preliminary alternatives being explored include:

1. Open-trench construction of water and sewer mains
2. Combination of open-trench technology for sewers, such as cured-in-place-pipe (CIPP).
3. Rehabilitation vs replacement of manholes
4. Replacement of the Fairgrounds Lift Station
5. Rehabilitation of the Fairgrounds Lift Station

The locations of potential improvement sites are included on the attached maps, Watermain improvements would include construction in the historical downtown district. Thank you for any input that may help us in our design and NEPA/MEPA compliance. Please see our address in the footer below.

Sincerely,
INTERSTATE ENGINEERING, INC.

RE: City of Miles City: Phase I – Industrial Park, and Phase I – Replacements
Preliminary Engineering Report - Agency Information Request
S20-00-048

To whom it may concern:

The City of Miles City is currently preparing a Preliminary Engineering Report (PER). The purpose of the PER is to evaluate the existing water and sewer systems, concentrating on known and documented capacity issues, as well as evaluating expansion of services to an existing industrial park that is currently limited in growth due to lack of City services. We are seeking your comments and input regarding any environmental impacts, or other considerations, or requirements you may be aware of. The information provided by your agency will be included in the PER and help in the evaluation of the PER alternatives.

Miles City is located in Eastern Montana at the confluence of the Tongue River and Yellowstone River, along Interstate 94, approximately 140 miles from Billings. Miles City is in Custer County, Montana Range: 47E and Townships: 7N and 8N, or coordinates 46°24'30"N, 105°50'24"W. The project would include only previously disturbed areas, and is limited to water and sewer line replacements and a new lift station. Some Construction is proposed in a State Road (Main Street) and within that right-of-way.

Preliminary alternatives being explored include:

1. Open-trench construction of water and sewer mains
2. Combination of open-trench technology for sewers, such as cured-in-place-pipe (CIPP).
3. Rehabilitation vs replacement of manholes
4. Replacement of the Fairgrounds Lift Station
5. Rehabilitation of the Fairgrounds Lift Station

The locations of potential improvement sites are included on the attached maps, Watermain improvements would include construction in the historical downtown district. Thank you for any input that may help us in our design and NEPA/MEPA compliance. Please see our address in the footer below.

Dear Mr. Murtagh,

We would like to provide for your consideration the following input on the proposed City of Miles City Wastewater System Improvement project.

- 1) Historic frequency of ice jams on the Tongue River increases the risk of the river downcutting during jam events. Recommend boring depth is a minimum of 20-30 feet below the Tongue River bed or just below bedrock if a layer exists that is shallower than 20-30 feet.
- 2) Fisheries research between 2017-2020 has demonstrated that juvenile and adult pallid sturgeon utilize the Yellowstone River at Miles City. This is new information that needs to be incorporated into the environmental review for this project.

Thank you for including us in this project. If you wish to discuss these comments further, please contact our Regional Fisheries Manager, Mike Backes, at (406) 234-0925 or mibackes@mt.gov.

Sincerely, -

Brad Schmitz
Regional Supervisor, Region 7

Subject: RE: Miles City Projects
Date: Wednesday, May 27, 2020 2:42:09 PM
Attachments: [BOR Annual Report 2019.pdf](#)

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Patrick,

Historically pallid sturgeon were present in the Yellowstone River upstream of Intake Diversion Dam located near Glendive. Anecdotal reports from anglers demonstrated that pallid sturgeon were in the Miles City area through at least the 1950's. Since then pallid sturgeon essentially disappeared from angler catches upstream of Intake Dam. The remnant population, estimated at only 80-100 fish occupy the lower Yellowstone River and Missouri River between the Yellowstone -Missouri River confluence and Lake Sakakawea.

Since then, the only documented adult pallid sturgeon upstream of Intake were in the following years: 1991, 2014, 2016 – 2020. These fish reside downstream of Intake and occasional pass upstream of Intake Dam via the high flow side channel, when river flows exceed 35,000 cubic feet per second. They are stimulated to migrate upstream for spawning purposes April-June and return back to the Yellowstone-Missouri confluence area for the remainder of the year. Spawning migrations of individual fish does not occur every year, most fish are on an every other and some are on a three year cycle. Also, in 2017, as part of the litigation of the Intake Fish Passage Project, the United States Fish and Wildlife Service mandated that the Bureau of Reclamation (owner of Intake Dam) must begin translocating telemetered pallid sturgeon that reach Intake Dam upstream of the dam. Hence the annual frequency of adult fish upstream of the dam since 2017.

As part of pallid sturgeon recovery efforts, stocking of hatchery produced juvenile pallid sturgeon also began in 1998 and continues today. Some of these hatchery fish have been stocked upstream of Intake Dam and some are remaining upstream. Despite the first year of hatchery fish (1998 year-class) being 22 years old in 2020, very few have reached sexual maturity. Being immature, they do not have the impulse to migrate upstream like their parents. It will take another 5-10 years before enough of the hatchery released fish are sexually mature to evaluate if they will spawn upstream of Intake Dam and potentially become a self-supporting population.

Lastly, regarding your request for inspecting the Miles City water intake. As I recall we did not have any concerns for that work because we were informed that the work would look at the fish hatchery water intake as well. Given this understanding we did not provide comments because we assumed our concerns would be included with the hatchery work as the project evolved. If this assumption was incorrect than we should probably include pallid sturgeon language into this project as well. If the work only includes divers inspecting the structure than there isn't any concerns related to pallid sturgeon or the other fish species. If and when a construction project is proposed, pallid sturgeon language is certainly needed to minimize impacts to spawning migrations.

Kenneth M Backes

Subject: [EXTERNAL] Miles City Projects

Brad Schmitz,

Thank you for your response to the request for input on the potential work at Miles City. You mentioned that research between 2017 – 2020 finding juvenile and adult pallid sturgeon in the Yellowstone at Miles City. I have two questions...

First, was their presence not known in the Miles City area prior to that study?

Second, is there a way I can get a copy, or summary of that study so I may mention it in the environmental evaluation of this and other projects?

Lastly, we are also looking at a potential intake project. That would begin, and perhaps end with an inspection by divers of the current in-river portion of the intake and the ice deflector. I sent out requests for comment in November, and I received a detailed (and lengthy) response from USFWP. However, I don't have a record of receiving anything from the State's office. Please let me know if you would like information on that project, though the USFWP response was very thorough.

Thank you,

Pat M.

Dear Mr. Murtagh:

Thank you for your May 7, 2020, letter requesting U.S. Fish and Wildlife Service comment on the proposed subject project in Miles City, Montana.

The U.S. Fish and Wildlife Service reviewed your letter. Based on the information provided, we have no comments regarding federally-listed or proposed threatened or endangered species or other trust species. Additional information regarding listed species that may occur within the project footprint may be obtained using the IPaC project-planning tool, which streamlines the USFWS environmental review process at <https://ecos.fws.gov/ipac/>.

Thank you for the opportunity to comment. If you have any questions or comments about this correspondence please contact Jess Davies at jess_davies@fws.gov or 406-449-5225, extension 214.

ENVIRONMENTAL REVIEW CHECKLIST

NOTE: The environmental review checklist is also available in the *Uniform Application for Montana Public Facility Projects, Twelfth Edition*. The applicant can use either form, but must include a completed checklist with TSEP application materials and all other environmental documents identified in Appendix C of this document.

NAME OF PROJECT:	Miles City Water and Sewer System Improvements
PROPOSED ACTION:	Construct approximate 30,000 feet of water and sewer main, including a 6-inch force main drilled under the Tongue River and boring under a private rail line.
LOCATION:	Miles City, Montana

Key Letter:	
N: No Impact; B: Potentially Beneficial; A: Potentially Adverse; P: Approval/Permits Required; M: Mitigation Required	
PHYSICAL ENVIRONMENT	
Key	1
N	Soil Suitability, Topographic and/or Geologic Constraints (e.g., soil slump, steep slopes, subsidence, seismic activity)
	<i>Response and source of information:</i>
	Soils have been researched for the project where pipe will be added or replaced. The main concern with soils is that much of the City sits atop an alluvial fan, and dewatering will be a cost (include in costs per foot of pipe). Plastic pipe will be placed where cast iron pipe is removed, as will be the norm for all water and sewer. Slopes are only nearly flat. <i>Sources: NRCS websites (USDA information)</i>
Key	2
N	Hazardous Facilities (e.g., power lines, hazardous waste sites, acceptable distance from explosive and flammable hazards including chemical/petrochemical storage tanks, underground fuel storage tanks, and related facilities such as natural gas storage facilities & propane storage tanks)
	<i>Response and source of information:</i>
	Due to the age of long standing businesses in the area, the project will need to include provisions for dealing with the high potential to find undocumented LUST sites. A list of sites is included in Appendix A. <i>Sources: Montana DEQ Website: http://deq.mt.gov/Land/lust/lustsites as of Jan 2020</i>
Key	3
N	Effects of Project on Surrounding Air Quality or Any Kind of Effects of Existing Air Quality on Project (e.g., dust, odors, emissions)
	<i>Response and source of information:</i>

		No significant impact to air quality is anticipated at the construction sites. Dust control is to be discussed and pursued through the contract documents. <i>Source: Based on Previous contract documents prepared by the engineer and Montana Public Works Standard Specifications (MPWSS).</i>
Key	4	Groundwater Resources & Aquifers (e.g., quantity, quality, distribution, depth to groundwater, sole source aquifers)
		<i>Response and source of information:</i>
B		Groundwater Resources are benefited by arresting leakage from the sewer lines scheduled for replacement. Similarly, the continued leakage from the cast iron pipe will be eliminated as that pipe is replaced with PVC pipe. Reduction of leakage lessens the water demand from the Yellowstone River (one recent leak repair saved the City over 100,000 gallons of water production per day). <i>Source: PER</i>
Key	5	Surface Water/Water Quality, Quantity & Distribution (e.g., streams, lakes, storm runoff, irrigation systems, canals)
		<i>Response and source of information:</i>
N		Surface water quality is not impacted by the project in the long term, other than a savings of water by arresting leakage in the old cast iron pipe. A General Permit for Stormwater Discharges Associated with Construction Activity is required for construction activities. This is provided to protect surface waters from excessive, or sediment-filled, run-off. Additional study is needed to examine the best means of eliminating storm water from entering the sewer system via roof drain lines along the Main Street Alley. That would be addressed in a second phase. <i>Source: Montana DEQ > Water > StormWater > StormSystems</i>
Key	6	Floodplains & Floodplain Management (Identify any floodplains within one mile of the boundary of the project.)
		<i>Response and source of information:</i>
B		Much of the work at the industrial park and along Main Street would be in a floodplain. The project is beneficial to floodplain management by eliminating septic fields currently within the floodplain. <i>Source: FIRM Maps (see Appendix)</i>
Key	7	Wetlands Protection (Identify any wetlands within one mile of the boundary of the project.)
		<i>Response and source of information:</i>

N		Wetlands are not located at any of the sites, including the areas where the drilling operation will be set up. <i>Source: NRCS website (see Appendix for Land Usage and Wetlands map).</i>
Key	8	Agricultural Lands, Production, & Farmland Protection (e.g., grazing, forestry, cropland, prime or unique agricultural lands) (Identify any prime or important farm ground or forest lands within one mile of the boundary of the project.)
N		<p><i>Response and source of information:</i></p> <p>There are no prime or irrigated farmlands impacted by the project. The pipeline improvements are in urban, previously developed areas. <i>Source: NRCS website (see appendix for Land Usage and Wetlands map).</i></p>
Key	9	Vegetation & Wildlife Species & Habitats, including Fish and Sage Grouse (e.g., terrestrial, avian and aquatic life and habitats)
N		<p><i>Response and source of information:</i></p> <p>A detailed printout of area species of concern was obtained from the Montana Natural Heritage website for the Miles City area. Most of the species listed were of riparian or water habitat and away from the project. The project is completely out of the sage grouse habitats or protected areas and since all work will be in previously disturbed areas and rights of ways, no significant impact is anticipated. <i>Source: NRCS, See the Appendix A of the PER for maps.</i></p>
Key	10	Unique, Endangered, Fragile, or Limited Environmental Resources, Including Endangered Species (e.g., plants, fish, sage grouse or wildlife)
N		<p><i>Response and source of information:</i></p> <p>No endangered species were found in the area based on a search of the <i>Montana Natural Heritage website and mapbuilder. See also the PER appendix for a list of Species of Concern (SOC) in the Miles City area.</i></p>
Key	11	Unique Natural Features (e.g., geologic features)
N		<p><i>Response and source of information:</i></p> <p>Considering that the project will be entirely within previously disturbed areas and City or State Rights-of-way, no unique features would be expected to be influenced by the project. <i>Montana Natural Heritage. See also the PER appendix.</i></p>
Key	12	

N		Access to, and Quality of, Recreational & Wilderness Activities, Public Lands and Waterways, and Public Open Space
		<i>Response and source of information:</i>
		Access to recreation, public lands, etc. will not be impacted by the project. <i>Source: comparison of project maps with Park locations</i>
HUMAN ENVIRONMENT		
Key	1	Visual Quality – Coherence, Diversity, Compatibility of Use and Scale, Aesthetics
B		<i>Response and source of information:</i>
		Visual quality of the area would not be impacted by any portion of the project since all improvements will be with objects buried. <i>Source: Photographs in the PER.</i>
Key	2	Nuisances (e.g., glare, fumes)
N		<i>Response and source of information:</i>
		No nuisances are anticipated other than potential for dust production. Dust control would be required by the contract documents. <i>Source: Based on Previous contract documents prepared by the engineer and Montana Public Works Standard Specifications (MPWSS).</i>
Key	3	Noise -- suitable separation between noise sensitive activities (such as residential areas) and major noise sources (aircraft, highways & railroads)
N		<i>Response and source of information:</i>
		Noise is part of any construction project. To protect the public from noise, specific hours of construction will be included in the contract documents. <i>Source: Based on Previous contract documents prepared by the engineer and Montana Public Works Standard Specifications (MPWSS).</i>
Key	4	Historic Properties, Cultural, and Archaeological Resources
N		<i>Response and source of information:</i>
		Work in Main Street would be in the vicinity of historic properties, but completed within the City or State Right-of-Way. No historic properties are anticipated to be impacted by the project (the State Historic and Preservation Society was contacted), and a formal cultural resource survey

		was not warranted. <i>Source: Correspondence with the State Historical and Preservation Office.</i>
Key	5	Changes in Demographic (population) Characteristics (e.g., quantity, distribution, density)
		<i>Response and source of information:</i>
N		The project will allow for normal changes in demographic characteristics. The PER details the boom-bust cycles and recommends improvements necessary to deal with realistic growth if another boom were to occur. However, it also considers the current downturn cycle when calculating long-term distribution of costs. The improvement will not change the characteristics, but will allow the City to deal with changes as they occur. <i>Source: PER</i>
Key	6	General Housing Conditions - Quality, Quantity, Affordability
		<i>Response and source of information:</i>
N		No changes in housing are required. <i>Source: PER.</i>
Key	7	Displacement or Relocation of Businesses or Residents
		<i>Response and source of information:</i>
N		No displacement of businesses or residents is required or anticipated. The improvements will allow for expansion and sustainability of business in the industrial park and in the business district. <i>Source: PER and 2017 Capacity Study.</i>
Key	8	Public Health and Safety
		<i>Response and source of information:</i>
B		Public health and safety are enhanced by the project by preventing build-up of bacteria within the tuberculated regions of the old cast iron pipe, enhancing a woefully inadequate fire protection availability, and eliminating leakage of sewage into the groundwater and eliminating back-ups of sewage to residences along Montana Avenue. <i>Source: PER Findings, conversations with the Fire Chief.</i>
Key	9	Lead Based Paint and/or Asbestos
		<i>Response and source of information:</i>

N		<p>No Lead based paint is anticipated to be dealt with on the project. No asbestos is anticipated to be found with the exception of the final portion of the waterline replacement in N Montana Avenue, which includes some 6-inch asbestos cement pipe. That pipe is common, but disposal needs to include placement of the AC pip in plastic prior to removal to a landfill. If the pipe is outside of the replacement pipe trench it may be left in place undisturbed. AC pipe is only a threat when it is broken. <i>Source: PER, conversations with the DEQ.</i></p>
Key	10	<p>Local Employment & Income Patterns - Quantity and Distribution of Employment, Economic Impact</p> <p><i>Response and source of information:</i></p> <p>Local employment can be protected by ensuring a sound, safe, long-term water system, and especially by providing a sewer system since no businesses can be established at the industrial park since septic systems can't be approved in a floodplain. Furthermore, fire protection is woefully inadequate for the downtown business district. With the sewer lines downstream of the business district literally overflowing at times, the City cannot allow additional businesses along Main Street until that line is upsized.</p> <p>A very big concern is the imminent failure of the force main that carries all sewage from the fairgrounds an all businesses across the Tongue River. Failure of that line by scouring would be a complete disaster, especially if it occurred during the Bucking Horse Sale, which unfortunately coincides with the highest river flows and worst time for scouring. <i>Source: PER, River crest data (Appendix G) and 2017 Capacity Study.</i></p>
B		
Key	11	<p>Local & State Tax Base & Revenues</p> <p><i>Response and source of information:</i></p> <p>See response to item 10, which is all applicable to this item 11. This project is essential for sustaining an expanding tax base. <i>Source: PER and 2017 Capacity Study.</i></p>
B		
Key	12	<p>Educational Facilities - Schools, Colleges, Universities</p> <p><i>Response and source of information:</i></p> <p>The project will provide better protection for the schools, best ensuring that there is plenty of water and sewer capacity, even in the next "boom" cycle. <i>Source: PER and 2017 Capacity Study.</i></p>
B		
Key	13	<p>Commercial and Industrial Facilities - Production & Activity, Growth or Decline.</p> <p><i>Response and source of information:</i></p>

B		Currently the region is declining in oil production, but the City has been remarkably resilient. It is a stable City and can provide services needed for companies and individuals working with the maintenance of oil facilities installed during the boom. With the improvements, the City will also be ready for the next boom, should one occur. <i>Source: PER, Census Figures and Estimates and 2017 Capacity Study.</i>
Key	14	Health Care – Medical Services
		<i>Response and source of information:</i>
N		Health care is not directly impacted by the project. The project does provide for a safer environment and a sound water distribution system is important in the prevention of water-borne disease outbreaks. <i>Source: PER</i>
Key	15	Social Services – Governmental Services (e.g., demand on)
		<i>Response and source of information:</i>
N		No new governmental services are developed or are anticipated as needed beyond assistance with grant and loan administration. <i>Source: Engineer’s personal experience.</i>
Key	16	Social Structures & Mores (Standards of Social Conduct/Social Conventions)
		<i>Response and source of information:</i>
N		No significant change in social structures & mores are anticipated as a result of the project. Costs of the project are distributed using base rates subjected to service line sized (equivalent dwelling units), and actual water use is metered throughout the system. <i>Source: PER</i>
Key	17	Land Use Compatibility (e.g., growth, land use change, development activity, adjacent land uses and potential conflicts)
		<i>Response and source of information:</i>
N		Land use will not significantly change, though opportunity for new businesses to enter the industrial park will be a direct result. <i>Source: PER, City</i>
Key	18	Energy Resources - Consumption and Conservation
		<i>Response and source of information:</i>
B		The project will allow for reduced water leakage, and accordingly less water is required to be pumped and treated. There is a net decrease in energy consumption for the system by increasing the size of the force main (tripling lift station capacity while nearly doubling the efficiency of the existing pumps). <i>Source: PER, lift station design and pump curves</i>

Key	19	Solid Waste Management
		<i>Response and source of information:</i>
N		No significant increase is expected in solid waste produced. Most equipment for pipeline and water storage facilities does not come with packaging. The construction sites will be required to be kept clean with solid waste disposed of at a landfill (an on-site resident project observer will assist with informing any superintendent of any solid waste related issue). <i>Source: Engineer's personal experience with water construction projects.</i>
Key	20	Wastewater Treatment - Sewage System
		<i>Response and source of information:</i>
N		No change in wastewater treatment will be required by the project, and no increase in wastewater production is anticipated to occur as a result of this project. <i>Source: PER</i>
Key	21	Storm Water – Surface Drainage
		<i>Response and source of information:</i>
N		No long-term change in stormwater production or patterns is anticipated to result from the project. During construction the contractor will be required to maintain erosion control practices according to the general stormwater discharge permit associated with the project. <i>Source: Engineer's personal experience with water system construction projects.</i>
Key	22	Community Water Supply
		<i>Response and source of information:</i>
B		The project will significantly enhance the existing community water supply by providing a very long-term solution to the failing water lines (10 – 15 leaks/breaks per year). The PER was based on a 20-year life cycle cost, but the pipelines are anticipated to actually last 60 – 100 years, and the PVC pipe likely even longer with little to no maintenance. <i>Source: PER economic analysis.</i>
Key	23	Public Safety – Police
		<i>Response and source of information:</i>
N		The project is not anticipated to have any impact on police.
Key	24	Fire Protection – Hazards
		<i>Response and source of information:</i>

B		The project will greatly enhance fire protection by raising the available water from about 500 – 600 gpm at some downtown business district hydrants to several thousand gpm at all hydrants. <i>Source: PER, conversations with the fire chief, 2017 Capacity Study.</i>
Key	25	Emergency Medical Services
N		<p><i>Response and source of information:</i></p> <p>Emergency medical services are not impacted by the project, though traffic control along Main Street will have to account for the passage of emergency medical vehicles.. <i>Source: PER Maps</i></p>
Key	26	Parks, Playgrounds, & Open Space
N		<p><i>Response and source of information:</i></p> <p>Parks and playgrounds are not directly impacted by the project. <i>Source: PER Maps.</i></p>
Key	27	Cultural Facilities, Cultural Uniqueness & Diversity
N		<p><i>Response and source of information:</i></p> <p>Work on the water system is blind to race, creed or color, and all customers are treated equally. The water system unfortunately does not enhance cultural diversity or uniqueness. <i>Source: PER</i></p>
Key	28	Transportation Networks and Traffic Flow Conflicts (e.g., rail; auto including local traffic; airport runway clear zones - avoidance of incompatible land use in airport runway clear zones)
B		<p><i>Response and source of information:</i></p> <p>Transportation is enhanced by the elimination of leaks that often are repaired during the winter. This can lead to ice on roads and a hazardous condition for drivers and pedestrians. While the project does not directly improve traffic patterns, it does lessen the chance of ice on the roads in town. <i>Source: PER</i></p>
Key	29	Consistency with Local Ordinances, Resolutions, or Plans (e.g., conformance with local comprehensive plans, zoning, or capital improvement plans)
N		<i>Response and source of information:</i>

		The proposed project is completely consistent with the priorities of the City. <i>Source: PER, Meetings with City personnel.</i>
Key	30	Is There a Regulatory Action on Private Property Rights as a Result of this Project? (consider options that reduce, minimize, or eliminate the regulation of private property rights.)
		<i>Response and source of information:</i>
N		There are no regulatory actions involved with any private property as a result of this project or leading up to the project. <i>Source: PER, conversations with City personnel.</i>

Environmental Review Form

On a separate piece of paper, please answer the following as they apply to your proposed project:

1. **Alternatives:** Describe reasonable alternatives to the project.

2. **Mitigation:** Identify any enforceable measures necessary to reduce any impacts to an insignificant level.

3. **Is an EA or Environmental Impact Statement (EIS) required?** Describe whether or not an EA or EIS is required and explain in detail why or why not.

4. **Public Involvement:** Describe the process followed to involve the public in the proposed project and its potential environmental impacts. Identify the public meetings -- where and when -
- the project was considered and discussed, and when the applicant approved the final environmental assessment.

5. **Person(s) Responsible for Preparing:** Identify the person(s) responsible for preparation of this checklist.

6. **Other Agencies:** List any state, local, or federal agencies that have over-lapping or additional jurisdiction or environmental review responsibility for the proposed action and the permits, licenses, and other authorizations required; and list any agencies or groups that were contacted or contributed information to this Environmental Assessment (EA).

Environmental Review Form – Responses

This form is to be attached to the signed Environmental Review Form as provided in the Treasure State Endowment Program Application Guidelines.

#1 Alternatives: Describe reasonable alternatives to the project

Alternatives for Water and Sewer Pipe Materials/Construction

1. Do Nothing
2. CIPP
3. Ductile Iron
4. Pipe Bursting
5. HDD
6. PVC

The PER finds that the old cast iron pipe was responsible for all leaks and subsequent repairs over the past several years (10-15/yr), and the frequency had been increasing. Health issues associated with the tuberculation of the old cast iron pipe and woefully inadequate fire protection in the downtown business and historic districts led to the conclusion that the 110-year old cast iron pipe needs to be replaced, especially in Main Street. Back-ups of sewage along N Montana Avenue due to undersized trunk lines, and the imminent failure of the Tongue River force main crossing, and the unacceptability of septic fields in the industrial park area (in the floodplain), led to the elimination of the Do nothing alternative.

Cured-in-place-pipe (CIPP) is the least-cost, least-impact alternative. However, due to the need to upsize the line and correct the slopes in N Montana Avenue, it is not appropriate for that work. However, it is anticipated to be the method of choice for the sewer within the alley behind Main street (Schedule 6) though that work will require more study prior to moving to final design.

Ductile iron pipe was found as an appropriate alternative for waterline replacement, though AWWA C:900 PVC is the least cost and easiest material for handling. ASTM-rated pipe was found best for new sewer main.

Pipe bursting was not found to be a good candidate for the waterline replacement since the pipe replacement would be considerably larger than the pipe to be “burst”. The lack of slopes eliminated it from consideration for sewer lines.

Horizontal Directional Drilling was found to be the best method to install the new force main across the Tongue River. This was recently done for the waterline that scoured out just a few hundred feet downstream of the shallow-bury 4-inch force main.

PVC was found to be the pipe of choice for both water and sewer. However, ductile iron should be considered an appropriate substitute if desired by the contractor and proper corrosion protection is provided.

Alternatives for the Lift Station and Force Main

1. Do Nothing, or upsize the lift station and leave the existing force main
2. New Lift Station and New 4-inch force main.
3. New 6-inch force main, minor improvements to the lift station

As noted earlier, the existing force main is buried in loose gravels and silt deposits only 4-feet or less below the river water. A similarly placed waterline scoured out and had to be replaced in 2017. The force main is the only connection to the City southwest of the Tongue River, including the Fairgrounds where the Bucking Horse Sale is centered. The importance of that line and its imminent failure make its replacement essential to the City. Accordingly, the first alternative was eliminated.

Review of the Fairground lift station (also referred to as the Range Rider Museum Lift Station) show that the pumps are not proper for use with a 4-inch force main. The existing pumps are severely limited and the collection system must surcharge to provide sufficient pressure to the pumps when flows are high, such as during the week of the Bucking Horse Sale. To meet the current demands without surcharging and to meet future demands as the industrial park expands, it is necessary to upsize the force main. Use of VFDs are included, but the pumps do not need to be changed when the 6-inch force main is used. Accordingly, a 6-inch force main is recommended.

Based on the findings above, it was not necessary to construct a “Decision Matrix” since there were not viable alternatives besides the replacement of the lines, and use of a force main smaller than 6-inches was eliminated from consideration.

In summary, the following improvements are recommended by the PER as shown in Figures ES-1 and ES-2, and have been evaluated in the Environmental Checklist/Assessment:

The schedules mentioned in Table ES-1 (Schedules 1 – 5) are also included individually and with detail in the text within Section 4 of the PER, and in Appendix B of that PER.

Table ES-1 Cost and Timeline Summary Phase 1 (Schedules 1 – 5)			
Schedule/Description	Cost	Construction Time if Done Alone	Combined w/Previous Schedules
Sch 1 Industrial Park	\$2,027,000	2 Months	-
Sch 2 6" FM w/ HDD	\$893,000	1 Month	2.5 Months
Sch 3 N. MT Ave Sewer	\$3,996,000	3 Months	5 Months
Sch 4 N. MT Ave Water	\$2,886,000	3 Months	6 Months
Sch 5 Main St Water	\$2,832,000	3 Months	8 Months + Break
Total:	\$12,634,000		
<i>Additional study for Schedules 6 and 7, Main Street Alley Sewer and Storm Drain should commence as soon as possible to determine best routing and outfall solution.</i>			

The total cost for Schedules 1 – 5 is considerable for a City with limited financial resources. For this reason, the cost and timeline for construction are presented for the projects separately or jointly. The order of schedules coincides with the priority this report gives to each improvement, though Schedules 1 and 2 must be completed concurrently. Table ES-2 provides approximate costs for additional work for the sewer line in the alley behind Main Street and storm drainage work anticipated to be needed to remove roof drains from the sanitary sewer system. Work on this Second Phase should not be completed prior to additional study as recommended within the PER.

Schedule/Description	Cost	Time if Alone	Combined w/Previous Schedules
Sch 6 Main St Alley Sewer*	\$1,789,000	1.5 Months	
Sch 7 Main Street Alley Storm Drain*	\$2,026,000	2.5 Months	3.5 Months
Total	\$3,815,000		

Life Cycle Costs for the Schedules above are provided in the PER with and without consideration of Salvage Value.

#2 Mitigation

During the completion of the Environmental Checklist, a search was conducted using the Montana Natural Heritage website. The following was concluded:

The project did not include any areas of known grouse habitat.

No work would be in riparian areas (see maps attached for Land Use and Wetlands).

After review of the Montana Natural Heritage Program Website and downloading Species of Concern (SOC) and considering that all work would be within existing City or State Rights-of-Way, no mitigation was found necessary for the project.

#3 Is an EA or Environmental Impact Statement (EIS) Requested?

Due to lack of presence of wetlands, and noting that all work would be within existing rights-of-ways and in previously disturbed areas, impacts are found to not be significant, and accordingly, a full EIS was not found to be required.

#4 Public Involvement

The EA was advertised as available for public review on ____ and a hearing for the EA conducted on XXXXXX, 2020 _____. The project was explained in detail at each hearing

including options, costs and the process used to determine that there was no significant impact associated with the project.

#5 Person(s) Responsible for Preparing

The Environmental Review was conducted by Interstate Engineering, led by Patrick Murtagh, PE. Murtagh prepared the checklist. An EA will likely be done by the State DEQ as part of its Drinking Water SRF requirements.

#6 Other Agencies

As noted above, an additional EA will likely be conducted by the State DEQ as part of the DWSRF process.

The Department of Commerce and the US Census was used in determining population history and for developing anticipated growth. Many environmental agencies were contacted as part of this assessment and information from websites hosted by the Montana Natural Heritage Program and the NRCS (with USDA) was used extensively.

Responses from the State Historical and Preservation Office indicated that a full cultural resource inventory would not be required. However, in that correspondence notes many previous cultural resource inventories for the range of this project.

Other agencies contacted, but not noting concern or for whom no response was found included: DIC, DEQ, DFWP, DOLI, DNRC, MDT, BLM, FAA, NPS, OSHA, USEPA, and USFWS.

Environmental Review Form – Responses

This form is to be attached to the signed Environmental Review Form as provided in the Treasure State Endowment Program Application Guidelines.

#1 Alternatives: Describe reasonable alternatives to the project

Alternatives for Water and Sewer Pipe Materials/Construction

1. Do Nothing
2. CIPP
3. Ductile Iron
4. Pipe Bursting
5. HDD
6. PVC

The PER finds that the old cast iron pipe was responsible for all leaks and subsequent repairs over the past several years (10-15/yr), and the frequency had been increasing. Health issues associated with the tuberculation of the old cast iron pipe and woefully inadequate fire protection in the downtown business and historic districts led to the conclusion that the 110-year old cast iron pipe needs to be replaced, especially in Main Street. Back-ups of sewage along N Montana Avenue due to undersized trunk lines, and the imminent failure of the Tongue River force main crossing, and the unacceptability of septic fields in the industrial park area (in the floodplain), led to the elimination of the Do nothing alternative.

Cured-in-place-pipe (CIPP) is the least-cost, least-impact alternative. However, due to the need to upsize the line and correct the slopes in N Montana Avenue, it is not appropriate for that work. However, it is anticipated to be the method of choice for the sewer within the alley behind Main street (Schedule 6) though that work will require more study prior to moving to final design.

Ductile iron pipe was found as an appropriate alternative for waterline replacement, though AWWA C:900 PVC is the least cost and easiest material for handling. ASTM-rated pipe was found best for new sewer main.

Pipe bursting was not found to be a good candidate for the waterline replacement since the pipe replacement would be considerably larger than the pipe to be “burst”. The lack of slopes eliminated it from consideration for sewer lines.

Horizontal Directional Drilling was found to be the best method to install the new force main across the Tongue River. This was recently done for the waterline that scoured out just a few hundred feet downstream of the shallow-bury 4-inch force main.

PVC was found to be the pipe of choice for both water and sewer. However, ductile iron should be considered an appropriate substitute if desired by the contractor and proper corrosion protection is provided.

Alternatives for the Lift Station and Force Main

1. Do Nothing, or upsize the lift station and leave the existing force main
2. New Lift Station and New 4-inch force main.
3. New 6-inch force main, minor improvements to the lift station

As noted earlier, the existing force main is buried in loose gravels and silt deposits only 4-feet or less below the river water. A similarly placed waterline scoured out and had to be replaced in 2017. The force main is the only connection to the City southwest of the Tongue River, including the Fairgrounds where the Bucking Horse Sale is centered. The importance of that line and its imminent failure make its replacement essential to the City. Accordingly, the first alternative was eliminated.

Review of the Fairground lift station (also referred to as the Range Rider Museum Lift Station) show that the pumps are not proper for use with a 4-inch force main. The existing pumps are severely limited and the collection system must surcharge to provide sufficient pressure to the pumps when flows are high, such as during the week of the Bucking Horse Sale. To meet the current demands without surcharging and to meet future demands as the industrial park expands, it is necessary to upsize the force main. Use of VFDs are included, but the pumps do not need to be changed when the 6-inch force main is used. Accordingly, a 6-inch force main is recommended.

Based on the findings above, it was not necessary to construct a “Decision Matrix” since there were not viable alternatives besides the replacement of the lines, and use of a force main smaller than 6-inches was eliminated from consideration.

In summary, the following improvements are recommended by the PER as shown in Figures ES-1 and ES-2, and have been evaluated in the Environmental Checklist/Assessment:

The schedules mentioned in Table ES-1 (Schedules 1 – 5) are also included individually and with detail in the text within Section 4 of the PER, and in Appendix B of that PER.

Table ES-1 Cost and Timeline Summary Phase 1 (Schedules 1 – 5)			
Schedule/Description	Cost	Construction Time if Done Alone	Combined w/Previous Schedules
Sch 1 Industrial Park	\$2,027,000	2 Months	-
Sch 2 6" FM w/ HDD	\$893,000	1 Month	2.5 Months
Sch 3 N. MT Ave Sewer	\$3,996,000	3 Months	5 Months
Sch 4 N. MT Ave Water	\$2,886,000	3 Months	6 Months
Sch 5 Main St Water	\$2,832,000	3 Months	8 Months + Break
Total:	\$12,634,000		
<i>Additional study for Schedules 6 and 7, Main Street Alley Sewer and Storm Drain should commence as soon as possible to determine best routing and outfall solution.</i>			

The total cost for Schedules 1 – 5 is considerable for a City with limited financial resources. For this reason, the cost and timeline for construction are presented for the projects separately or jointly. The order of schedules coincides with the priority this report gives to each improvement, though Schedules 1 and 2 must be completed concurrently. Table ES-2 provides approximate costs for additional work for the sewer line in the alley behind Main Street and storm drainage work anticipated to be needed to remove roof drains from the sanitary sewer system. Work on this Second Phase should not be completed prior to additional study as recommended within the PER.

Schedule/Description	Cost	Time if Alone	Combined w/Previous Schedules
Sch 6 Main St Alley Sewer*	\$1,789,000	1.5 Months	
Sch 7 Main Street Alley Storm Drain*	\$2,026,000	2.5 Months	3.5 Months
Total	\$3,815,000		

Life Cycle Costs for the Schedules above are provided in the PER with and without consideration of Salvage Value.

#2 Mitigation

During the completion of the Environmental Checklist, a search was conducted using the Montana Natural Heritage website. The following was concluded:

The project did not include any areas of known grouse habitat.

No work would be in riparian areas (see maps attached for Land Use and Wetlands).

After review of the Montana Natural Heritage Program Website and downloading Species of Concern (SOC) and considering that all work would be within existing City or State Rights-of-Way, no mitigation was found necessary for the project.

#3 Is an EA or Environmental Impact Statement (EIS) Requested?

Due to lack of presence of wetlands, and noting that all work would be within existing rights-of-ways and in previously disturbed areas, impacts are found to not be significant, and accordingly, a full EIS was not found to be required.

#4 Public Involvement

The EA was advertised as available for public review on ____ and a hearing for the EA conducted on XXXXXX, 2020 _____. The project was explained in detail at each hearing

including options, costs and the process used to determine that there was no significant impact associated with the project.

#5 Person(s) Responsible for Preparing

The Environmental Review was conducted by Interstate Engineering, led by Patrick Murtagh, PE. Murtagh prepared the checklist. An EA will likely be done by the State DEQ as part of its Drinking Water SRF requirements.

#6 Other Agencies

As noted above, an additional EA will likely be conducted by the State DEQ as part of the DWSRF process.

The Department of Commerce and the US Census was used in determining population history and for developing anticipated growth. Many environmental agencies were contacted as part of this assessment and information from websites hosted by the Montana Natural Heritage Program and the NRCS (with USDA) was used extensively.

Responses from the State Historical and Preservation Office indicated that a full cultural resource inventory would not be required. However, in that correspondence notes many previous cultural resource inventories for the range of this project.

Other agencies contacted, but not noting concern or for whom no response was found included: DIC, DEQ, DFWP, DOLI, DNRC, MDT, BLM, FAA, NPS, OSHA, USEPA, and USFWS.

Miles City/Custer County Species of Concern as Noted By the Montana Heritage Program

Species_SubGroup	Species_Sc_Name	S_Com_Name	Family_Sc_Name	Family_Com_Name	G_Rank	S_Rank	USES	MT_Status	ELCODE	Short_Habitat
Mammals (Mamm)	Chaetodipus hispidus	Hispid Pocket Mouse	Heteromyidae	Pocket Mice / Kangaroo Rats	G5	S4		PSOC	AMAFD05050	Mixed grassland dry forest
Mammals (Mamm)	Erethizon dorsatum	Porcupine	Erethizontidae	Porcupines	G5	S4		PSOC	AMAFJ01010	Mixed forest
Mammals (Mamm)	Euderma maculatum	Spotted Bat	Vespertilionidae	Bats	G4	S3		SOC	AMACC07010	Cliffs with rock crevices
Mammals (Mamm)	Lepus californicus	Black-tailed Jack Rabbit	Leporidae	Rabbits	G5	SU		PSOC	AMAFB03050	Sagebrush grassland
Mammals (Mamm)	Marmota flaviventris	Hoary Marmot	Sciuridae	Squirrels	G5	S3S4		PSOC	AMAFB03040	Alpine / Subalpine slopes
Mammals (Mamm)	Myotis yumanensis	Yuma Myotis	Vespertilionidae	Bats	G5	S3		SOC	AMACC01020	Riparian and mixed forest
Mammals (Mamm)	Perognathus parvus	Columbia Plateau Pocket	Heteromyidae	Pocket Mice / Kangaroo Rats	G5	S3		SOC	AMAFD01100	Sagebrush / grassland
Mammals (Mamm)	Spilogale gracilis	Western Spotted Skunk	Mephitidae	Skunks	G5	SU		PSOC	AMAFJ05020	Riparian shrub
Mammals (Mamm)	Tamias umbrinus	Uinta Chipmunk	Sciuridae	Squirrels	G5	SU		PSOC	AMAFB02190	High elevation conifer forest
Mammals (Mamm)	Thomomys idahoensis	Idaho Pocket Gopher	Geomysidae	Pocket Gophers	G4	S2S4		PSOC	AMAFD01070	Open habitat / generalist
Mammals (Mamm)	Urocyon v. arizonae	Arizona Ground Squirrel	Sciuridae	Squirrels	G5	S3S4		PSOC	AMAFB05050	Open grassy edges
Mammals (Mamm)	Zapus hudsonius	Meadow Jumping Mouse	Dipodidae	Jumping Mice	G5	SU		PSOC	AMAFH01010	Riparian and moist grassland
Birds (Aves)	Aegolius funereus	Boreal Owl	Strigidae	Owls	G5	S3S4	MBTA	PSOC	ABNSB15010	Conifer forest
Birds (Aves)	Bucephala islandica	Goldeneye	Anatidae	Swans / Geese / Ducks	G5	S4	MBTA	PSOC	ABNJB18020	Mountain Lakes and Wetlands
Birds (Aves)	Chaetura pelagica	Chimney Swift	Apodidae	Swifts	G4G5	S3S4B	MBTA	PSOC	ABNUA03010	Chimneys, caves, hollow trees
Birds (Aves)	Coccyzus americanus	Yellow-billed Cuckoo	Cuculidae	Cuckoos	G5	S3B	PS; LT; MBTA; BC	SOC	ABNRB02020	Prairie riparian forest
Birds (Aves)	Coccyzus erythrophthalmus	Black-billed Cuckoo	Cuculidae	Cuckoos	G5	S3B	MBTA; BCC11; BC	SOC	ABNRB02010	Riparian forest
Birds (Aves)	Cypseloides niger	Black Swift	Apodidae	Swifts	G4	S1B	MBTA; BCC10	SOC	ABNUA01010	Waterfalls
Birds (Aves)	Lagopus leucurus	White-tailed Ptarmigan	Phasianidae	Upland Game Birds	G5	S3		SOC	ABNLC10030	Alpine
Birds (Aves)	Leucosticte tephrocyanus	Gray-crowned Rosy-Fin	Fringillidae	Finches	G5	S2B, S5N	MBTA	SOC	ABPBY02030	Alpine
Birds (Aves)	Lophodytes cucullatus	Hooded Merganser	Anatidae	Swans / Geese / Ducks	G5	S4	MBTA	PSOC	ABNJ620010	Rivers, Riparian/Wetland
Birds (Aves)	Megascops kennicottii	Western Screech-Owl	Strigidae	Owls	G4G5	S3S4	MBTA	PSOC	ABNSB01040	Riparian forest
Birds (Aves)	Phalaenoptilus nuttallii	Common Poorwill	Caprimulgidae	Nightjars	G5	S4B	MBTA	PSOC	ABNTA04010	Shrub grassland
Birds (Aves)	Selasphorus platycercus	Broad-tailed Hummingbird	Trochilidae	Hummingbirds	G5	S4B	MBTA	PSOC	ABNUC51010	Montane shrublands / woodlands
Birds (Aves)	Strix nebulosa	Great Gray Owl	Strigidae	Owls	G5	S3	MBTA	SOC	ABNSB12040	Conifer forest near open meadows
Birds (Aves)	Surnia ulula	Northern Hawk Owl	Strigidae	Owls	G5	S3	MBTA	SOC	ABNSB07010	Conifer forest
Reptiles (Reptilia)	Chelydra serpentina	Snapping Turtle	Chelydridae	Snapping Turtles	G5	S3		SOC	ARAB01010	Frairie rivers and streams
Reptiles (Reptilia)	Elgaria coenolea	Northern Alligator Lizard	Anguillidae	Alligator Lizards	G5	S3		SOC	ARACB01010	Talus slopes / rock outcrops
Reptiles (Reptilia)	Heterodon nasicus	Plains Hog-nosed Snake	Colubridae	Colubrid Snakes	G5	S2		SOC	ARADB17013	Friable soils
Reptiles (Reptilia)	Ophedrys vernalis	Smooth Greensnake	Colubridae	Colubrid Snakes	G5	S2		SOC	ARADB47010	Wetlands
Reptiles (Reptilia)	Phrynosoma douglasii	Pygmy Short-horned Lizard	Phrynosomatidae	Sagebrush / Spiny Lizards	G5	SU		PSOC	ARACF12030	Sandy/gravelly soils in grassland and
Reptiles (Reptilia)	Phrynosoma hernandesi	Greater Short-horned Lizard	Phrynosomatidae	Sagebrush / Spiny Lizards	G5	S3		SOC	ARACF12080	Sandy / gravelly soils
Reptiles (Reptilia)	Plestiodon skiltonianus	Western Skink	Scincidae	Skinks	G5	S3		SOC	ARACH01110	Open conifer forest and adjacent grass
Fish (Actinopterygii)	Myoxocephalus thompsoni	Deepwater Sculpin	Cottidae	Sculpins	G5	S3		SOC	AFCH404020	Deep mountain lakes
Fish (Actinopterygii)	Percopsis omiscomunciana	Trout-perch	Percopsidae	Trout-perch	G5	S2		SOC	AFCLC01010	Deep lakes, mountain streams
Fish (Actinopterygii)	Prosopium coulteri	Pygmy Whitefish	Salmonidae	Trout	G5	S3		SOC	AFCHA03020	Deep mountain lakes and tributaries

RE: City of Miles City, MT Water System
Preliminary Engineering Report - Agency Information Request
S19-00-032

To whom it may concern:

The City of Miles City is currently preparing a Preliminary Engineering Report (PER). The purpose of the PER is to evaluate the existing water system and provide the City with recommendations for future improvements to the water supply (intake), treatment and distribution system. As part of the evaluation, we are seeking your comments and input regarding any environmental impacts, or other considerations, or requirements you may be aware of. The information provided by your agency will be included in the PER and help in the evaluation of the PER alternatives.

Miles City is located in Eastern Montana at the confluence of the Tongue River and Yellowstone River, along Interstate 94, approximately 140 miles from Billings. Miles City is in Custer County, Montana Range: 47E and Townships: 7N and 8N, or coordinates 46°24'30"N, 105°50'24"W.

Preliminary alternatives being explored include:

1. Construction of a new water intake structure with or without a new intake pipeline extending into the Yellowstone River,
2. Rehabilitation of the existing intake with new pipe within the structure, along with mechanical and electrical improvements,
3. Construction of a new intake structure further inland from the existing structure, connecting to and using the existing pipeline to and within the River,
4. Any of the above with a connection between the City Intake and the Fishery Intake located just downstream of the existing City Intake.
5. Providing a phased approach with divers assessing the existing intake pipe, ice shield and anchors within the River prior to proceeding with design of further improvements.
6. Any of the above, plus minor improvements within the existing Water Treatment Plant.

The locations of potential improvement sites are included on the attached maps, along with a copy of the 1972 intake waterline anchoring plan. It should be noted that the base of the intake structure, which provides the foundation of the existing structure, is believed to have been placed in the 1900's or 1910's with a 14-inch intake line. In 1972 the a new 24-inch water intake line was placed into the Yellowstone with anchors and ice deflector.

A new intake pipeline would be particularly costly and disturb the Yellowstone River and potentially the FWP intake just downstream. For this reason, alternatives are being considered to eliminate or mitigate such disturbances.

Professionals you need, people you trust

A new intake pipeline would be particularly costly and disturb the Yellowstone River and potentially the FWP intake just downstream. For this reason, alternatives are being considered to eliminate or mitigate such disturbances.

We request that your agency provide any comments you may have by February 14, 2020. If we do not receive any comments by that date, we will assume that you have no comment.

Sincerely,

RE: City of Miles City, MT Water System
Preliminary Engineering Report - Agency Information Request
S19-00-032

To whom it may concern:

The City of Miles City is currently preparing a Preliminary Engineering Report (PER). The purpose of the PER is to evaluate the existing water system and provide the City with recommendations for future improvements to the water supply (intake), treatment and distribution system. As part of the evaluation, we are seeking your comments and input regarding any environmental impacts, or other considerations, or requirements you may be aware of. The information provided by your agency will be included in the PER and help in the evaluation of the PER alternatives.

Miles City is located in Eastern Montana at the confluence of the Tongue River and Yellowstone River, along Interstate 94, approximately 140 miles from Billings. Miles City is in Custer County, Montana Range: 47E and Townships: 7N and 8N, or coordinates 46°24'30"N, 105°50'24"W.

Preliminary alternatives being explored include:

1. Construction of a new water intake structure with or without a new intake pipeline extending into the Yellowstone River,
2. Rehabilitation of the existing intake with new pipe within the structure, along with mechanical and electrical improvements,
3. Construction of a new intake structure further inland from the existing structure, connecting to and using the existing pipeline to and within the River,
4. Any of the above with a connection between the City Intake and the Fishery Intake located just downstream of the existing City Intake.
5. Providing a phased approach with divers assessing the existing intake pipe, ice shield and anchors within the River prior to proceeding with design of further improvements.
6. Any of the above, plus minor improvements within the existing Water Treatment Plant.

The locations of potential improvement sites are included on the attached maps, along with a copy of the 1972 intake waterline anchoring plan. It should be noted that the base of the intake structure, which provides the foundation of the existing structure, is believed to have been placed in the 1900's or 1910's with a 14-inch intake line. In 1972 the a new 24-inch water intake line was placed into the Yellowstone with anchors and ice deflector.

A new intake pipeline would be particularly costly and disturb the Yellowstone River and potentially the FWP intake just downstream. For this reason, alternatives are being considered to eliminate or mitigate such disturbances.

Dear Mr. Murtagh:

We are responding to your request for comment, on behalf of the City of Miles City, regarding the Water System Improvements project in Custer County, Montana. The project includes proposed improvements to the water system intake. The project is located on the Yellowstone River, near Latitude 46.406328°, Longitude -105.870284°, within Section 32, Township 8 N, Range 47 E, Miles City, Custer County, Montana.

The mission of the U.S. Army Corps of Engineers (Corps) Regulatory Program is to protect the Nation's aquatic resources while allowing reasonable development through fair, flexible and balanced permit decisions. In particular, under Section 404 of the Clean Water Act, and Section 10 of the Rivers and Harbors Act of 1899, we work to protect the biological, physical, and chemical integrity of the Nation's aquatic resources. Projects are evaluated on a case-by-case basis to determine the potential benefits and detriments that may occur as a result of the proposal. In all cases an applicant must avoid and minimize impacts to aquatic resources to the greatest extent practicable.

Under the authority of Section 404 of the Clean Water Act (CWA), Department of the Army (DA) permits are required for the discharge of fill material into waters of the U.S. Waters of the U.S. include the area below the ordinary high water mark of stream channels and lakes or ponds connected to the tributary system, and wetlands adjacent to these waters. Isolated waters and wetlands, as well as man-made channels, may be waters of the U.S. in certain circumstances, which must be determined on a case-by-case basis. Under the authority of Section 10 of the Rivers and Harbors Act, DA permits are required for structures or work in, over, under or affecting navigable waters of the U.S.

Based on the information provided in your submittal, we are unable to ascertain if regulated activities are proposed. If your final design includes the placement of fill material in any of the jurisdictional areas described in the paragraph above, or otherwise requires authorization by a DA permit, such as, any structure or work in, over, under or affecting the Yellowstone River, a navigable waters of the U.S., please submit a permit application to this office prior to starting any work. Any loss of an aquatic site may require mitigation. Mitigation requirements will be determined during the Department of the Army permitting review. After a review of the materials submitted we will determine what type of permit, if any, will be required. In order to provide the necessary information you may use the Montana Joint Permit Application Form, found at: <http://www.dnrc.mt.gov/licenses-and-permits/stream-permitting>. If you do not

wish to use this form, or do not have internet access please contact our office at the address below to obtain more information.

Note that this letter is not a DA authorization to proceed. It only informs you of your need to obtain a DA permit if waters of the U.S. will be affected. If waters of the U.S. will not be affected by a jurisdictional activity a DA permit will not be required for the project.

Please refer to identification number **NWO-2020-00030-MTB** in any correspondence concerning this project. If you have any questions, please contact me at Post Office Box 7032, Billings, Montana 59103, by email at Marena.A.Gilbert@usace.army.mil, or telephone at (406) 657-5912.

Sincerely,

Marena A. Gilbert

RE: CITY OF MILES CITY WATER SYSTEM IMPROVEMENTS PER. SHPO Project #: 2020010301

Dear Mr. Murtagh:

I have conducted a cultural resource file search for the above-cited project 32, T8N R47E. According to our records there have been a few previously recorded sites within the designated search locale. In addition to the sites there have been a few previously conducted cultural resource inventories done in the area. I've attached a list of these sites and reports. If you would like any further information regarding these sites or reports, you may contact me at the number listed below.

It is SHPO's position that any structure over fifty years of age is considered historic and is potentially eligible for listing on the National Register of Historic Places. The Miles City Waterworks Building and Pumping Plant near the proposed project area has been previously listed on the National Register of Historic Places. If these buildings or any other structures are to be altered and are over fifty years old, we would recommend that they be recorded, and a determination of their eligibility be made prior to any disturbance taking place.

There have been a few previously conducted inventories conducted in the area. We, therefore, feel that a recommendation for a cultural resource inventory is unwarranted at this time. However, should structures need to be altered or if cultural materials be inadvertently discovered during this project we would ask that our office be contacted, and the site investigated.

If you have any further questions or comments, you may contact me at (406) 444-7767 or by e-mail at dmurdo@mt.gov. I have attached an invoice for the file search. Thank you for consulting with us.

Sincerely,

Damon Murdo

INTERSTATE ENGINEERING, INC.

Patrick Murtagh, PE
Interstate Engineering
1211 Grand Avenue, Suite 6
Billings, Montana 59104

Dear Mr. Murtagh:

Consistent with Section 102(2)(c) of the National Environmental Policy Act (NEPA) and Section 309 of the Clean Air Act, the U.S. Environmental Protection Agency (EPA) Region 8 appreciates the opportunity to provide scoping comments to assist in the development of a Preliminary Engineering Report (PER) for the City of Miles City. The noted purpose of the PER is to evaluate the existing water system and provide the City of Miles City recommendations for future improvements to the water supply (intake), treatment and distribution system.

According to the information provided in your letter, a new intake pipeline would disturb the Yellowstone River and potentially the fishery intake just downstream, and alternatives to eliminate or mitigate such disturbances are being considered for this reason. We anticipate that either an Environmental Impact Statement (EIS) or Environmental Assessment (EA) will be prepared to address the NEPA process for the referenced project. To assist with the development of an EIS or EA, we recommend the following topics be included in the scope of analysis:

- Ensuring the EIS includes the analysis necessary to support CWA Section 404 permitting;
- Impacts to Waters of the U.S. (WOTUS), including Wetlands and Section 404 permits under the Clean Water Act;
- Impacts to water resources, including water quality, riparian habitat, stream morphology and surface water and groundwater movement, as well as any National Pollutant Discharge Elimination System (NPDES) permits needed (Section 402 of the Clean Water Act);
- Impacts to air quality; and
- Impacts to environmental justice communities;

Consistency with NEPA and Clean Water Act Permit Requirements

Purpose and Need

For purposes of complying with both the Clean Water Act (CWA) and National Environmental Policy Act (NEPA), the EPA recommends that the purpose and need statement remain broad enough to encompass an appropriate range of both "reasonable" and "practicable" alternatives to meet the basic (i.e., underlying) project purpose, including the proposed action. We recommend defining a purpose and need statement broadly enough to allow for analysis of a range of alternatives without eliminating less

environmentally damaging alternatives that may still be considered practicable under the CWA Section 404 implementing regulations. Developing an agency-coordinated purpose and need statement is critical prior to establishing subsequent screening criteria or identification of alternatives.

When creating the purpose and need statement for this project, we recommend that the NEPA document describe the project needs and the reasoning behind the need. Important considerations include impacts to WOTUS, water quality impacts on listed waters, and the regulatory floodplain designation of the Yellowstone River. Overall, we are concerned that the use of a narrow project purpose to determine the scope of studies has the potential to result in the need to prepare additional NEPA documentation to meet NEPA and CWA Section 404 requirements. The Corps of Engineers and EPA both have roles in Section 404, and consistent with the E.O. 13807 we recommend the City of Miles City coordinate to ensure the EIS or EA is sufficient for related federal permit decisions.

Range of Alternatives

Under CWA Section 404 regulations, the U.S. Army Corps of Engineers (Corps) can only issue a permit for a discharge of fill material into WOTUS if it can be demonstrated that the project is the least environmentally damaging practicable alternative (LEDPA). Practicable alternatives depend on cost, technical and logistical factors and must be capable of achieving the basic project purpose. For an alternative to be practicable, it must be reasonably available or obtainable and may include consideration of options beyond the authority of the lead agency. To assure that the project is permissible, it is essential that the NEPA document includes a full range of alternatives with the goal of avoiding and minimizing the impacts to WOTUS while meeting the purpose of the action.

It is important that the NEPA document summarizes criteria used to screen reasonable alternatives, including the CWA regulatory criteria used to develop practicable alternatives, and consideration be given to environmental, logistical, technological and cost criteria. Providing details of the reasoning used to eliminate alternatives is helpful in understanding the decision process. As required by regulation, the rationale must be consistent with the practicability definition and criteria outlined in the preamble language of the CWA 404(b)(1) Guidelines (40 CFR § 230.10). The lead agency should ensure that any selected or preferred alternative is consistent with these criteria and demonstrate that such alternative is the least environmentally damaging practicable alternative. EPA and the Corps have experience to assist City of Miles City in ensuring consistency with the 404(b)(1) Guidelines.

WOTUS and Water Quality

Analysis/Resource Considerations

Affected Environment and Baseline Conditions

Please consider the following when defining baseline conditions:

- Verify that any historical data (e.g., data 5 years or older) are representative of current conditions.
- Include resources directly impacted by the project footprint within the geographic scope of analysis, as well as the resources indirectly (or secondarily) impacted by the project. These indirectly impacted areas may include adjacent or downstream waters, and any other resource

Specific features to address:

- Water quality impacts on the Yellowstone river, listed on the 303(d) as impaired.
- Anticipated downstream effects associated with the fishery intake.
- Floodplain impacts concerns to address the regulatory floodplain designation of the Yellowstone River (e.g. flood hazards, flood plain values).

Construction Stormwater

It is likely that the proposed project will need to obtain NPDES stormwater construction permits under Section 402 of the Clean Water Act.

Clean Water Act § 401 Certifications

The applicant may need to obtain a Clean Water Act Section 401 water quality certification for any federal permits that may result in a discharge to a WOTUS, including both Section 402 permits and Section 404 permits.

Air Quality

Protection of air quality is important to address in the NEPA document. As appropriate, evaluate and disclose any air quality impacts in the NEPA document and, if necessary, detail mitigation steps that will be taken to minimize associated adverse impacts. We recommend that the amount of stationary, mobile and non-road source emission activities, including hazardous air pollutants, be quantified and disclosed. Also to be addressed are particulate emissions from construction activities and ongoing operation of the roadways.

Endangered Species Act/National Historic Preservation Act (ESA/NHPA)

It is recommended that the EIS or EA include all copies of correspondence on issues related to Section 7(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.), including all correspondence from the U.S. Fish and Wildlife Service regarding whether any listed or proposed species are present in the area (Custer County) and will be affected by construction, including mitigation efforts if necessary.

The EIS or EA should also include the State Historic Preservation Officer's (SHPO) concurrence letter that this project is in compliance with Section 106 of the National Historic Preservation Act of 1966. Listed properties are located in the area noted in your letter and consultation with the SHPO should be addressed. National Register of Historic Places (NRHP) Reference Number: 79003723

areas which may be affected by project construction or operation.

- We recommend that the existing environmental baseline be used as the basis for comparison of impacts across all alternatives, including the no-action alternative. In the EPA's experience, comparison of the action alternatives to existing conditions is an important frame of reference to quantify and/or characterize the magnitude of effects and understand each alternative's impacts.

Direct, Indirect and Cumulative Effects

Because NEPA and CWA Section 404 have slightly different definitions for indirect (secondary) and cumulative impacts, identify in the document which statute is being employed to evaluate the impacts and how the analysis would differ under the other statute's definition.

It is important that the NEPA document examine the direct, indirect, and cumulative impacts to the environmental, cultural, and recreational resource characteristics of the project area. This may include impacts to threatened, endangered and/or sensitive species and their habitat; fish and invertebrate assemblages; water quality, and other resources within the geographic scope of analysis. We suggest analyzing impacts according to airsheds and watersheds rather than political boundaries.

Cumulative impacts associated with ancillary facilities and other factors related to the project that could affect the aquatic resources are important to evaluate. In determining whether a project may have a significant effect on the environment, analyze the direct and indirect effects of all alternatives, in combination with past, present, and reasonably foreseeable future activities. For the cumulative effects analysis, consider the effects of reasonably foreseeable growth in the area and its effects on the hydrology and aquatic resources. Finally, the project may not affect the location of the expected growth, but it may affect the timing and amount of growth. Therefore, an analysis of the indirect impacts of development is recommended.

Waters of the U.S.

To illustrate effects to WOTUS, including wetlands, in the area we recommend that the NEPA document include the following analyses or descriptions:

- Description of impacts under individual or nationwide permits authorizing the discharge of fill or dredge materials to WOTUS;
- We recommend that inclusion of detailed maps that depict intake structures, ice shield and anchors be provided and should include an alternative analysis that evaluates the feasibility/practicability of alternatives;
- Wetland delineation and descriptions, including wetlands function analysis if there is any potential that the project will cause impacts;
- Analysis of the direct, indirect, and cumulative impacts to all stream and wetlands in the geographic scope, including impacts from changes in hydrology even if these wetlands are spatially removed from the construction footprint. Also include in the analysis the cumulative impacts to waters of the U.S. from future development scenarios;
- Consideration of minimization measures that could reduce adverse effects associated with alternatives; and
- A description of mitigation measures for any unavoidable adverse impacts to waters of the U.S.

Closing

We appreciate your consideration of our comments at this early stage of the process. These comments are intended to help ensure a thorough assessment of the project's environmental impacts, adequate public disclosure, and an informed decision-making process. If further explanation of our comments is desired, please contact me at (303) 312-6128, lozano.velrey@epa.gov or my supervisor Philip Strobel at (303) 312-6704, strobel.philip@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read 'VelRey Lozano', with a long horizontal flourish extending to the right.

VelRey Lozano

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Patrick,

Historically pallid sturgeon were present in the Yellowstone River upstream of Intake Diversion Dam located near Glendive. Anecdotal reports from anglers demonstrated that pallid sturgeon were in the Miles City area through at least the 1950's. Since then pallid sturgeon essentially disappeared from angler catches upstream of Intake Dam. The remnant population, estimated at only 80-100 fish occupy the lower Yellowstone River and Missouri River between the Yellowstone -Missouri River confluence and Lake Sakakawea.

Since then, the only documented adult pallid sturgeon upstream of Intake were in the following years: 1991, 2014, 2016 – 2020. These fish reside downstream of Intake and occasional pass upstream of Intake Dam via the high flow side channel, when river flows exceed 35,000 cubic feet per second. They are stimulated to migrate upstream for spawning purposes April-June and return back to the Yellowstone-Missouri confluence area for the remainder of the year. Spawning migrations of individual fish does not occur every year, most fish are on an every other and some are on a three year cycle. Also, in 2017, as part of the litigation of the Intake Fish Passage Project, the United States Fish and Wildlife Service mandated that the Bureau of Reclamation (owner of Intake Dam) must begin translocating telemetered pallid sturgeon that reach Intake Dam upstream of the dam. Hence the annual frequency of adult fish upstream of the dam since 2017.

As part of pallid sturgeon recovery efforts, stocking of hatchery produced juvenile pallid sturgeon also began in 1998 and continues today. Some of these hatchery fish have been stocked upstream of Intake Dam and some are remaining upstream. Despite the first year of hatchery fish (1998 year-class) being 22 years old in 2020, very few have reached sexual maturity. Being immature, they do not have the impulse to migrate upstream like their parents. It will take another 5-10 years before enough of the hatchery released fish are sexually mature to evaluate if they will spawn upstream of Intake Dam and potentially become a self-supporting population.

Lastly, regarding your request for inspecting the Miles City water intake. As I recall we did not have any concerns for that work because we were informed that the work would look at the fish hatchery water intake as well. Given this understanding we did not provide comments because we assumed our concerns would be included with the hatchery work as the project evolved. If this assumption was incorrect than we should probably include pallid sturgeon language into this project as well. If the work only includes divers inspecting the structure than there isn't any concerns related to pallid sturgeon or the other fish species. If and when a construction project is proposed, pallid sturgeon language is certainly needed to minimize impacts to spawning migrations.

Kenneth M Backes

Subject: [EXTERNAL] Miles City Projects

Brad Schmitz,

Thank you for your response to the request for input on the potential work at Miles City. You mentioned that research between 2017 – 2020 finding juvenile and adult pallid sturgeon in the Yellowstone at Miles City. I have two questions...

First, was their presence not known in the Miles City area prior to that study?

Second, is there a way I can get a copy, or summary of that study so I may mention it in the environmental evaluation of this and other projects?

Lastly, we are also looking at a potential intake project. That would begin, and perhaps end with an inspection by divers of the current in-river portion of the intake and the ice deflector. I sent out requests for comment in November, and I received a detailed (and lengthy) response from USFWP. However, I don't have a record of receiving anything from the State's office. Please let me know if you would like information on that project, though the USFWP response was very thorough.

Thank you,

Pat M.

Patrick Murtagh, P.E.
Senior Project Engineer
Interstate Engineering, Incorporated
P.O. Box 20953
1211 Grand Avenue, Suite 6
Billings, Montana 59104

Dear Mr. Murtagh:

Thank you for your December 26, 2019, letter soliciting U.S. Fish and Wildlife Service (Service) comments regarding potential improvements to the existing Miles City water system in Custer County, Montana. The potential improvements (Project) are being evaluated by Interstate Engineering, Inc. in a Project Preliminary Engineering Report. Several preliminary alternatives pertaining to rehabilitation or replacement of the existing Miles City water intake structure in the Yellowstone River were listed in your letter, along with the potential for minor improvements within the existing water treatment plant itself. We received the letter on January 2, 2020. This response is provided by the Service under the authority of the Endangered Species Act (ESA) of 1973, as amended (16 U.S.C. 1531-1543), the Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.), Bald and Golden Eagle Protection Act (BGEPA) (16 U.S.C. 668-668d, 54 Stat. 250), as amended, and the Migratory Bird Treaty Act (MBTA) (16 U.S.C. 703-712), as amended.

Threatened and Endangered Species

Threatened, endangered, proposed, and candidate species that may occur in Custer County include the endangered pallid sturgeon (*Scaphirhynchus albus*), endangered interior least tern (*Sterna antillarum athalassos*), endangered whooping crane (*Grus americana*), and threatened northern long-eared bat (*Myotis septentrionalis*). The pallid sturgeon is a year-round Yellowstone River resident. Efforts to improve Yellowstone River pallid sturgeon passage over 80 miles downstream of the Project are currently underway via construction of a fish bypass channel at Intake Dam, downstream of Glendive. Once the bypass is completed and fish are able to bypass Intake Dam, pallid sturgeon use and movements in and through the Project area may increase over the long term. Beginning in 2017, the Bureau of Reclamation instituted a May/June pallid sturgeon translocation program to move motivated spawning adult and juvenile pallid sturgeon above Intake Dam until construction of the bypass channel is complete.

Telemetry of translocated individuals has documented pallid sturgeon movement through and upstream of the Project area as far as Cartersville.

The Service is not aware of occurrence records for interior least terns, whooping cranes, or northern long-eared bats in the Project area. Interior least terns may nest on Yellowstone River islands in the general Project vicinity; however, the closest nest record is over 9 miles downstream of the Project location. Whooping cranes may occur as spring and fall migrants in the general area. The northern long-eared bat may occur in forested riparian areas along the Yellowstone River. No proposed or designated critical habitat occurs in the Project area.

We offer the following Project recommendations for your consideration relative to threatened and endangered species:

- With regard to the Yellowstone River environment, we recommend that the least damaging, practicable alternative for the intake and associated infrastructure be selected. This determination should include consideration of any predicted necessary long-term maintenance and repair of the intake and infrastructure alternative selected.
- Best Technology Available standards should be applied to intake design to minimize the potential for pallid sturgeon entrainment and impingement at all life stages. Minimally, an intake screen with a mesh opening of ¼ inch or less (⅜-inch mesh or less if a Johnson or Johnson-type screen/intake is selected) should be installed, inspected annually, and maintained.
- Water velocity at the intake screen should not exceed 0.5 feet per second.
- In anticipation of future increased pallid sturgeon use/spawning above the intake, Project design should consider accommodation of potential future pallid sturgeon larval monitoring activities (potential temporary small-mesh net placement locations, etc.).
- In-stream work should be avoided during the May 15-July 15 pallid sturgeon migration and spawning season.
- Project design and construction should be closely coordinated with the adjacent Montana Fish, Wildlife and Parks (FWP) Miles City Fish Hatchery such that impacts to hatchery operations are avoided to the extent possible.
- Necessary removal, destruction, or trimming of trees, saplings, or snags along the Yellowstone River should be avoided between June 1 and July 31, where possible, to minimize the potential for impacts to northern long-eared bats.

If a Federal agency authorizes, funds, or carries out a proposed action, the responsible Federal agency, or its delegated agent, is required to evaluate whether the action “may affect” listed species or critical habitat. If the Federal agency or its designated agent determines the action “may affect, is likely to adversely affect” listed species or critical habitat, the responsible Federal agency shall request formal section 7 consultation with this office. If the evaluation shows a “may affect, not likely to adversely affect” determination, concurrence from this office is required. If the evaluation shows a “no effect” determination for listed species or critical habitat, further consultation is not necessary. If a private entity receives Federal funding for a construction project, or if any Federal permit or license is required, the Federal agency may designate the fund recipient or permittee as its agent for purposes of informal section 7 consultation. The funding, permitting, or licensing Federal agency is responsible to ensure that

its actions comply with the ESA, including obtaining concurrence from the Service for any action that may affect a threatened or endangered species or designated critical habitat.

We recommend that biological assessments and other such evaluations include the following:

1. A description of the project.
2. A description of the specific area that may be affected by the action.
3. The current status, habitat use, and behavior of listed and proposed threatened and endangered species and status of designated and proposed critical habitat(s) in the project area.
4. Discussion of the methods used to determine the information in Item 3.
5. An effects analysis of the action for listed and proposed threatened and endangered species and designated and proposed critical habitats, including an analysis of any cumulative effects.
6. Coordination/mitigation measures that will reduce/eliminate adverse impacts to listed and proposed threatened and endangered species and designated and proposed critical habitats.
7. The expected status of listed and proposed threatened and endangered species and designated and proposed critical habitats in the future (short and long term) during and after project completion.
8. A determination of "May affect, likely to adversely affect", "May affect, not likely to adversely affect", or "No effect" for listed species and critical habitat.
9. A determination of "is likely to jeopardize" or "is not likely to jeopardize" for proposed species and critical habitat.
10. Citation of literature and personal contacts used in developing the assessment.

A Federal nexus exists whenever an activity is conducted, funded, licensed, or permitted by a Federal agency. If there is no Federal nexus for a proposed project, it is not necessary to make determinations for listed species or critical habitat. However, non-Federal entities are required to ensure that their actions do not result in "take" of federally listed animals.

Bald and Golden Eagles

The Service is not aware of current or historic eagle nests or territories in the Project vicinity. We are providing the information below in the event that an eagle nest is detected within 0.5 mile of the Project. If any active eagle nests are present within 0.5 mile of the Project, we recommend that the proponent comply with seasonal construction timing restrictions and construction/development distance buffers specified in the 2007 Service and 2010 FWP guidance discussed below in order to avoid/minimize the risk for eagle take.

The bald eagle (*Haliaeetus leucocephalus*) and golden eagle (*Aquila chrysaetos*) are protected from a variety of harmful actions via take prohibitions in both the MBTA¹ (16 U.S.C. 703-712) and the BGEPA (16 U.S.C. 668–668d). The BGEPA, enacted in 1940 and amended several times, prohibits take of bald eagles and golden eagles, including their parts, nests, young or eggs, except where otherwise permitted pursuant to Federal regulations. Incidental take of eagles from actions such as electrocutions from power lines or wind turbine strikes are prohibited unless specifically authorized via an eagle incidental take permit from the Service. BGEPA provides penalties for persons who "take, possess, sell, purchase, barter, offer to sell, purchase or barter, transport, export or import, at any time or any manner, any bald eagle ... [or any golden eagle], alive or dead, or any part, nest, or egg thereof." BGEPA defines take to include the following actions: "pursue, shoot, shoot at, poison, wound, kill, capture, trap, collect, molest or disturb." The Service expanded this definition by regulation to include the term "destroy" to ensure that "take" also encompasses destruction of eagle nests. Also the Service defined the term disturb which means to agitate or bother a bald or golden eagle to a degree that causes, or is likely to cause, based on the best scientific information available, (1) injury to an eagle, (2) a decrease in its productivity, by substantially interfering with normal breeding, feeding, or sheltering behavior, or (3) nest abandonment, by substantially interfering with normal breeding, feeding, or sheltering behavior.

The Service has developed guidance for the public regarding means to avoid take of bald and golden eagles:

- The 2007 *National Bald Eagle Management Guidelines* serve to advise landowners, land managers, and others who share public and private lands with bald eagles when and under what circumstances the protective provisions of BGEPA may apply. They provide conservation recommendations to help people avoid and/or minimize such impacts to bald eagles, particularly where they may constitute "disturbance," which is prohibited by the BGEPA.
<https://www.fws.gov/northeast/ecologicalservices/pdf/NationalBaldEagleManagementGuidelines.pdf>

The Service also has promulgated new permit regulations under BGEPA:

- New eagle permit regulations, as allowed under BGEPA, were promulgated by the Service in 2009 (74 FR 46836; September 11, 2009) and revised in 2016 (81 FR 91494; December 16, 2016). The regulations authorize the limited take of bald and golden eagles where the take to be authorized is associated with otherwise lawful activities. These regulations also establish permit provisions for intentional take of eagle nests where necessary to ensure public health and safety, in addition to other limited

¹ On December 22, 2017, the Department of the Interior's (DOI) Office of the Solicitor Memorandum M-37050 titled *The Migratory Bird Treaty Act Does Not Prohibit Incidental Take* (<https://www.doi.gov/sites/doi.gov/files/uploads/m-37050.pdf>) concludes that the MBTA's prohibitions on pursuing, hunting, taking, capturing, killing, or attempting to do the same apply only to affirmative actions that have as their purpose the taking or killing of migratory birds, their nests, or their eggs. The MBTA list of protected species includes bald and golden eagles, and the law has been an effective tool to pursue incidental take cases involving eagles. However, the primary law protecting eagles is the Bald and Golden Eagle Protection Act (BGEPA) (16 U.S. Code § 668), since the bald eagle was delisted under the Endangered Species Act in 2007. Memorandum-37050 does not affect the ability of the Service to refer entities for prosecution that have violated the take prohibitions for eagles established by the BGEPA.

circumstances. The revisions in 2016 included changes to permit issuance criteria and duration, definitions, compensatory mitigation standards, criteria for eagle nest removal permits, permit application requirements, and fees in order to clarify, improve implementation and increase compliance while still protecting eagles.
<https://www.gpo.gov/fdsys/pkg/FR-2016-12-16/pdf/2016-29908.pdf>

The Service's Office of Law Enforcement carries out its mission to protect eagles through investigations and enforcement, as well as by fostering relationships with individuals, companies, industries and agencies that have taken effective steps to avoid take, including incidental take of these species, and encouraging others to implement measures to avoid take. The Office of Law Enforcement focuses its resources on investigating individuals and entities that take eagles without identifying and implementing all reasonable, prudent and effective measures to avoid that take. Those individuals and entities are encouraged to work closely with Service biologists to identify available protective measures, and to implement those measures during all activities or situations where their action or inaction may result in the take of an eagle(s).

In addition to Service guidance, the 2010 Montana Bald Eagle Management Guidelines: An Addendum to Montana Bald Eagle Management Plan (1994) developed by FWP also provides guidance for avoiding and minimizing the risk for eagle take.
<http://fwp.mt.gov/fwpDoc.html?id=44181>

Migratory Birds

The proposed Project may result in potential effects to migratory birds. To the extent practicable, necessary vegetation clearing, grubbing, and filling construction activities should be scheduled so as to avoid and minimize impacts to nesting birds, if present in the Project area. Active nests may not be removed. The Service has developed, and continues to revise and develop, general and industry-specific conservation measures for avoiding and minimizing impacts to birds (<https://www.fws.gov/birds/management/project-assessment-tools-and-guidance/conservation-measures.php>). We recommend that the proposed Project consider and incorporate these measures into project design, construction, and documentation as appropriate. Certain activities may require a permit from the Service's Migratory Bird Management Division. Please contact the Region 6 Migratory Bird Permits Office if you are uncertain if activities may result in purposeful take of migratory birds, eggs, or nests. Additional information about permits can be found at <http://www.fws.gov/migratorybirds/mbpermits.html>.

Other Comments:

- We recommend coordination with FWP at 1420 East Sixth Ave., P.O. Box 200701, Helena, Montana 59620-0701, (406) 444-2535, and the Montana Natural Heritage Program at 1515 East 6th Avenue, Box 201800, Helena, Montana 59620-1800, (406) 444-5354. Both of these agencies may be able to provide updated, site-specific information regarding current fish, wildlife, and sensitive plant resources occurring in the proposed project area, as well as specific project-related recommendations.
- Additional recommendations include: install and maintain appropriate erosion control

measures to reduce sediment transport to adjacent wetlands and stream channels; enact best management practices to avoid and minimize the spread of noxious weeds and other undesirable exotic plant species within the proposed Project area; confine the disturbed areas as much as possible, and; revegetate disturbed areas with appropriate native species obtained from local sources, as possible.

We appreciate the opportunity to review the December 26, 2019, letter and associated Project materials. If you require further information, please contact Jeff Berglund at jeff_berglund@fws.gov or (406) 449-5225, extension 206.

Sincerely,

A handwritten signature in cursive script, appearing to read "Jodi L. Bush".

for Jodi L. Bush

Revised: 6/5/15 (310 form 270). Form may be downloaded from: www.dnrc.mt.gov/licenses-and-permits/stream-permitting

AGENCY USE ONLY: Application # _____ Date Received _____
Date Accepted _____ / Initials _____ Date Forwarded to DFWP _____

This space is for all Department of Transportation and SPA 124 permits (government projects).

Project Name _____
Control Number _____ Contract letting date _____
MEPA/NEPA Compliance Yes No If yes, #14 of this application does not apply.

JOINT APPLICATION FOR PROPOSED WORK IN MONTANA'S STREAMS, WETLANDS, FLOODPLAINS, AND OTHER WATER BODIES

Use this form to apply for one or all local, state, or federal permits listed below. The applicant is the responsible party for the project and the point of contact unless otherwise designated. "Information for Applicant" includes agency contacts and instructions for completing this application. To avoid delays, submit all required information, including a project site map and drawings. Incomplete applications will result in the delay of the application process. Other laws may apply.

The applicant is responsible for obtaining all necessary permits and landowner permission before beginning work.

✓	<u>PERMIT</u>	<u>AGENCY</u>	<u>FEE</u>
✓	310 Permit	Local Conservation District	No fee
✓	SPA 124 Permit	Department of Fish, Wildlife and Parks	No fee
✓	Floodplain Permit	Local Floodplain Administrator	Varies by city/county (\$25 - \$500+)
✓	Section 404 Permit, Section 10 Permit	U. S. Army Corps of Engineers	Varies (\$0 - \$100)
✓	318 Authorization 401 Certification	Department of Environmental Quality	\$250 (318); \$400 - \$20,000 (401)
✓	Navigable Rivers Land Use License, Lease, or Easement	Department of Natural Resources and Conservation, Trust Lands Management Division	\$50, plus additional fee

A. APPLICANT INFORMATION

NAME OF **APPLICANT** (person responsible for project): [Click here to enter applicant name.](#)

Has the landowner consented to this project? Yes No

Mailing Address: [Click here to enter mailing address.](#)

Physical Address: [Click here to enter physical address.](#)

Day Phone: [Click here to enter.](#) Evening Phone: [Click here to enter.](#) E-Mail: [Click here to enter.](#)

NAME OF **LANDOWNER** (if different from applicant): [Click here to enter name or N/A.](#)

Mailing Address: [Click here to enter mailing address or N/A.](#)

Physical Address: [Click here to enter physical address or N/A.](#)

Day Phone: [Click here to enter or N/A.](#) Evening Phone: [Click here to enter or N/A.](#) E-Mail: [Click here to enter or N/A.](#)

NAME OF **CONTRACTOR/AGENT**): [Click here to enter name or N/A.](#)

Mailing Address: [Click here to enter name or N/A.](#)

Physical Address: [Click here to enter name or N/A.](#)

Day Phone: [Click here to enter name or N/A.](#) Evening Phone: [Click here to enter name or N/A.](#) E-Mail: [Click here to enter name or N/A.](#)

B. PROJECT SITE INFORMATION

NAME OF **STREAM** or **WATER BODY** at project location [Click here to enter text.](#) Nearest Town [Click here to enter text.](#)

Address/Location: [Click here to enter text.](#) Geocode (if available): [Click here to enter text.](#)

Choose. 1/4 Choose. 1/4 Choose. 1/4, Section [Enter.](#), Township [Enter.](#), Range [Enter](#) County [Enter.](#)

Longitude [Enter Longitude.](#), Latitude [Enter Latitude.](#)

The state owns the beds of certain state navigable waterways. Is this a state navigable waterway? Yes or No. If yes, send copy of this application to appropriate DNRC land office – see Information for Applicant.

ATTACH A PROJECT SITE MAP OR A SKETCH that includes: 1) the water body where the project will take place, roads, tributaries, landmarks; 2) a circled “X” representing the exact project location. **IF NOT CLEARLY STATED ON THE MAP OR SKETCH, PROVIDE WRITTEN DIRECTIONS TO THE SITE.**

C. PROJECT INFORMATION

1. **TYPE OF PROJECT** (check all that apply)

- | | | |
|---|--|--|
| <input type="checkbox"/> Bridge/Culvert/Ford Construction | <input type="checkbox"/> Fish Habitat | <input type="checkbox"/> Mining |

2. **PLAN OR DRAWING** of the proposed project **MUST** be attached. **This plan or drawing must include:**

- a plan view (looking at the project from above)
- dimensions of the project (height, width, depth in feet)
- location of storage or stockpile materials
- drainage facilities
- an arrow indicating north
- a cross section or profile view
- an elevation view
- dimensions and location of fill or excavation sites
- location of existing or proposed structures, such as buildings, utilities, roads, or bridges

3. **IS THIS APPLICATION FOR** an annual maintenance permit? Yes No

(If yes, an annual plan of operation must be attached to this application – see “Information for Applicant”)

4. **PROPOSED CONSTRUCTION DATE.** Include a project timeline. Start date [Click here to enter a date.](#) Finish date [Click here to enter a date.](#) Is any portion of the work already completed? Yes No
(If yes, describe the completed work.)

5. **WHAT IS THE PURPOSE** of the proposed project?

[Click here to enter text.](#)

6. **PROVIDE A BRIEF DESCRIPTION** of the proposed project.

[Click here to enter text.](#)

7. **WHAT IS THE CURRENT CONDITION** of the proposed project site? Describe the existing bank condition, bank slope, height, nearby structures, and wetlands.

[Click here to enter text.](#)

8. **PROJECT DIMENSIONS.** How many linear feet of bank will be impacted? How far will the proposed project encroach into and extend away from the water body?
Click here to enter text.

9. **VEGETATION.** Describe the vegetation present on site. How much vegetation will be disturbed or covered with fill material during project installation? (Agencies require that only vegetation necessary to do the work be removed.) Describe the revegetation plan for all disturbed areas of the project site in detail.
Click here to enter text.

10. **MATERIALS.** Describe the materials proposed to be used. Note: This may be modified during the permitting process. It is recommended you do not purchase material until all permits are issued.

Cubic yards/Linear feet	Size and Type	Source
-------------------------	---------------	--------

Click here to enter text.

11. **EQUIPMENT.** List all equipment that will be used for construction of the project. How will the equipment be used on the bank and/or in the water? Note: Make sure equipment is clean and free of weeds, weed seeds, and excess grease before using it in the water waterway. To prevent the spread of aquatic invasive species, to the extent practical, remove mud and aquatic plants from heavy machinery and other equipment before moving between waters and work sites, especially in waters known to be infested with aquatic invasive species. Drain water from machinery and let dry before moving to another location.

Click here to enter text.

12. **DESCRIBE PLANNED EFFORTS TO MINIMIZE PROJECT IMPACTS.** Consider the impacts of the proposed project, even if temporary. What efforts will be taken to:

- Minimize erosion, sedimentation, or turbidity?

Click here to enter text.

- Minimize stream channel alterations?

Click here to enter text.

- Minimize effects to stream flow or water quality caused by materials used or removal of ground cover?

Click here to enter text.

- Minimize effects on fish and aquatic habitat?

Click here to enter text.

- Minimize risks of flooding or erosion problems upstream and downstream?

Click here to enter text.

- Minimize vegetation disturbance, protect existing vegetation, and control weeds?

Click here to enter text.

13. WHAT ARE THE NATURAL RESOURCE BENEFITS of the proposed project?

Click here to enter text.

14. LIST ALTERNATIVES to the proposed project. Why was the proposed alternative selected?

Click here to enter text.

D. ADDITIONAL INFORMATION FOR SECTION 404, SECTION 10, AND FLOODPLAIN PERMITS ONLY.

If applying for a Section 404 or Section 10 permit, fill out questions 1-3. If applying for a floodplain permit, fill out questions 3-6. (Additional information is required for floodplain permits – See “Information for Applicant.”)

1. Will the project involve placement of dredged (excavated) and/or fill material below the ordinary high water mark, in a wetland, or other waters of the US? If yes, what is the surface area to be filled? How many cubic yards of fill material will be used? Note: Wetland delineations are required if wetlands are affected.

Click here to enter text.

2. Description of avoidance, mitigation, and compensation (see Information for Applicant). Attach additional sheets if necessary.

Click here to enter text.

3. List the names and address of landowners adjacent to the project site. This includes properties adjacent to and across from the project site. (Some floodplain communities require certified adjoining landowner lists).

Click here to enter text.

4. List all applicable local, state, and federal permits and indicate whether they were issued, waived, denied, or pending. Note: All required local, state, and federal permits, or proof of waiver must be issued prior to the issuance of a floodplain permit.

Click here to enter text.

5. Floodplain Map Number Click here to enter map number or N/A.

6. Does this project comply with local planning or zoning regulations? Yes No

E. SIGNATURES/AUTHORIZATIONS -- Each agency must have original signatures signed in blue ink.

After completing the form, make the required number of copies and **then sign each copy**. Send the copies with original signatures and additional information required directly to each applicable agency.

The statements contained in this application are true and correct. The applicant possess' the authority to undertake the work described herein or is acting as the duly authorized agent of the landowner. The applicant understands that the granting of a permit does not include landowner permission to access land or construct a project. Inspections of the project site after notice by inspection authorities are hereby authorized.

Stream Permitting

NOTE: The above graphic is only meant as a guide, please consult the permit descriptions to determine which permits are needed.

Using the diagram above, determine where your project will take place: streambed, streambanks, wetlands, or floodplain. The letters in the diagram refer to the required permits listed below (A through L) and described on the following pages.

If you are planning to do work on or near a waterway in Montana, one or several permits may be required. Conservation districts, along with participating agencies, created a Joint Application Form to help reduce the number of application forms that you need to complete to get your permits. We hope that in addition to reducing paperwork, the use of the form will increase coordination and streamline the permitting process. For detailed instructions on stream permitting please read the [Stream Permitting Book](#).

Joint Application Form

[Joint Application Form \(fillable doc\)](#)

[Joint Application Form \(fillable pdf or blank for filling out by hand\)](#)

[Joint Application Instructions](#)

This form can be used for the following permits:

Conservation Districts (local government) - [310 permits](#)

US Army Corps of Engineers (federal government) - Section 404/Section 10 permits

MT Fish, Wildlife and Parks (state government) - SP
124 permits

MT Department of Environmental Quality (state
government) - 318 (turbidity) Authorizations

County Floodplain Administrators (local government) -
floodplain permits

MT Department of Natural Resource and
Conservation (state government) - Navigable river
land use licenses and easements

▶ **A. Montana Natural Streambed and Land Preservation Act (310)** - To minimize soil erosion and sedimentation and to protect and preserve streams and rivers in their natural or existing state.

[Show/Hide]

▶ **B. Montana Stream Protection Act (SPA 124 Permit)** - To protect and preserve fish and wildlife resources, and to maintain streams and rivers in their natural or existing stage [Show/Hide]

▶ **C. City or County Floodplain Development Permit** - To promote the public health, safety and general welfare of the residents and to minimize public and private losses due to flood conditions in Regulated Flood Hazard Areas. Review and permit appropriate uses, within the designated floodplain and floodway areas, that will not be seriously damaged or present a hazard to life, if flooded, thereby limiting the expenditure of public tax dollars for emergency operations and disaster relief. [Show/Hide]

▶ **D. Federal Clean Water Act (404 Permit)** - To restore and maintain the chemical, physical, and biological integrity of the nation's waters [Show/Hide]

▶ **E. Federal Rivers and Harbors Act (Section 10 Permit)** [Show/Hide]

▶ **F. Short-Term Water Quality Standard for Turbidity (318 Authorization)** - To provide a short term water quality turbidity standard for construction activities. Activities must be carried out in accordance with conditions prescribed by the Department of Environmental Quality. To protect water quality. To minimize sedimentation. [Show/Hide]

▶ **G. Montana Land-Use License or Easement on Navigable Waters** - To protect riparian areas and the navigable status of the water body. To provide for the beneficial use of state lands for public and private purposes in a manner that will provide revenues without harming the long term capability of the land or restricting the original commercial navigability. [Show/Hide]

▶ **H. Montana Water Use Act (Water Right Permit and Change Authorization)** - To provide a permit and certificate system for water rights administration that operates within the bounds of the prior appropriation doctrine ("first in time is first in right"). A person's right to use a specific quantity of water depends on when the use of water began. The first person to use water from a source established the first right; the second person could establish a right to what water was left, and so on. To maintain a general adjudication of all existing water rights in the state. To implement a centralized record system. [Show/Hide]

▶ **I. Montana Water Use Act (Water Reservations)** - To provide water for existing and future beneficial uses of water. To maintain a minimum flow, level, or quality of water. [Show/Hide]

▶ **J. Stormwater Discharge General Permits** - To prevent degradation of surface waters from pollutants such as sediment, waste materials, industrial chemicals or materials, heavy metals, and petroleum products. To protect existing water quality. To implement and monitor the effectiveness of Best Management Practices (erosion and sediment controls, etc.) used to reduce pollutant loads. [Show/Hide]

▶ **K. Streamside Management Zone Law** - To protect the quality and quantity of forest waters. To conserve the integrity of Montana's streamside zones. [Show/Hide]

▶ **L. Other Laws that May Apply** [Show/Hide]

Environmental Review Form

On a separate piece of paper, please answer the following as they apply to your proposed project:

1. **Alternatives:** Describe reasonable alternatives to the project.

2. **Mitigation:** Identify any enforceable measures necessary to reduce any impacts to an insignificant level.

3. **Is an EA or Environmental Impact Statement (EIS) required?** Describe whether or not an EA or EIS is required and explain in detail why or why not.

4. **Public Involvement:** Describe the process followed to involve the public in the proposed project and its potential environmental impacts. Identify the public meetings -- where and when -
- the project was considered and discussed, and when the applicant approved the final environmental assessment.

5. **Person(s) Responsible for Preparing:** Identify the person(s) responsible for preparation of this checklist.

6. **Other Agencies:** List any state, local, or federal agencies that have over-lapping or additional jurisdiction or environmental review responsibility for the proposed action and the permits, licenses, and other authorizations required; and list any agencies or groups that were contacted or contributed information to this Environmental Assessment (EA).

(1) Patrick Murtagh, Interstate Engineering, Sr. Engineer

Date

City of Miles City

(2) Mayor

Date:

* If an authorized representative (1) completes the checklist and this form, a chief elected official (2) must also sign authorizing acceptance of the review process. Explanation or statement of how/why that representative was authorized should also be included.

Environmental Review Form – Responses

This form is to be attached to the signed Environmental Review Form as provided in the Treasure State Endowment Program Application Guidelines.

#1 Alternatives: Describe reasonable alternatives to the project

Alternatives for Water and Sewer Pipe Materials/Construction

1. Do Nothing
2. Ductile Iron
3. Pipe Bursting
4. HDD
5. PVC

The PER finds that the old cast iron pipe was responsible for all leaks and subsequent repairs over the past several years (10-15 leaks/yr), and the frequency had been increasing. Health issues associated with the tuberculation of the old cast iron pipe and woefully inadequate fire protection in the downtown business and historic districts led to the conclusion that the 110-year-old cast-iron pipe needs to be replaced, especially in Main Street, led to the elimination of the Do nothing alternative.

Ductile iron pipe was found as an appropriate alternative for waterline replacement, though AWWA C:900 PVC is the least cost and easiest material for handling. Ductile iron pipe with hydrocarbon-resistant gaskets may be required if significant hydrocarbons are found along the route.

Pipe bursting was not found to be a good candidate for the waterline replacement since the pipe replacement would be considerably larger than the pipe to be “burst”. In addition, there are many service lines and intersections that would still require excavation.

Horizontal Directional Drilling (HDD) is not financially appropriate for the pipeline replacement work, especially due to the number of service lines and intersections that would still require excavation, but should be considered during final design of the Intake.

AWWA C:900 PVC was found to be the pipe of choice for However, ductile iron should be considered an appropriate substitute if desired by the contractor and proper corrosion protection is provided.

A minimum of 8-inch diameter pipe was determined to be the most appropriate minimum size. Larger sizes in Main Street were required due to high fire flow demands.

Alternatives for the Intake – First Phase-Inspection with Divers

1. Do Nothing, or
2. Have the Divers inspect the existing in-River portion of the Intake.

The first step leading to eventual construction of a new intake facility is the inspection of the existing facility. The existing facility is believed capable at least of providing some additional protection from ice and materials for any new in-River system installed immediately downstream.

In addition, the existing in-River portion of the intake may provide a back-up at very little additional cost since the proposed new in-River structure would be immediately downstream and the pipe from that new system would run near and parallel to the existing 24-inch inlet pipe just after the 45-degree junction in the River.

The precarious nature of the existing on-shore structure (half of that structure and all of its base were installed in 1910) that houses the lift station eliminates the Do Nothing Alternative from consideration.

Alternatives for the Intake – Design and Construction of Improvements

Having two major components, the In-River portion and on-shore portion, alternatives were initially divided into those two groups (Section 4 of the PER), the combinations were examined during the final selection (Section 5 of the PER).

Six (6) in-River alternatives were examined, including a “Do Nothing” alternative. Twelve (12) on-shore systems were discussed including the “Do-Nothing” alternatives and combination alternatives such as a channel intake, groundwater, and infiltration gallery. After analysis, a total of nine (9) combinations of in-River and on-shore alternatives were developed for in-depth investigation including life cycle cost estimating in Section 5. These were:

- **A/4 (IR-A with I-4)** – Repair the Existing In-River Structure and construct a New on-Shore Pumping Structure, Connecting at the Existing 45-degree Bend in the River.
- **A/4-Ex (IR-A with I-4)** – Repair the Existing In-River Structure and construct a New on-Shore Pumping Structure, Connecting at the Existing 45-degree Bend in the River. Include Pipe for Ease of Expansion later to Include a new In-River Structure with Johnson Screens.
- **B/4/5 (IR-B with I-4 or I-5)** – Construct a New on-Shore Pumping Structure and New In-River Structure with Johnson Screens. Note: I-4 and I-5 are the same if used with IR-B, Since the Existing Intake System is Entirely Abandoned.
- **C/4 (IR-C with I-4)** - Construct a New on-Shore Pumping Structure, connecting to the Existing In-River system at the Existing 45-degree Bend in the River, and Provide a New In-River Structure with Johnson Screens.
- **A/4-Ex + FB-** Construct A/4-Ex, and include the Johnson Screens in-River system as a second phase of construction.

- **A/5** (IR-A with I-5) - Repair the Existing In-River Structure and Construct a New on-Shore Pumping Structure, Connecting to the Existing In-River system Through the Existing Intake Structure's 24-inch Line Entrance.
- **A/5-Ex** (IR-A with I-5) - Repair the Existing In-River Structure and Construct a New on-Shore Pumping Structure, Connecting to the Existing In-River system Through the Existing Intake Structure's 24-inch Line Entrance. Include Pipe for Ease of Expansion later to Include a new In-River Structure with Johnson Screens.
- **C/5** (IR-C with I-5) - Construct a New on-Shore Pumping Structure, connecting to the Existing In-River system Through the Existing Intake Structure's 24-inch Line Entrance, and Provide a New In-River Structure with Johnson Screens.
- **A/5-Ex + FB-** Construct A/5-Ex, and include the Johnson Screens in-River system as a second phase of construction.

The preferred alternative was C/4, which constructs a new in-River intake with Johnson Screens for the protection of Pallid Sturgeon, reduction of organic carbons entering the WTP, and enhancing the ability to obtain permits. This option includes connecting the existing 24-inch line from the existing intake to serve as a back-up. A decision matrix is included in Section 5 of the PER that examines several components with heavy weighting on cost and environmental impact.

If Divers determine that the existing in-River structure is not salvageable, or if permits cannot be obtained if the non-screened system remains in any capacity, then alternatives B/4/5 would become the preferred alternative. This was the third highest ranked of all alternatives in Section 5, but the highest ranking of all alternatives that do not include re-use of the existing in-River portion of the existing intake.

The improvements are recommended by the PER, as shown in Figures ES-3 through ES-7, have been evaluated in the Environmental Checklist/Assessment. It should be noted that at a minimum the following permits will be required:

A number of **permits are required** for work that touches within the Yellowstone, including:

- Conservation Districts (local government) - 310 permits
- MT Fish, Wildlife and Parks (state government) - SP 124 permits
- County Floodplain Administrators (local government) - floodplain permits
- US Army Corps of Engineers (federal government) - Section 404/Section 10 permits
- MT Department of Environmental Quality (state government) - 318 (turbidity) Authorizations
- MT Department of Natural Resource and Conservation (state government) - Navigable river land use licenses and easements

A joint application may be used for the above and may be found at the website:

<http://dnrc.mt.gov/licenses-and-permits/stream-permitting>

A copy of the comprehensive application is also included in Appendix A.

#2 Mitigation

During the completion of the Environmental Checklist, a search was conducted using the Montana Natural Heritage website. The following was concluded:

The project did not include any areas of known grouse habitat.

Work will be in riparian areas (see maps attached for Land Use and Wetlands).

After review of the Montana Natural Heritage Program Website and downloading Species of Concern (SOC), and review of the facts and precautions pointed out by the USFWP letter of January 29, 2019, the following excerpts from that letter point out the most significant precautions that need to be made, as follows:

The Service is not aware of occurrence records for interior least terns, whooping cranes, or northern long-eared bats in the Project area. Interior least terns may nest on Yellowstone River islands in the general Project vicinity; however, the closest nest record is over 9 miles downstream of the Project location. Whooping cranes may occur as spring and fall migrants in the general area. The northern long-eared bat may occur in forested riparian areas along the Yellowstone River. No proposed or designated critical habitat occurs in the Project area.

... In-stream work should be avoided during the May 15-July 15 pallid sturgeon migration and spawning season.

A good deal of investment has been made at the bypass channel and fish pumps at the Intake Dam near Glendive. As noted in the same letter mentioned above:

The pallid sturgeon is a year-round Yellowstone River resident. Efforts to improve Yellowstone River pallid sturgeon passage over 80 miles downstream of the Project are currently underway via construction of a fish bypass channel at Intake Dam, downstream of Glendive.

Based on the above, it is clear that permits applications will need to show not only that the chosen alternative to be constructed is friendly to the Pallid Sturgeon, but also that impact to the Pallid Sturgeon during construction is being mitigated through timing of major in-River work.

#3 Is an EA or Environmental Impact Statement (EIS) Requested?

Due to 1) lack of presence of wetlands, 2) lack of any visible change in or around the River after construction, and 3) noting that the far less in-River construction would be required than recently with the Laurel Intake (the cofferdam would be less than half the length used in Laurel), and that no EIS was required for the work in Laurel; it is assumed that there will not be a required for an EIS associated with this proposed intake project.

An EA would be required.

#4 Public Involvement

The PER and Environmental Review were advertised as available for public review on ____ and a hearing for the PER and Environmental Review was conducted on XXXXXX, 2020 _____. The project was explained in detail at each hearing including options, costs and the process used to determine that there if there was significant environmental impact associated with the project.

#5 Person(s) Responsible for Preparing

This Environmental Review and the Environmental Checklist (also included in Appendix A of the PER) was conducted by Interstate Engineering, led by Patrick Murtagh, PE, who also prepared the checklist. This Environmental Review does not constitute a full environmental assessment (EA).

An EA will likely be done by the State DEQ with assistance from Interstate Engineering as part of its Drinking Water SRF requirements, using materials included in the PER and its appendix as a significant source of pertinent materials.

#6 Other Agencies

As noted above, an additional EA will likely be conducted by the State DEQ as part of the DWSRF process. If not, Interstate Engineering could proceed with that work.

The Department of Commerce and the US Census was used in determining population history and for developing anticipated growth. Many environmental agencies were contacted as part of this assessment and information from websites hosted by the Montana Natural Heritage Program and the NRCS (with USDA) was used extensively.

Responses from the State Historical and Preservation Office indicated that a full cultural resource inventory would not be required. However, in that correspondence notes many previous cultural resource inventories for the range of this project. The existing intake is considered over 50 years old and SHiPO will need to be advised as to the potential for recording of the building. If the structure is found to not present a hazard, it may be left in place. This decision would be left for final design.

Significant correspondence was received from The US EPA, the Department of the Army Corps of Engineers, and the United State Department of the Interior Fish Wildlife and Parks.

ATTACHEMENTS (all included in the Appendix A to the PER):

- Species of Concern
- Sage Grouse Habitat
- Land Usage Mapping
- Flood Plains Mapping
- Leaking Underground Storage Tanks (LUST)
- Environmental Review Checklist

ENVIRONMENTAL REVIEW CHECKLIST

NOTE: The environmental review checklist is also available in the *Uniform Application for Montana Public Facility Projects, Twelfth Edition*. The applicant can use either form, but must include a completed checklist with TSEP application materials and all other environmental documents identified in Appendix C of this document.

NAME OF PROJECT:	Miles City Water System Improvements
PROPOSED ACTION:	Construct and New Intake and replace approximate 6,500 feet of water main.
LOCATION:	Miles City, Montana

Key Letter:	
N: No Impact; B: Potentially Beneficial; A: Potentially Adverse; P: Approval/Permits Required; M: Mitigation Required	
PHYSICAL ENVIRONMENT	
Key	1
N	Soil Suitability, Topographic and/or Geologic Constraints (e.g., soil slump, steep slopes, subsidence, seismic activity)
	<i>Response and source of information:</i>
	Soils have been researched for the project where pipe or concrete will be added or replaced for corrosiveness (See Appendix A). The area at and around the existing intake and proposed new intake is moderately corrosive to concrete. For pipelines and dewatering at the Intake site, the main concern with soils is that much of the City sits atop an alluvial fan, and dewatering will be a cost (included in costs per foot of pipe). Plastic pipe will be placed where cast iron pipe is removed, as will be the norm for all water and sewer. Slopes are nearly flat. <i>Sources: NRCS websites (USDA information)</i>
Key	2
N	Hazardous Facilities (e.g., power lines, hazardous waste sites, acceptable distance from explosive and flammable hazards including chemical/petrochemical storage tanks, underground fuel storage tanks, and related facilities such as natural gas storage facilities & propane storage tanks)
	<i>Response and source of information:</i>
	Due to the age of long standing businesses in the area of pipeline improvements, the project will need to include provisions for dealing with the high potential to find undocumented LUST sites. A list of sites is included in Appendix A. <i>Sources: Montana DEQ Website: http://deq.mt.gov/Land/lust/lustsites as of Jan 2020</i>
Key	3
N	Effects of Project on Surrounding Air Quality or Any Kind of Effects of Existing Air Quality on Project (e.g., dust, odors, emissions)
	<i>Response and source of information:</i>

		<p>No significant impact to air quality is anticipated at the construction sites. Dust control is to be discussed and pursued through the contract documents. <i>Source: Based on Previous contract documents prepared by the engineer and Montana Public Works Standard Specifications (MPWSS).</i></p>
Key	4	<p>Groundwater Resources & Aquifers (e.g., quantity, quality, distribution, depth to groundwater, sole source aquifers)</p>
		<p><i>Response and source of information:</i></p>
B		<p>Groundwater Resources are benefited. The continued leakage from the cast iron pipe will be eliminated as that pipe is replaced with PVC pipe (one recent leak repair saved the City over 100,000 gallons of water production per day). <i>Source: PER, interview with Utilities Director.</i></p>
Key	5	<p>Surface Water/Water Quality, Quantity & Distribution (e.g., streams, lakes, storm runoff, irrigation systems, canals)</p>
		<p><i>Response and source of information:</i></p>
N/P		<p>Surface water quality is not impacted by the project in the long term, other than a savings of water by arresting leakage in the old cast iron pipe. A General Permit for Stormwater Discharges Associated with Construction Activity is required for construction activities. This is provided to protect surface waters from excessive, or sediment-filled, run-off.</p> <p><i>Source: Montana DEQ > Water > StormWater > StormSystems</i></p>
Key	6	<p>Floodplains & Floodplain Management (Identify any floodplains within one mile of the boundary of the project.)</p>
		<p><i>Response and source of information:</i></p>
B/P		<p>Placing the new intake on-shore structure back further from the River provides for better control and accessibility of the intake. However, approval for work in the floodplain is required. <i>Source: FIRM Maps (see Appendix)</i></p>
Key	7	<p>Wetlands Protection (Identify any wetlands within one mile of the boundary of the project.)</p>
		<p><i>Response and source of information:</i></p>
N/P		<p>Wetlands are not located at any of the sites. However, the project will include work in the River and along its banks. A number for permits will be required as outlined in the PER and the Environmental Review Form. Appendix A of the PER includes a full summary of all</p>

		permits required and notes where joint permits may be used. <i>Source: NRCS website (see Appendix for Land Usage and Wetlands map).</i>
Key	8	Agricultural Lands, Production, & Farmland Protection (e.g., grazing, forestry, cropland, prime or unique agricultural lands) (Identify any prime or important farm ground or forest lands within one mile of the boundary of the project.)
		<i>Response and source of information:</i>
N		There are no prime or irrigated farmlands impacted by the project. The pipeline improvements are in urban, previously developed areas, and the Intake area does not change usage. <i>Source: NRCS website (see appendix for Land Usage and Wetlands map).</i>
Key	9	Vegetation & Wildlife Species & Habitats, including Fish and Sage Grouse (e.g., terrestrial, avian and aquatic life and habitats)
		<i>Response and source of information:</i>
N/P		A detailed printout of area species of concern was obtained from the Montana Natural Heritage website for the Miles City area. Most of the species listed were of riparian or water habitat and away from the project. The project is completely out of the sage grouse habitats or protected areas and since all work will be in previously disturbed areas and rights of ways, no significant impact is anticipated for wildlife, though scheduling of work along the River Bank is important for the long-eared bat, as noted by USFWP in its response letter: “ <i>The northern long-eared bat may occur in forested riparian areas along the Yellowstone River. No proposed or designated critical habitat occurs in the Project area.</i> ” <i>Source: NRCS, USFWP letter of Jan 29, 2020. See the Appendix A of the PER for maps.</i> However, there is a great deal of concern surrounding Pallid Sturgeon. Two concerns are noted: 1) timing of work in-River (Avoid May 15 – July 15) and 2) the desire to have screens with 1/8 th inch slots. These concerns are to be addressed in the design and contract documents. <i>Source: NRCS, USFWP letter of Jan 29, 2020.</i>
Key	10	Unique, Endangered, Fragile, or Limited Environmental Resources, Including Endangered Species (e.g., plants, fish, sage grouse or wildlife)
		<i>Response and source of information:</i>
N/P		No endangered species were found in the area based on a search of the <i>Montana Natural Heritage website and mapbuilder for the pipeline areas. See also the PER appendix for a list of Species of Concern (SOC) in the Miles City area.</i> Concerns over the Pallid Sturgeon are discussed throughout the PER and noted in item 9 previously. Following the recommendations in the PER, Pallid Sturgeon will be better protected by the proposed use of Johnson Screens with 1/8 th inch slots. <i>Source: PER and Letter from USFWP of Jan 29, 2020.</i>

Key	11	Unique Natural Features (e.g., geologic features)
		<i>Response and source of information:</i>
N		Pipeline replacements for the project will be entirely within previously disturbed areas and City or State Rights-of-way, no unique features would be expected to be influenced by the pipeline portions of the project. <i>Montana Natural Heritage. See also the PER appendix.</i> The Intake options selected does not constructed anything new that would be visible along the River shore (final design will determine whether or not to demolish the existing intake, based on historical value compared to safety). <i>Source: PER and SHiPO correspondence.</i>
Key	12	Access to, and Quality of, Recreational & Wilderness Activities, Public Lands and Waterways, and Public Open Space
		<i>Response and source of information:</i>
N		Access to recreation, public lands, etc. will not be impacted by the project. <i>Source: comparison of project maps.</i>
HUMAN ENVIRONMENT		
Key	1	Visual Quality – Coherence, Diversity, Compatibility of Use and Scale, Aesthetics
		<i>Response and source of information:</i>
B		Visual quality of the area would not be impacted by any portion of the project since all pipe replacement and in-River improvements will be out of view. The new intake on-shore structure would be set back from the existing. Visual quality could arguably be enhanced by the demolition of the existing intake along the bank, though that decision would be made during final design with direct input from SHiPO. <i>Source: Photographs in the PER, SHiPO correspondence.</i>
Key	2	Nuisances (e.g., glare, fumes)
		<i>Response and source of information:</i>
N		No nuisances are anticipated other than potential for dust production. Dust control would be required by the contract documents. <i>Source: Based on Previous contract documents prepared by the engineer and Montana Public Works Standard Specifications (MPWSS).</i>
Key	3	Noise -- suitable separation between noise sensitive activities (such as residential areas) and major noise sources (aircraft, highways & railroads)
		<i>Response and source of information:</i>

N		Noise is part of any construction project. To protect the public from noise, specific hours of construction will be included in the contract documents. <i>Source: Based on Previous contract documents prepared by the engineer and Montana Public Works Standard Specifications (MPWSS).</i>
Key	4	Historic Properties, Cultural, and Archaeological Resources
N		<p><i>Response and source of information:</i></p> <p>Work in Main Street would be in the vicinity of historic properties, but all work would be completed within the City or State Right-of-Way. No historic properties are anticipated to be impacted by the project, other than the existing intake (lower portion is 110-years old), which may be left in place or demolished. The State Historic and Preservation Society was contacted and a formal cultural resource survey was not warranted. <i>Source: Correspondence with the State Historical and Preservation Office.</i></p>
Key	5	Changes in Demographic (population) Characteristics (e.g., quantity, distribution, density)
N		<p><i>Response and source of information:</i></p> <p>The project will allow for normal changes in demographic characteristics. The PER details the boom-bust cycles and recommends improvements necessary to deal with realistic growth if another boom were to occur. However, it also considers the current downturn cycle when calculating long-term distribution of costs per user. The improvement will not change the characteristics, but will allow the City to deal with changes as they occur. <i>Source: PER</i></p>
Key	6	General Housing Conditions - Quality, Quantity, Affordability
N		<p><i>Response and source of information:</i></p> <p>No changes in housing are required. <i>Source: PER.</i></p>
Key	7	Displacement or Relocation of Businesses or Residents
N		<p><i>Response and source of information:</i></p> <p>No displacement of businesses or residents is required or anticipated. The improvements will allow for expansion and sustainability of business in the business district. <i>Source: PER and 2017 Capacity Study.</i></p>
Key	8	Public Health and Safety
		<i>Response and source of information:</i>

B		Public health and safety are significantly enhanced by the project by preventing build-up of bacteria within the tuberculated regions of the old cast iron pipe, enhancing a woefully inadequate fire protection availability, and eliminating leakage of water. In addition, a potential catastrophic disaster is avoided by providing a new intake, while maintaining a potential backup. <i>Source: PER Findings, conversations with the Fire Chief.</i>
Key	9	Lead Based Paint and/or Asbestos
		<i>Response and source of information:</i>
N		No asbestos is anticipated to be found. Although the lower portions of the intake were constructed during a period of time where lead-based paint was used, neither the interior nor exterior of the older portion includes painting. The 1974 block structure atop the intake could potentially include lead paint and will require testing. Though the area is small, collection of old paint would be required. Demolition costs included in the PER note that the line item includes testing and handling of potential lead paint. <i>Source: PER, conversations with the DEQ, site visits.</i>
Key	10	Local Employment & Income Patterns - Quantity and Distribution of Employment, Economic Impact
		<i>Response and source of information:</i>
B		Local employment can be protected by ensuring a sound, safe, long-term water system. Furthermore, fire protection is currently woefully inadequate for the downtown business district. <i>Source: PER and 2016 Capacity Study.</i>
Key	11	Local & State Tax Base & Revenues
		<i>Response and source of information:</i>
B		See response to item 10, which is all applicable to this item 11. This project is essential for protecting tax base in the business district. <i>Source: PER and 2016 Capacity Study.</i>
Key	12	Educational Facilities - Schools, Colleges, Universities
		<i>Response and source of information:</i>
B		The project will provide better protection for the schools, best ensuring that there is plenty of water capacity, even in the next "boom" cycle. <i>Source: PER and 2016 Capacity Study.</i>
Key	13	Commercial and Industrial Facilities - Production & Activity, Growth or Decline.

		<i>Response and source of information:</i>
B		Currently the region is declining in oil production, but the City has been remarkably resilient. It is a stable city and can provide services needed for companies and individuals working with the maintenance of oil facilities installed during the boom. With the improvements, the City will also be ready for the next boom, should one occur. <i>Source: PER, Census Figures and Estimates and 2016 Capacity Study.</i>
Key	14	Health Care – Medical Services
		<i>Response and source of information:</i>
N		Health care is not directly impacted by the project. The project does provide for a safer environment and a sound water treatment and distribution system is important in the prevention of water-borne disease outbreaks. <i>Source: PER, 2016 Capacity Study</i>
Key	15	Social Services – Governmental Services (e.g., demand on)
		<i>Response and source of information:</i>
N		No new governmental services are developed or are anticipated as needed beyond assistance with grant and loan administration. <i>Source: Engineer’s personal experience.</i>
Key	16	Social Structures & Mores (Standards of Social Conduct/Social Conventions)
		<i>Response and source of information:</i>
N		No significant change in social structures & mores are anticipated as a result of the project. Costs of the project are distributed using base rates subjected to service line sized (equivalent dwelling units), and actual water use is metered throughout the system. <i>Source: PER</i>
Key	17	Land Use Compatibility (e.g., growth, land use change, development activity, adjacent land uses and potential conflicts)
		<i>Response and source of information:</i>
N		Land use will not significantly change. <i>Source: PER, City</i>
Key	18	Energy Resources - Consumption and Conservation
		<i>Response and source of information:</i>
B		The project will allow for reduced water leakage, and accordingly less water is required to be pumped and treated. Proposed VFDs at the new intake will provide greater efficiency, though there will be new energy costs (under \$1,000 per year) for operating a compressor for cleaning the proposed intake screens. <i>Source: PER, lift station design and pump curves</i>

Key	19	Solid Waste Management
		<i>Response and source of information:</i>
N		No significant change is expected in solid waste management. Most equipment for pipeline and water storage facilities does not come with packaging. The construction sites will be required to be kept clean with solid waste disposed of at a landfill (an on-site resident project observer will assist with informing any superintendent of any solid waste related issue), but in any event this will not be expected to influence the management of solid waste. <i>Source: PER.</i>
Key	20	Wastewater Treatment - Sewage System
		<i>Response and source of information:</i>
N		No change in wastewater treatment will be required by the project, and no increase in wastewater production is anticipated to occur as a result of this project. <i>Source: PER</i>
Key	21	Storm Water – Surface Drainage
		<i>Response and source of information:</i>
N		No long-term change in stormwater production or patterns is anticipated to result from the project. During construction the contractor will be required to maintain erosion control practices according to the general stormwater discharge permit associated with the project. <i>Source: PER.</i>
Key	22	Community Water Supply
		<i>Response and source of information:</i>
B		The project will significantly enhance the existing community water supply by providing a very long-term solution to the failing intake and preventing many future water lines breaks (currently at 10 – 15 leaks/breaks per year). The PER was based on a 20-year life cycle cost, but the pipelines and Intake are anticipated to actually last 80 – 100 years. <i>Source: PER economic analysis.</i>
Key	23	Public Safety – Police
		<i>Response and source of information:</i>
N		The project is not anticipated to have any impact on police.
Key	24	Fire Protection – Hazards
		<i>Response and source of information:</i>

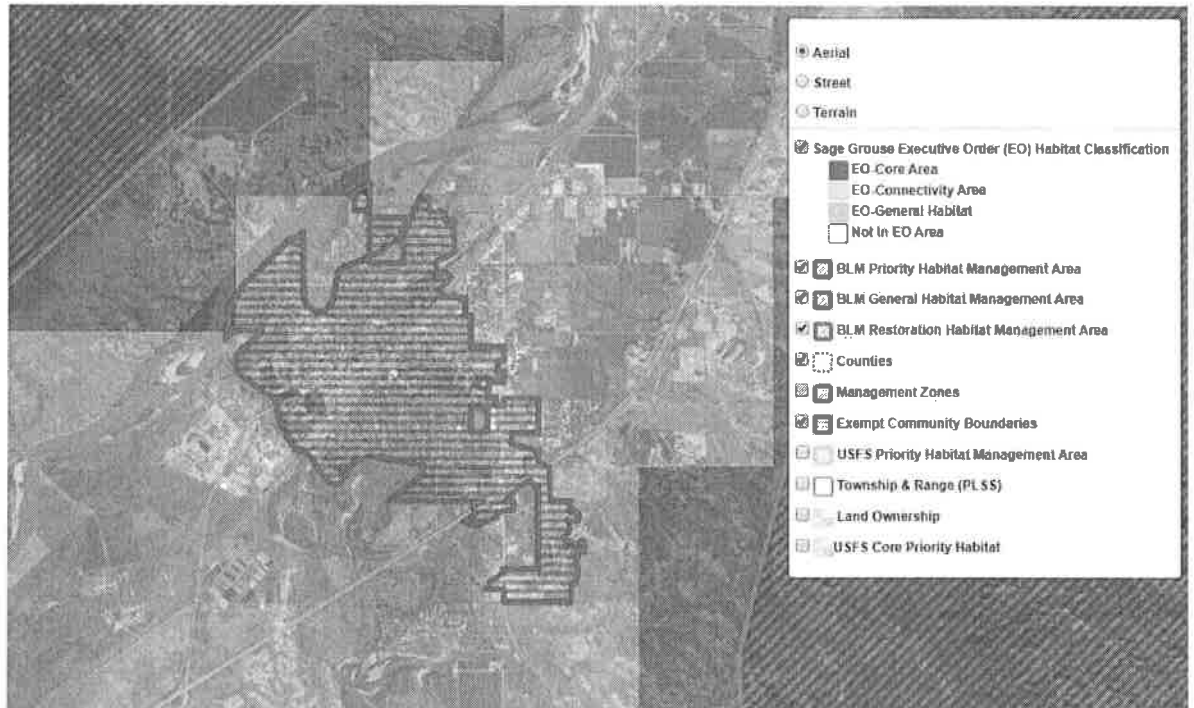

B		The project will greatly enhance fire protection by raising the available water from current levels of about 500 – 600 gpm at some downtown business district hydrants to several thousand gpm at all hydrants. <i>Source: PER, conversations with the fire chief, 2016 Capacity Study.</i>
Key	25	Emergency Medical Services
N		<p><i>Response and source of information:</i></p> <p>Emergency medical services are not impacted by the project, though traffic control along Main Street and N Montana Avenue will have to account for the passage of emergency medical vehicles.. <i>Source: PER Maps</i></p>
Key	26	Parks, Playgrounds, & Open Space
N		<p><i>Response and source of information:</i></p> <p>Parks and playgrounds are not directly impacted by the project. <i>Source: PER Maps.</i></p>
Key	27	Cultural Facilities, Cultural Uniqueness & Diversity
N		<p><i>Response and source of information:</i></p> <p>Work on the water system is blind to race, creed or color, and all customers are treated equally. The water system unfortunately does not enhance or discourage cultural diversity or uniqueness. <i>Source: PER</i></p>
Key	28	Transportation Networks and Traffic Flow Conflicts (e.g., rail; auto including local traffic; airport runway clear zones - avoidance of incompatible land use in airport runway clear zones)
B		<p><i>Response and source of information:</i></p> <p>Transportation is enhanced by the elimination of leaks that often are repaired during the winter. Winter leaks can lead to ice on roads and a hazardous condition for drivers and pedestrians. While the project does not directly improve traffic patterns, it does lessen the chance of ice on the roads in town and the frequency of closures. <i>Source: PER</i></p>
Key	29	Consistency with Local Ordinances, Resolutions, or Plans (e.g., conformance with local comprehensive plans, zoning, or capital improvement plans)
N		<p><i>Response and source of information:</i></p>

		The proposed project is completely consistent with the priorities of the City. <i>Source: PER, Meetings with City personnel.</i>
Key	30	Is There a Regulatory Action on Private Property Rights as a Result of this Project? (consider options that reduce, minimize, or eliminate the regulation of private property rights.)
		<i>Response and source of information:</i>
N		There are no regulatory actions involved with any private property as a result of this project or leading up to the project. <i>Source: PER, conversations with City personnel.</i>

Figure 7. Landcover in the Spill Response Region - Mile City Public Water Supply.

JRS - 11 - 2002

Land cover in the spill response area, 10 miles upstream of the intake, as per the SWDAR of 2003

Corrosivity of Soil for Concrete around the existing and proposed Intake site is considered Moderate (yellow-green).

Soils at the Intake site are 489A

Texture: Loam, clay loam, or silty clay loam
 Clay content: 18 to 35 percent
 Calcium carbonate equivalent: 5 to 15 percent
 Reaction: pH 7.9 to 8.4

2BC horizon

Hue: 10YR or 2.5Y
 Value: 5 or 6 dry; 4 or 5 moist
 Chroma: 2 or 3
 Texture: Loam or clay loam
 Clay content: 18 to 30 percent
 Reaction: pH 7.9 to 8.4

2C horizon

Hue: 10YR or 2.5Y
 Value: 5 or 6 dry; 4 or 5 moist
 Chroma: 2 or 3
 Texture: Loam or clay loam
 Clay content: 18 to 30 percent
 Reaction: pH 7.9 to 8.4

489A—Spinekop silty clay loam, 0 to 2 percent slopes**Setting**

Landform: Stream terraces
Slope: 0 to 2 percent
Elevation: 2,240 to 2,900 feet
Mean annual precipitation: 11 to 14 inches
Frost-free period: 110 to 135 days

Composition**Major Components**

Spinekop and similar soils: 85 percent

Minor Components

Yamacall and similar soils: 0 to 4 percent
 Kobase and similar soils: 0 to 4 percent
 Marias and similar soils: 0 to 4 percent
 Soils that have slopes more than 2 percent: 0 to 3 percent

Major Component Description

Surface layer texture: Silty clay loam
Depth class: Very deep (more than 60 inches)
Drainage class: Well drained
Dominant parent material: Alluvium
Native plant cover type: Rangeland

Flooding: None

Available water capacity: Mainly 10.1 inches

Tally Series

Depth class: Very deep

Drainage class: Well drained

Permeability: Moderately rapid

Landform: Sedimentary plains

Parent material: Alluvium or eolian material

Slope range: 2 to 12 percent

Elevation range: 2,900 to 3,760 feet

Annual precipitation: 15 to 17 inches

Annual air temperature: 43 to 45 degrees F

Frost-free period: 110 to 135 days

Taxonomic Class: Coarse-loamy, mixed Typic Haploborolls

Typical Pedon

Tally fine sandy loam in an area of Tally-Vebar fine sandy loams, 2 to 12 percent slopes, in an area of rangeland; 2,300 feet south and 2,300 feet east of northwest corner of sec. 16, T. 1 N., R. 46 E.

A—0 to 4 inches; brown (10YR 4/3) fine sandy loam, dark brown (10YR 3/3) moist; weak fine granular structure; soft, very friable, nonsticky and nonplastic; common fine and very fine roots; slightly alkaline; clear smooth boundary.

Bw1—4 to 9 inches; brown (10YR 4/3) fine sandy loam, dark brown (10YR 3/3) moist; moderate medium prismatic structure parting to moderate medium subangular blocky structure; soft, very friable, nonsticky and nonplastic; common fine and very fine roots; common fine and very fine pores; slightly alkaline; gradual wavy boundary.

Bw2—9 to 16 inches; brown (10YR 5/3) fine sandy loam, brown (10YR 4/3) moist; moderate medium prismatic structure parting to moderate medium subangular blocky structure; soft, very friable, nonsticky and nonplastic; common fine roots; common very fine pores; slightly effervescent; slightly alkaline; clear smooth boundary.

Bk1—16 to 32 inches; very pale brown (10YR 7/4) fine sandy loam, yellowish brown (10YR 5/4) moist; moderate coarse prismatic structure; hard,

RESOLUTION NO. 4412

A RESOLUTION APPROVING A STANDARD FORM OF AGREEMENT BETWEEN OWNER AND ARCHITECT FOR PROFESSIONAL SERVICES WITH HIGH PLAINS ARCHITECTS, FOR THE PROVISION OF ARCHITECTURAL SERVICES TO THE CITY OF MILES CITY FOR A 5-YEAR PERIOD.

WHEREAS, the City of Miles City has the power to contract for architectural services without soliciting competitive bids, pursuant to MCA §7-5-4301;

AND WHEREAS, the City of Miles City wishes to contract with High Plains Architects for the provision of general architectural services to the City, as may be requested by the City from time to time, for a five (5) year period;

AND WHEREAS, High Plains Architects has agreed to be available to the City of Miles City to provide general architectural services upon request of the City during said five (5) year period;

NOW THEREFORE, IT IS RESOLVED BY THE CITY COUNCIL OF THE CITY OF MILES CITY, MONTANA AS FOLLOWS:

1. The "Standard Form of Agreement Between Owner and Architect for Professional Services," attached hereto as Exhibit "A," and made a part hereof, is hereby approved and adopted by this council.
2. The Mayor of the City of Miles City is hereby empowered and authorized to execute said agreement on behalf of the City of Miles City, and bind the City of Miles City thereto.
3. The Mayor of the City of Miles City is hereby empowered and authorized to execute such further documents as may become necessary to carry out the terms of said agreement.

SAID RESOLUTION FINALLY PASSED AND ADOPTED BY A DULY CONSTITUTED QUORUM OF THE CITY COUNCIL OF THE CITY OF MILES CITY, MONTANA, THIS 25TH DAY OF MAY, 2021.

John Hollowell, Mayor

ATTEST:

Mary Rowe, City Clerk

 **AIA**® Document B102™ – 2017

Standard Form of Agreement Between Owner and Architect without a Predefined Scope of Architect's Services

AGREEMENT made as of the 11th day of May in the year Two Thousand Twenty-one (2021)

(In words, indicate day, month and year.)

BETWEEN the Architect's client identified as the Owner:
(Name, legal status, address and other information)

City of Miles City
P.O. Box 910
Miles City, MT 59301

and the Architect:

(Name, legal status, address and other information)

High Plains Architects, P.C.
2720 Minnesota Ave, 59101
P.O. Box 2203, 59103
Billings, MT

for the following (hereinafter referred to as "the Project"):

(Insert information related to types of services, location, facilities, or other descriptive information as appropriate.)

Miles City Architect On-Call.

The projects to be undertaken for the City of Miles City during the five-year term of this agreement are not yet determined by the City of Miles City. An amendment to this agreement will be prepared for each project for which High Plains Architects is designated by the City of Miles City to provide professional services. Each amendment will enumerate the scope, required professional services, deliverables, schedule, and professional fee arrangement. The number of amendments potential under the agreement is not limited.

The Owner and Architect agree as follows.

ADDITIONS AND DELETIONS:

The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added necessary information and where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

TABLE OF ARTICLES

- 1 ARCHITECT'S RESPONSIBILITIES
- 2 OWNER'S RESPONSIBILITIES
- 3 COPYRIGHTS AND LICENSES
- 4 CLAIMS AND DISPUTES
- 5 TERMINATION OR SUSPENSION
- 6 COMPENSATION
- 7 MISCELLANEOUS PROVISIONS
- 8 SPECIAL TERMS AND CONDITIONS
- 9 SCOPE OF THE AGREEMENT

ARTICLE 1 ARCHITECT'S RESPONSIBILITIES

§ 1.1 The Architect shall provide the following professional services:

(Describe the scope of the Architect's services or identify an exhibit or scope of services document setting forth the Architect's services and incorporated into this document in Section 9.2.)

Refer to Page 1 for the description of the architect's services.

§ 1.1.1 The Architect represents that it is properly licensed in the jurisdiction where the Project is located to provide the services required by this Agreement, or shall cause such services to be performed by appropriately licensed design professionals.

§ 1.2 The Architect shall perform its services consistent with the professional skill and care ordinarily provided by architects practicing in the same or similar locality under the same or similar circumstances. The Architect shall perform its services as expeditiously as is consistent with such professional skill and care and the orderly progress of the Project.

§ 1.3 The Architect identifies the following representative authorized to act on behalf of the Architect with respect to the Project.

(List name, address, and other contact information.)

Randy Hafer, FAIA, President, Principal-in-Charge
High Plains Architects
rhafer@highplainsarchitects.com
Ed Gulick, AIA, Vice-President, Principal-in-Charge
High Plains Architects
egulick@highplainsarchitects.com
Project managers will be designated for each project.

§ 1.4 Except with the Owner's knowledge and consent, the Architect shall not engage in any activity, or accept any employment, interest or contribution that would reasonably appear to compromise the Architect's professional judgment with respect to this Project.

§ 1.5 The Architect shall maintain the following insurance until termination of this Agreement. If any of the requirements set forth below are in addition to the types and limits the Architect normally maintains, the Owner shall pay the Architect as set forth in Section 6.2.3.

Init.

§ 1.5.1 Commercial General Liability with policy limits of not less than one million dollars (\$1,000,000) for each occurrence and two million dollars (\$2,000,000) in the aggregate for bodily injury and property damage.

§ 1.5.2 Automobile Liability covering vehicles owned, and non-owned vehicles used, by the Architect with policy limits of not less than one million dollars (\$ 1,000,000) per accident for bodily injury, death of any person, and property damage arising out of the ownership, maintenance and use of those motor vehicles, along with any other statutorily required automobile coverage—included in 1.5.1 Commercial General Liability.

§ 1.5.3 The Architect may achieve the required limits and coverage for Commercial General Liability and Automobile Liability through a combination of primary and excess or umbrella liability insurance, provided such primary and excess or umbrella liability insurance policies result in the same or greater coverage as the coverages required under Sections 1.5.1 and 1.5.2, and in no event shall any excess or umbrella liability insurance provide narrower coverage than the primary policy. The excess policy shall not require the exhaustion of the underlying limits only through the actual payment by the underlying insurers.

§ 1.5.4 Workers' Compensation at statutory limits.

§ 1.5.5 Employers' Liability with policy limits not less than one hundred thousand dollars (\$ 100,000) each accident, one hundred thousand dollars (\$ 100,000) each employee, and five hundred thousand dollars (\$ 500,000) policy limit.

§ 1.5.6 Professional Liability covering negligent acts, errors and omissions in the performance of professional services with policy limits of not less than one million dollars (\$ 1,000,000) per claim and one million dollars (\$ 1,000,000) in the aggregate.

§ 1.5.7 **Additional Insured Obligations.** If requested by the Owner, to the fullest extent permitted by law, the Architect shall cause the primary and excess or umbrella policies for Commercial General Liability and Automobile Liability to include the Owner as an additional insured for claims caused in whole or in part by the Architect's negligent acts or omissions. The additional insured coverage shall be primary and non-contributory to any of the Owner's insurance policies and shall apply to both ongoing and completed operations.

§ 1.5.8 The Architect shall provide certificates of insurance to the Owner that evidence compliance with the requirements in this Section 1.5.

ARTICLE 2 OWNER'S RESPONSIBILITIES

§ 2.1 Unless otherwise provided for under this Agreement, the Owner shall provide information in a timely manner regarding requirements for and limitations on the Project, including a written program, which shall set forth the Owner's objectives; schedule; constraints and criteria, including space requirements and relationships; flexibility; expandability; special equipment; systems; and site requirements.

§ 2.2 The Owner identifies the following representative authorized to act on the Owner's behalf with respect to the Project. The Owner shall render decisions and approve the Architect's submittals in a timely manner in order to avoid unreasonable delay in the orderly and sequential progress of the Architect's services.

(List name, address, and other contact information.)

John Hollowell
Mayor
City of Miles City
P.O. Box 910
Miles City, MT 59301
Or his designee

§ 2.3 The Owner shall coordinate the services of its own consultants with those services provided by the Architect. Upon the Architect's request, the Owner shall furnish copies of the scope of services in the contracts between the Owner and the Owner's consultants. The Owner shall furnish the services of consultants other than those designated as the responsibility of the Architect in this Agreement, or authorize the Architect to furnish them as an Additional Service, when the Architect requests such services and demonstrates that they are reasonably required by the scope of

the Project. The Owner shall require that its consultants and contractors maintain insurance, including professional liability insurance, as appropriate to the services or work provided.

§ 2.4 The Owner shall furnish all legal, insurance and accounting services, including auditing services, that may be reasonably necessary at any time for the Project to meet the Owner's needs and interests.

§ 2.5 The Owner shall provide prompt written notice to the Architect if the Owner becomes aware of any fault or defect in the Project, including errors, omissions or inconsistencies in the Architect's Instruments of Service.

§ 2.6 Within 15 days after receipt of a written request from the Architect, the Owner shall furnish the requested information as necessary and relevant for the Architect to evaluate, give notice of, or enforce lien rights.

ARTICLE 3 COPYRIGHTS AND LICENSES

§ 3.1 The Architect and the Owner warrant that in transmitting Instruments of Service, or any other information, the transmitting party is the copyright owner of such information or has permission from the copyright owner to transmit such information for its use on the Project.

§ 3.2 The Architect and the Architect's consultants shall be deemed the authors and owners of their respective Instruments of Service, including the Drawings and Specifications, and shall retain all common law, statutory and other reserved rights, including copyrights. Submission or distribution of Instruments of Service to meet official regulatory requirements or for similar purposes in connection with the Project is not to be construed as publication in derogation of the reserved rights of the Architect and the Architect's consultants.

§ 3.3 The Architect grants to the Owner a nonexclusive license to use the Architect's Instruments of Service solely and exclusively for the purposes of evaluating, constructing, using, maintaining, altering and adding to the Project, provided that the Owner substantially performs its obligations under this Agreement, including prompt payment of all sums due pursuant to Article 5 and Article 6. The Architect shall obtain similar nonexclusive licenses from the Architect's consultants consistent with this Agreement. The license granted under this section permits the Owner to authorize the Contractor, Subcontractors, Sub-subcontractors, and suppliers, as well as the Owner's consultants and separate contractors, to reproduce applicable portions of the Instruments of Service solely and exclusively for use in performing services or construction for the Project. If the Architect rightfully terminates this Agreement for cause as provided in Section 5.4, the license granted in this Section 3.3 shall terminate.

§ 3.3.1 In the event the Owner uses the Instruments of Service without retaining the authors of the Instruments of Service, the Owner releases the Architect and Architect's consultant(s) from all claims and causes of action arising from such uses. The Owner, to the extent permitted by law, further agrees to indemnify and hold harmless the Architect and its consultants from all costs and expenses, including the cost of defense, related to claims and causes of action asserted by any third person or entity to the extent such costs and expenses arise from the Owner's use of the Instruments of Service under this Section 3.3.1. The terms of this Section 3.3.1 shall not apply if the Owner rightfully terminates this Agreement for cause under Section 5.4.

§ 3.4 Except for the licenses granted in this Article 3, no other license or right shall be deemed granted or implied under this Agreement. The Owner shall not assign, delegate, sublicense, pledge or otherwise transfer any license granted herein to another party without the prior written agreement of the Architect. Any unauthorized use of the Instruments of Service shall be at the Owner's sole risk and without liability to the Architect and the Architect's consultants.

§ 3.5 Except as otherwise stated in Section 3.3, the provisions of this Article 3 shall survive the termination of this Agreement.

ARTICLE 4 CLAIMS AND DISPUTES

§ 4.1 General

§ 4.1.1 The Owner and Architect shall commence all claims and causes of action against the other and arising out of or related to this Agreement, whether in contract, tort, or otherwise, in accordance with the requirements of the binding dispute resolution method selected in this Agreement and within the period specified by applicable law, but in any case not more than 10 years after the date of Substantial Completion of the Work. The Owner and Architect waive all claims and causes of action not commenced in accordance with this Section 4.1.1.

§ 4.1.2 To the extent damages are covered by property insurance, the Owner and Architect waive all rights against each other and against the contractors, consultants, agents, and employees of the other for damages, except such rights as they may have to the proceeds of such insurance as set forth in AIA Document A201-2017, General Conditions of the Contract for Construction. The Owner or the Architect, as appropriate, shall require of the contractors, consultants, agents, and employees of any of them, similar waivers in favor of the other parties enumerated herein.

§ 4.1.3 The Architect and Owner waive consequential damages for claims, disputes, or other matters in question, arising out of or relating to this Agreement. This mutual waiver is applicable, without limitation, to all consequential damages due to either party's termination of this Agreement, except as specifically provided in Section 5.7.

§ 4.2 Mediation

§ 4.2.1 Any claim, dispute or other matter in question arising out of or related to this Agreement shall be subject to mediation as a condition precedent to binding dispute resolution. If such matter relates to or is the subject of a lien arising out of the Architect's services, the Architect may proceed in accordance with applicable law to comply with the lien notice or filing deadlines prior to resolution of the matter by mediation or by binding dispute resolution.

§ 4.2.2 The Owner and Architect shall endeavor to resolve claims, disputes and other matters in question between them by mediation, which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Mediation Procedures in effect on the date of this Agreement. A request for mediation shall be made in writing, delivered to the other party to this Agreement, and filed with the person or entity administering the mediation. The request may be made concurrently with the filing of a complaint or other appropriate demand for binding dispute resolution but, in such event, mediation shall proceed in advance of binding dispute resolution proceedings, which shall be stayed pending mediation for a period of 60 days from the date of filing, unless stayed for a longer period by agreement of the parties or court order. If an arbitration proceeding is stayed pursuant to this section, the parties may nonetheless proceed to the selection of the arbitrator(s) and agree upon a schedule for later proceedings.

§ 4.2.3 The parties shall share the mediator's fee and any filing fees equally. The mediation shall be held in the place where the Project is located, unless another location is mutually agreed upon. Agreements reached in mediation shall be enforceable as settlement agreements in any court having jurisdiction thereof.

§ 4.2.4 If the parties do not resolve a dispute through mediation pursuant to this Section 4.2, the method of binding dispute resolution shall be the following:

(Check the appropriate box.)

- Arbitration pursuant to Section 4.3 of this Agreement
- Litigation in a court of competent jurisdiction
- Other *(Specify)*

If the Owner and Architect do not select a method of binding dispute resolution, or do not subsequently agree in writing to a binding dispute resolution method other than litigation, the dispute will be resolved in a court of competent jurisdiction.

(Paragraphs deleted)

ARTICLE 5 TERMINATION OR SUSPENSION

§ 5.1 If the Owner fails to make payments to the Architect in accordance with this Agreement, such failure shall be considered substantial nonperformance and cause for termination or, at the Architect's option, cause for suspension of performance of services under this Agreement. If the Architect elects to suspend services, the Architect shall give seven days' written notice to the Owner before suspending services. In the event of a suspension of services, the Architect shall have no liability to the Owner for delay or damage caused the Owner because of such suspension of

services. Before resuming services, the Owner shall pay the Architect all sums due prior to suspension and any expenses incurred in the interruption and resumption of the Architect's services. The Architect's fees for the remaining services and the time schedules shall be equitably adjusted.

§ 5.2 If the Owner suspends the Project, the Architect shall be compensated for services performed prior to notice of such suspension. When the Project is resumed, the Architect shall be compensated for expenses incurred in the interruption and resumption of the Architect's services. The Architect's fees for the remaining services and the time schedules shall be equitably adjusted.

§ 5.3 If the Owner suspends the Project for more than 90 cumulative days for reasons other than the fault of the Architect, the Architect may terminate this Agreement by giving not less than seven days' written notice.

§ 5.4 Either party may terminate this Agreement upon not less than seven days' written notice should the other party fail substantially to perform in accordance with the terms of this Agreement through no fault of the party initiating the termination.

§ 5.5 The Owner may terminate this Agreement upon not less than seven days' written notice to the Architect for the Owner's convenience and without cause.

§ 5.6 If the Owner terminates this Agreement for its convenience pursuant to Section 5.5, or the Architect terminates this Agreement pursuant to Section 5.3, the Owner shall compensate the Architect for services performed prior to termination, Reimbursable Expenses incurred, and costs attributable to termination, including the costs attributable to the Architect's termination of consultant agreements.

§ 5.7 In addition to any amounts paid under Section 5.6, if the Owner terminates this Agreement for its convenience pursuant to Section 5.5, or the Architect terminates this Agreement pursuant to Section 5.3, the Owner shall pay to the Architect the following fees:

(Set forth below the amount of any termination or licensing fee, or the method for determining any termination or licensing fee.)

.1 Termination Fee:

To be negotiated on a case-by-case basis.

.2 Licensing Fee, if the Owner intends to continue using the Architect's Instruments of Service:

To be negotiated on a case-by-case basis.

§ 5.8 Except as otherwise expressly provided herein, this Agreement shall terminate
(Check the appropriate box.)

One year from the date of commencement of the Architect's services

One year from the date of Substantial Completion

Other

(Insert another termination date or refer to a termination provision in an attached document or scope of service.)

Five years from the date of the Agreement on Page 1—May 11, 2026—except that projects underway as of this termination date may be completed under the terms listed in the amendment pertaining to said project.

If the Owner and Architect do not select a termination date, this Agreement shall terminate one year from the date of commencement of the Architect's services.

§ 5.9 The Owner's rights to use the Architect's Instruments of Service in the event of a termination of this Agreement are set forth in Article 3 and Section 5.7.

ARTICLE 6 COMPENSATION

§ 6.1 The Owner shall compensate the Architect as set forth below for services described in Section 1.1, or in the attached exhibit or scope document incorporated into this Agreement in Section 9.2.

(Insert amount of, or basis for, compensation or indicate the exhibit or scope document in which compensation is provided for.)

Compensation for specific projects will be negotiated on a case-by-case basis. Specific fee arrangements will be determined based upon project type and may be any one of the following in each case: hourly plus reimbursables; hourly plus reimbursables, not to exceed; percentage of the Cost of the Work; lump sum. High Plains Architects "Hourly Rate Schedule with Travel for 2021" identified as Exhibit A is attached hereto. High Plains Architects will update its hourly rate schedule on January 1st of each year of this agreement.

§ 6.2 Compensation for Reimbursable Expenses

§ 6.2.1 Reimbursable Expenses are in addition to compensation set forth in Section 6.1 and include expenses incurred by the Architect and the Architect's consultants directly related to the Project, as follows:

- .1 Transportation and authorized out-of-town travel and subsistence;
- .2 Long distance services, dedicated data and communication services, teleconferences, Project web sites, and extranets;
- .3 Permitting and other fees required by authorities having jurisdiction over the Project;
- .4 Printing, reproductions, plots, and standard form documents;
- .5 Postage, handling and delivery;
- .6 Expense of overtime work requiring higher than regular rates, if authorized in advance by the Owner;
- .7 Renderings, physical models, mock-ups, professional photography, and presentation materials requested by the Owner or required for the Project;
- .8 If required by the Owner, and with the Owner's prior written approval, the Architect's consultants' expenses of professional liability insurance dedicated exclusively to this Project, or the expense of additional insurance coverage or limits in excess of that normally maintained by the Architect's consultants;
- .9 All taxes levied on professional services and on reimbursable expenses;
- .10 Site office expenses;
- .11 Registration fees and any other fees charged by the Certifying Authority or by other entities as necessary to achieve the Sustainable Objective; and
- .12 Other similar Project-related expenditures.

§ 6.2.2 For Reimbursable Expenses the compensation shall be the expenses incurred by the Architect and the Architect's consultants plus zero percent (0 %) of the expenses incurred.

§ 6.2.3 **Architect's Insurance.** If the types and limits of coverage required in Section 1.5 are in addition to the types and limits the Architect normally maintains, the Owner shall pay the Architect for the additional costs incurred by the Architect for the additional coverages as set forth below:

(Insert the additional coverages the Architect is required to obtain in order to satisfy the requirements set forth in Section 1.5, and for which the Owner shall reimburse the Architect.)

N.A.

§ 6.3 Payments to the Architect

§ 6.3.1 Initial Payments

§ 6.3.1.1 An initial payment of zero dollars (\$ 0) shall be made upon execution of this Agreement and is the minimum payment under this Agreement. It shall be credited to the Owner's account in the final invoice.

§ 6.3.2 Progress Payments

§ 6.3.2.1 Unless otherwise agreed, payments for services shall be made monthly in proportion to services performed. Payments are due and payable upon presentation of the Architect's invoice. Amounts unpaid thirty (30) days after

the invoice date shall bear interest at the rate entered below, or in the absence thereof at the legal rate prevailing from time to time at the principal place of business of the Architect.
(Insert rate of monthly or annual interest agreed upon.)

12 % per annum

§ 6.3.2.2 The Owner shall not withhold amounts from the Architect's compensation to impose a penalty or liquidated damages on the Architect, or to offset sums requested by or paid to contractors for the cost of changes in the Work, unless the Architect agrees or has been found liable for the amounts in a binding dispute resolution proceeding.

§ 6.3.2.3 Records of Reimbursable Expenses and services performed on the basis of hourly rates shall be available to the Owner at mutually convenient times.

ARTICLE 7 MISCELLANEOUS PROVISIONS

§ 7.1 This Agreement shall be governed by the law of the place where the Project is located, excluding that jurisdiction's choice of law rules. If the parties have selected arbitration as the method of binding dispute resolution, the Federal Arbitration Act shall govern Section 4.3.

§ 7.2 Except as separately defined herein, terms in this Agreement shall have the same meaning as those in AIA Document A201™-2017, General Conditions of the Contract for Construction.

§ 7.3 The Owner and Architect, respectively, bind themselves, their agents, successors, assigns, and legal representatives to this Agreement. Neither the Owner nor the Architect shall assign this Agreement without the written consent of the other, except that the Owner may assign this Agreement to a lender providing financing for the Project if the lender agrees to assume the Owner's rights and obligations under this Agreement, including any payments due to the Architect by the Owner prior to the assignment.

§ 7.4 The parties shall agree upon protocols governing the transmission and use of Instruments of Service or any other information or documentation in digital form. The parties will use AIA Document E203™-2013, Building Information Modeling and Digital Data Exhibit, to establish the protocols for the development, use, transmission, and exchange of digital data.

§ 7.4.1 Any use of, or reliance on, all or a portion of a building information model without agreement to protocols governing the use of, and reliance on, the information contained in the model and without having those protocols set forth in AIA Document E203™-2013, Building Information Modeling and Digital Data Exhibit, and the requisite AIA Document G202™-2013, Project Building Information Modeling Protocol Form, shall be at the using or relying party's sole risk and without liability to the other party and its contractors or consultants, the authors of, or contributors to, the building information model, and each of their agents and employees.

§ 7.5 If the Owner requests the Architect to execute certificates, the proposed language of such certificates shall be submitted to the Architect for review at least 14 days prior to the requested dates of execution. If the Owner requests the Architect to execute consents reasonably required to facilitate assignment to a lender, the Architect shall execute all such consents that are consistent with this Agreement, provided the proposed consent is submitted to the Architect for review at least 14 days prior to execution. The Architect shall not be required to execute certificates or consents that would require knowledge, services, or responsibilities beyond the scope of this Agreement.

§ 7.6 Nothing contained in this Agreement shall create a contractual relationship with, or a cause of action in favor of, a third party against either the Owner or Architect.

§ 7.7 Unless otherwise required in this Agreement, the Architect shall have no responsibility for the discovery, presence, handling, removal or disposal of, or exposure of persons to, hazardous materials or toxic substances in any form at the Project site.

§ 7.8 The Architect shall have the right to include photographic or artistic representations of the design of the Project among the Architect's promotional and professional materials. The Architect shall be given reasonable access to the completed Project to make such representations. However, the Architect's materials shall not include the Owner's confidential or proprietary information if the Owner has previously advised the Architect in writing of the specific

information considered by the Owner to be confidential or proprietary. The Owner shall provide professional credit for the Architect in the Owner's promotional materials for the Project. This Section 7.8 shall survive the termination of this Agreement unless the Owner terminates this Agreement for cause pursuant to Section 5.4.

§ 7.9 If the Architect or Owner receives information specifically designated as "confidential" or "business proprietary," the receiving party shall keep such information strictly confidential and shall not disclose it to any other person except as set forth in Section 7.9.1. This Section 7.9 shall survive the termination of this Agreement.

§ 7.9.1 The receiving party may disclose "confidential" or "business proprietary" information after 7 days' notice to the other party, when required by law, arbitrator's order, or court order, including a subpoena or other form of compulsory legal process issued by a court or governmental entity, or to the extent such information is reasonably necessary for the receiving party to defend itself in any dispute. The receiving party may also disclose such information to its employees, consultants, or contractors in order to perform services or work solely and exclusively for the Project, provided those employees, consultants and contractors are subject to the restrictions on the disclosure and use of such information as set forth in this Section 7.9.

§ 7.10 The invalidity of any provision of the Agreement shall not invalidate the Agreement or its remaining provisions. If it is determined that any provision of the Agreement violates any law, or is otherwise invalid or unenforceable, then that provision shall be revised to the extent necessary to make that provision legal and enforceable. In such case the Agreement shall be construed, to the fullest extent permitted by law, to give effect to the parties' intentions and purposes in executing the Agreement.

ARTICLE 8 SPECIAL TERMS AND CONDITIONS

Special terms and conditions that modify this Agreement are as follows:
(Include other terms and conditions applicable to this Agreement.)

N.A.

ARTICLE 9 SCOPE OF THE AGREEMENT

§ 9.1 This Agreement represents the entire and integrated agreement between the Owner and the Architect and supersedes all prior negotiations, representations or agreements, either written or oral. This Agreement may be amended only by written instrument signed by both the Owner and Architect.

§ 9.2 This Agreement is comprised of the following documents identified below:

- .1 AIA Document B102™-2017, Standard Form Agreement Between Owner and Architect
- .2 AIA Document E203™-2013, Building Information Modeling and Digital Data Exhibit, if executed, dated as indicated below:
(Insert the date of the E203-2013 incorporated into this Agreement.)

N.A.

- .3 Exhibits:
(Check the appropriate box for any exhibits incorporated into this Agreement.)

AIA Document E204™-2017, Sustainable Projects Exhibit, dated as indicated below:
(Insert the date of the E204-2017 incorporated into this Agreement.)

N.A.

Other Exhibits incorporated into this Agreement:
(Clearly identify any other exhibits incorporated into this Agreement.)

Exhibit A -- "High Plains Architects Hourly Rate Schedule with Travel for 2021."

- .4 Other documents:

(List other documents, including the Architect's scope of services document, hereby incorporated into the Agreement.)

N.A.

This Agreement entered into as of the day and year first written above.

OWNER (Signature)

(Printed name and title)

ARCHITECT (Signature)

Randy Hafer, FAIA, President #1645

(Printed name, title, and license number, if required)

**EXHIBIT A with TRAVEL
HOURLY RATE SCHEDULE *
for 2021**

		TRAVEL RATE
PRINCIPAL	\$150.00/HR.	\$ 100.00/HR.
ASSOCIATE PRINCIPAL	\$130.00/HR.	\$ 85.00/HR.
PROJECT ARCHITECT LEVEL III	\$100.00/HR.	\$ 70.00/HR.
